Continued strong top-line momentum with more balance between ARPU and subscriber growth

AMRR growth drivers

AMRR growth in FY24 was balanced between subscriber additions and ARPU expansion

AMRR (\$m)

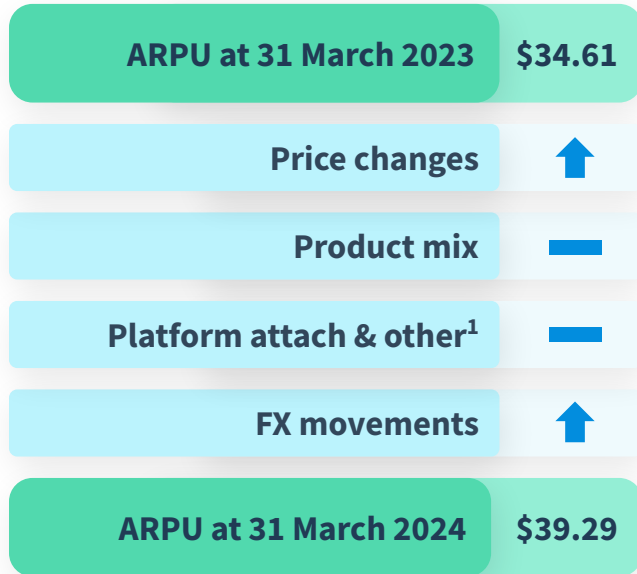

Growth in AMRR of \$407.6m or 26% YOY (22% in constant currency) reflects subscriber growth of 11%, and ARPU expansion of 14% YOY

Strong ARPU expansion, churn remains low

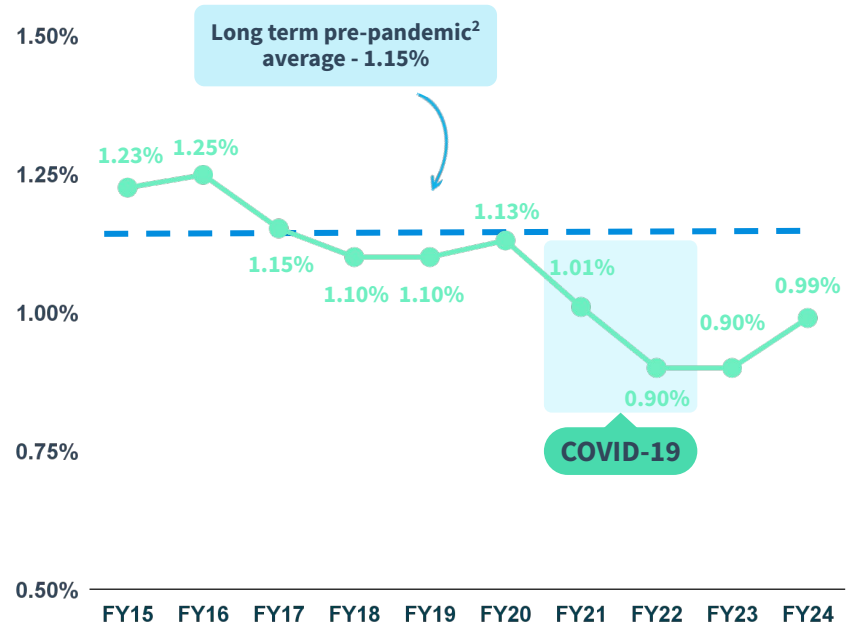

ARPU movement contributors

ARPU has increased \$4.68 since 31 March 2023

MRR churn (%)

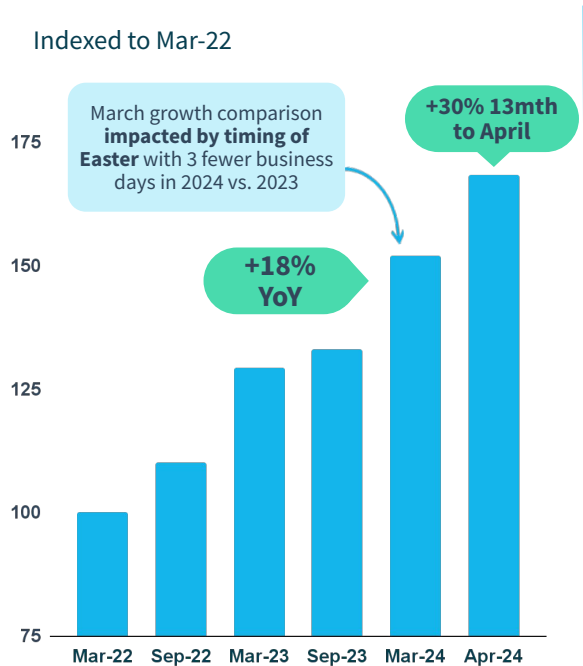

Churn is reported on a percentage of monthly recurring revenue basis. It has remained below pre-pandemic levels

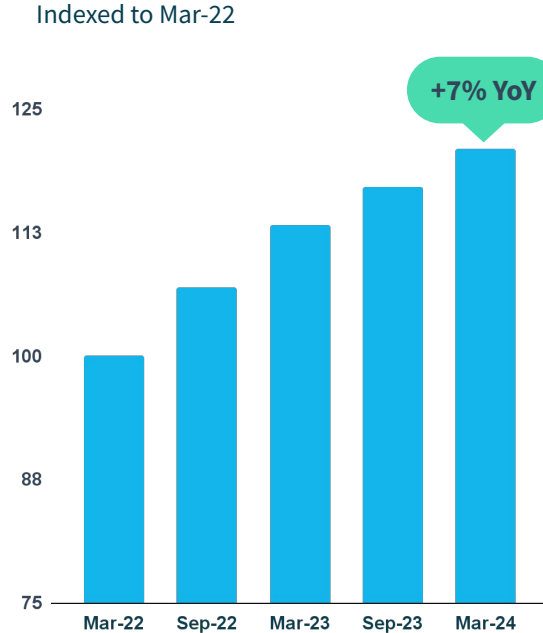

1. Other includes platform revenues such as Payments, Payroll, Planday and other items 2. Average calculated as MRR churn for the period FY16 - FY20

ARPU drivers: Deep dive on platform revenue drivers

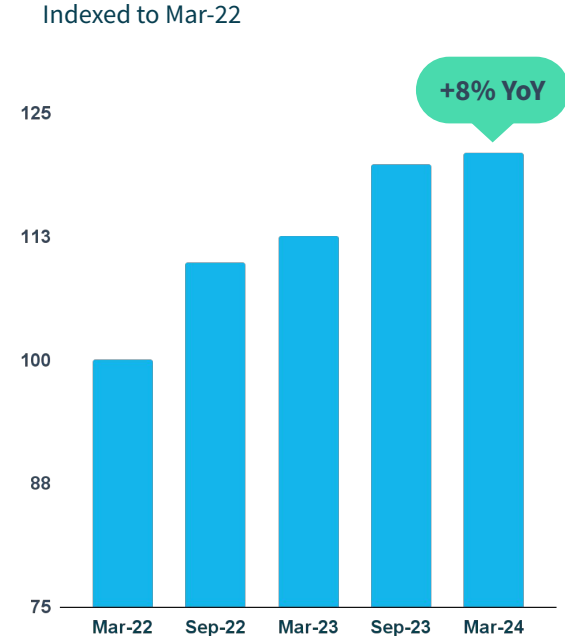

Total payment value¹

Employees paid through Xero Payroll²

Planday users³

2. Total employees paid through Xero Payroll in Australia, New Zealand and the UK (markets with a Xero Payroll solution)

3. Average employee users of Planday

ARPU drivers: Mix in FY25 to be impacted by long idle subscriptions

Removal of long idle subscribers

- Identified pool of long idle subscribers¹ now estimated at **between 125k - 175k**. The majority are located in the international segment with:
 - 55k - 75k located in North America
 - 40k - 60k located in the UK
 - The remainder located in Australia and the Rest of World segments (none are located in New Zealand)
- Xero plans to **remove these subscriptions** in H1 FY25. We expect their removal to have minimal impact on FY25 revenue
- Based on the midpoint of this range as at 31 March 2024 if these subscribers were removed **group ARPU would increase approximately 2-4%**

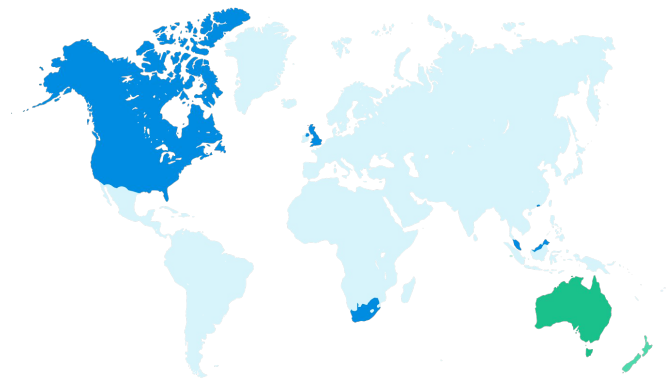

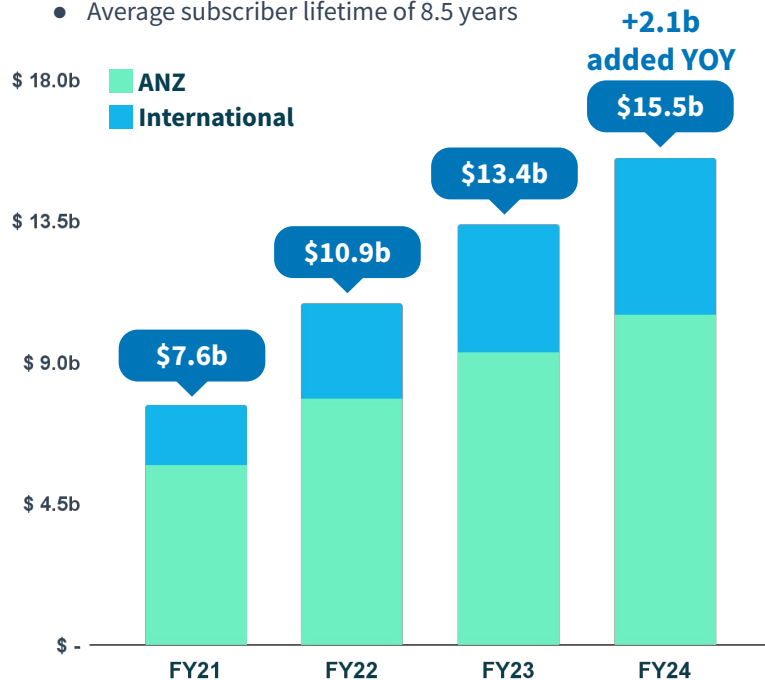

1. Long idle subscriptions are those that have been undeployed for more than 24 months, and that are not expected to be deployed in a reasonable timeframe

LTV expansion & LTV/CAC demonstrate consistent macro resilient value creation

Total LTV over time

- LTV 3 year CAGR 22% for ANZ and 38% for International
- Average subscriber lifetime of 8.5 years

	ANZ	International	Group
ARPU	\$37.97	\$41.05	\$39.29

LTV movements by driver (\$b)

From 31 March 2023 to 31 March 2024

Value of a Xero subscriber

At 31 March 2024

Cost to serve well managed, margins improved

Gross profit (\$m)

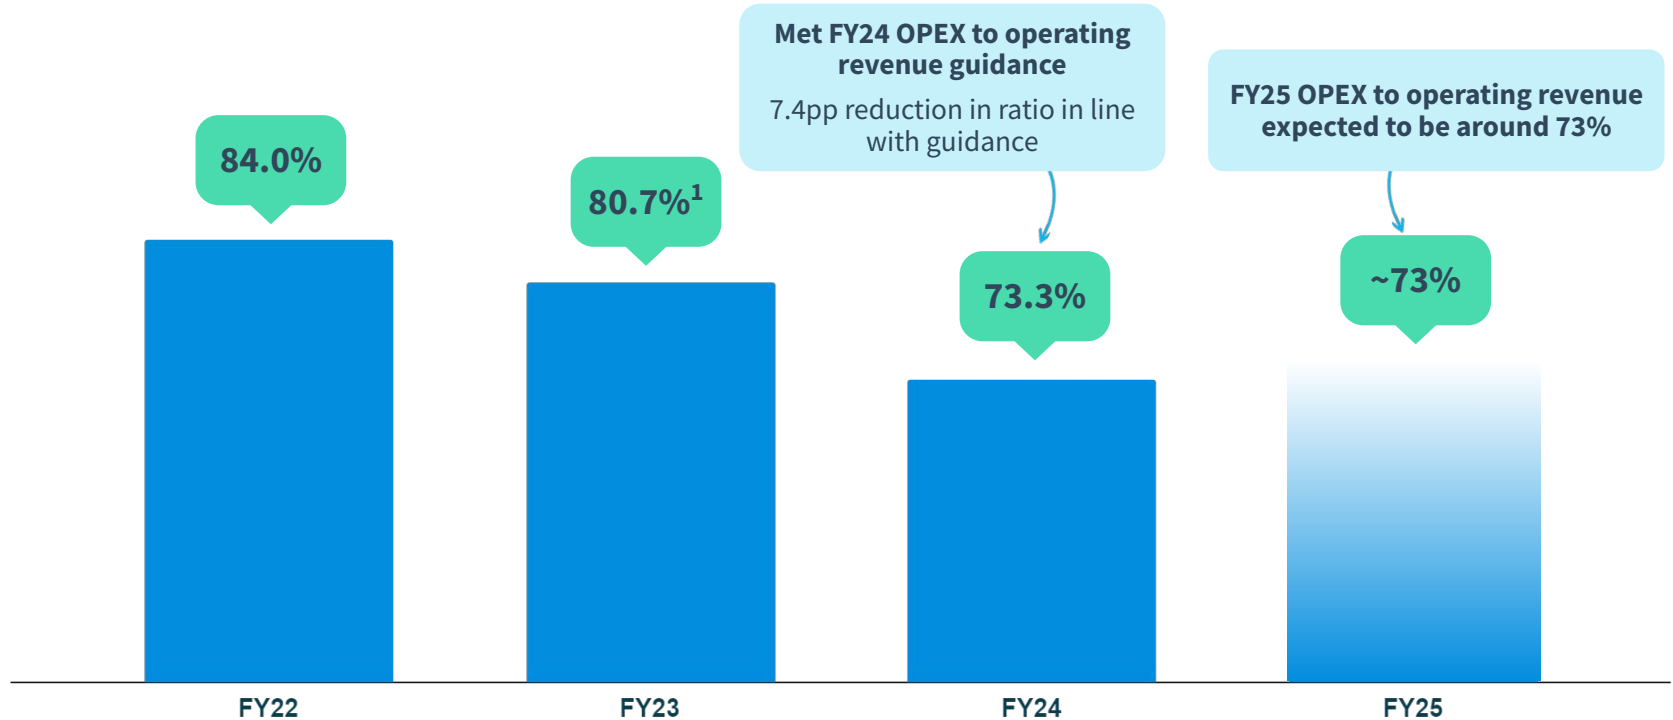

Gross margin (%)

Gross profit increased by \$289m or 24% YOY, more than the 22% growth in revenue. This resulted in a 0.9pp increase in gross profit margin reflecting **the use of advanced technology and hosting optimisation**

Reinvesting in line with our FY25-27 strategy to support revenue growth

Operating expenses as a % of operating revenue

1. Excluding \$34.7m of restructuring costs

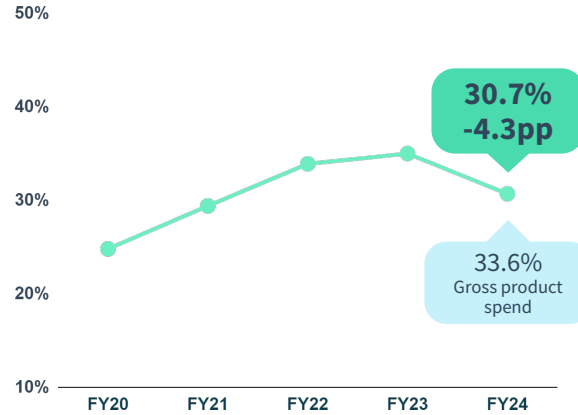

Restructure improved efficiency across all functions

Sales & marketing as a % of revenue

Sales and marketing costs increased by 15% YOY which was lower than the growth in operating revenue. This resulted in a 2.1pp improvement in CAC as a percentage of revenue. Excluding Xerocon, this ratio falls to 31.2% of revenue

Product design & development as a % of revenue

Product design and development costs increased 7% YOY, lower than the growth in operating revenue in FY24. This resulted in a 4.3pp improvement in these costs as a percentage of revenue YOY. This was largely due to our restructure and reshaping of our organisation in FY24

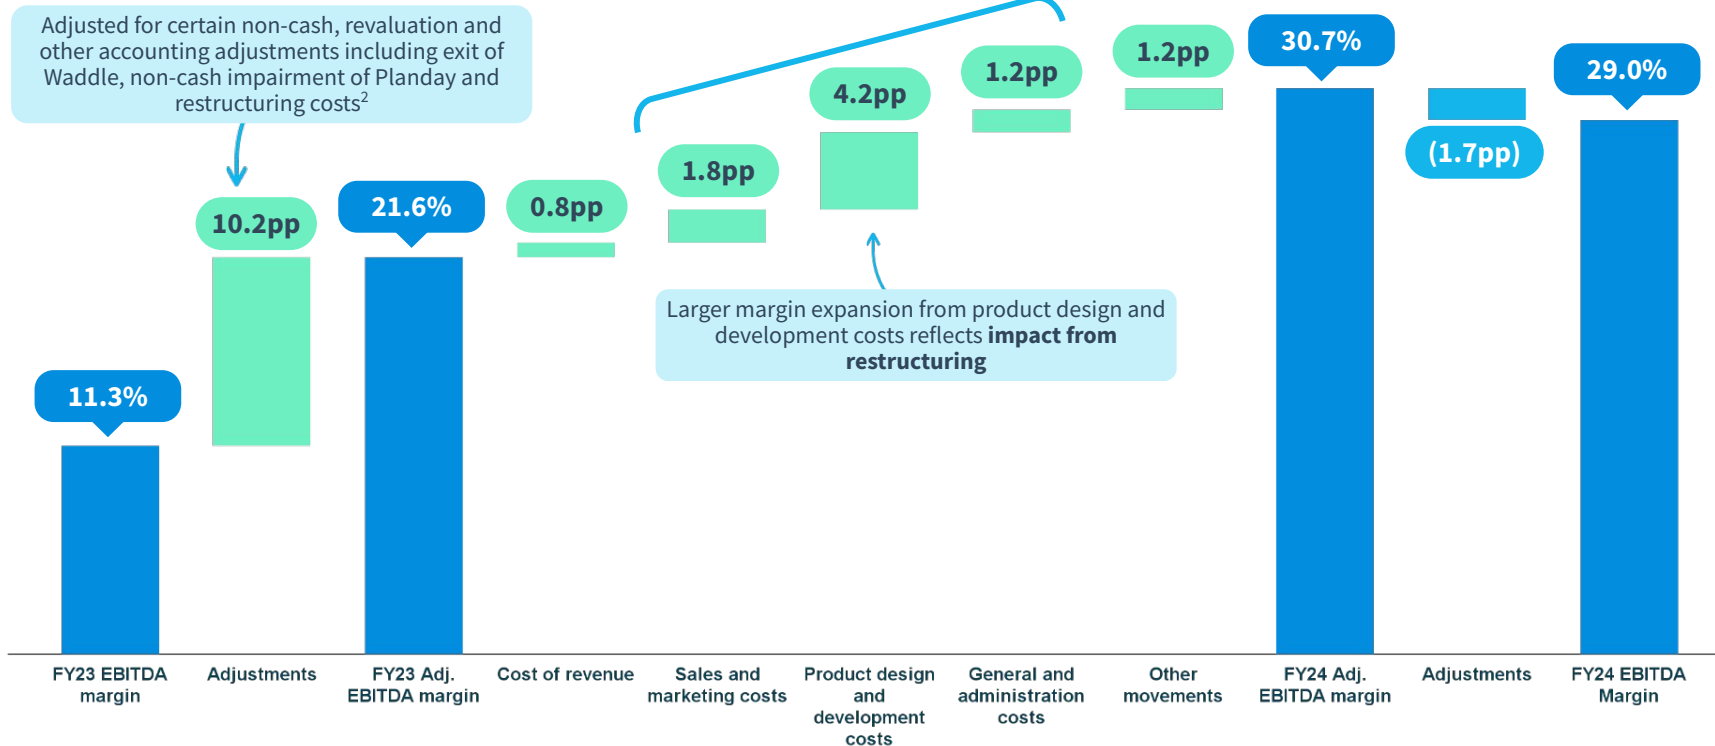

General & administration as a % of revenue

General and administration costs increased by 10% YOY which was lower than the growth in operating revenue in FY24. This resulted in 1.2pp improvement in G&A as a percentage of revenue YOY

Glossary

Adjusted EBITDA

Adjusted EBITDA (a non-GAAP financial measure) is provided as Xero believes it provides useful information for users to understand and analyse the underlying business performance. Adjusted EBITDA is calculated by adding back net finance expense, depreciation and amortisation, and income tax expense, as well as certain non-cash, revaluation and other accounting adjustments and charges to net profit/(loss)

AMRR

Annualised monthly recurring revenue (AMRR) represents monthly recurring revenue at 31 March, multiplied by 12. It provides a 12 month forward view of revenue, assuming any promotions have ended and other factors such as subscriber numbers, transaction volumes, pricing and foreign exchange remain unchanged during the year

ARPU

Average revenue per user (ARPU) is calculated as AMRR at 31 March divided by subscribers at that time (and divided by 12 to get a monthly view)

CAC months

Customer Acquisition Cost (CAC) months are the months of ARPU to recover the cost of acquiring each new subscriber. The calculation represents the sales and marketing costs for the year, excluding the capitalisation and amortisation of contract acquisition costs, less Xerocon revenue, divided by gross new subscribers added during the same period, divided by ARPU

CAGR

Compound annual growth rate

Churn

Churn is the value of monthly recurring revenue (MRR) from subscribers who leave Xero in a month as a percentage of the total MRR at the start of that month. The percentage provided is the average of the monthly churn for the previous 12 months. Average subscriber lifetime is calculated as one divided by churn

Constant currency (cc)

Constant currency comparisons for revenue are based on average exchange rates for the 12 months ended 31 March 2024. Comparisons for ARPU, AMRR and LTV are based on exchange rates at 31 March 2024

Core accounting revenue

Core accounting revenue comprises subscription based revenue to Xero's cloud-based platform, including any revenue for products that are bundled into subscription plans (such as Hubdoc and Payroll in some regions)

Free cash flow

Free cash flow is defined as cash flows from operating activities less cash flows used for investing activities excluding cash used for acquisitions of, and investments into, businesses and strategic assets

GAAP

Generally accepted accounting principles

Lifetime value (LTV)

LTV is the gross margin expected from a subscriber over the lifetime of that subscriber. This is calculated by taking the average subscriber lifetime (1 divided by churn) multiplied by ARPU, multiplied by the gross margin percentage. Group LTV is calculated as the sum of the individual segment LTVs, multiplied by their respective segment subscribers, divided by total Group subscribers

Liquid resources

Liquid resources comprises cash and cash equivalents, short-term deposits including proceeds from convertible notes, and undrawn committed debt facilities

Operating income

Operating income is a non-GAAP financial measure that has been included to demonstrate the operating performance of the business. Xero defines operating income as total operating revenue less cost of revenue less total operating expenses

Other revenue

Other revenues comprises non-recurring revenues and WorkflowMax. Non-recurring revenues include revenue from events (such as Xerocons and roadshows), and other non-subscription or platform services. WorkflowMax is online workflow and job management software

Platform revenue

Platform revenues include revenue derived from related services, including adjacent products (such as Hubdoc subscriptions on other accounting platforms) and add-ons with incremental revenue (such as Payroll, Projects and Expenses modules), and payments and revenue share agreements with partners

Rule of 40

Rule of 40 is defined as the sum of annual Revenue growth percentage in constant currency and annual Free cash flow margin percentage (Free cash flow as a percentage of revenue)

Subscribers

Subscriber means each unique subscription to a Xero-offered product that is purchased by a user (eg a small business or accounting partner) and which is, or is available to be, deployed. Subscribers that have multiple subscriptions to integrated products on the Xero platform are counted as a single subscriber
