Contract with Compass Group Australia

Constellation Technologies (ASX:CT1) ("the **Company**") is pleased to announce that it has entered into an agreement with leading facilities management company, Compass Group (Australia) Pty Ltd (**Compass Group**) for the supply, installation and ongoing services associated with its Callisto Food Safety & Compliance product suite (FSC suite).

The FSC suite is a groundbreaking integration of hardware and software solutions that is uniquely tailored to automate all food safety & compliance and asset monitoring requirements, including process automation together into one innovative digital platform – providing a comprehensive solution to a problem that has been a challenge in the commercial catering industry for many years.

Equipped with advanced functionalities, the FSC suite revolutionises food safety management by enabling precise temperature and allergen tracking, automating routine processes, and transforming traditional paperwork into a digital format. This innovative approach is delivered through a dynamic TV and mobile app interface, ensuring staff stay constantly informed and ahead of the compliance curve.

Over the past 12 months, the Company has actively collaborated with Compass Group to distribute and conduct trials of the FSC suite at more than a dozen customer sites across Australia, with a targeted focus on remote and isolated locations. As part of this initiative, CT1 has successfully installed and comprehensively tested its equipment at large diverse locations in Western Australia, South Australia, Queensland and the Northern Territory.

Chairman Ray Malone commented, "The signing of the Compass Group Agreement marks the culmination of twelve months of diligent effort by our team and represents a significant advancement in the industry's acceptance of our Callisto Food Safety & Compliance module. We are excited about the opportunity to continue our collaboration with Compass in the years ahead."

The Agreement with Compass Group has an initial term of two years, with no minimum order quantities. This strategic collaboration positions the Company to actively promote the FSC suite to Compass Group's extensive client base, enhancing our market presence and potential revenue streams.

Due to the uniqueness of the FSC suite, the Company is now positioned as a market leader in this food safety & compliance space. It will actively market this leading-edge solution to the entire commercial catering industry.

About Callisto Food Safety & Compliance

The Callisto Food Safety & Compliance (FSC) suite being deployed and utilised by Compass Group is a comprehensive ecosystem of hardware and software designed to meet the operational needs of commercial kitchens.

Built on the foundation of the Company's premier MeridianCT platform, the software enables users to track temperature, humidity and the location of refrigeration or heating units, manage/monitor cooking or freezing processes in real time, monitor over 22 food service allergens, and establish staff tasks and procedures – all on one digital platform

The FSC system introduces an unparalleled combined exception and monitoring system, setting a new industry standard where none existed before.

It delivers real-time monitoring of all processes and procedures directly through an integrated in-kitchen TV or a mobile tablet app—control at your fingertips.

The Company independently designs and produces its monitoring and handheld devices, ensuring they integrate flawlessly with its proprietary Callisto software system for flawless performance.

About Compass Group

Compass Group is a leading food and support services organisation, supporting clients in Australia since 1969. The company engages more than 14,000 employees to operate in more than 700 locations, serving thousands of people every day through food and support services focused on health and wellbeing.

Compass Group's operations are extensive across Australia, including both onshore and offshore facilities and they reflect a diverse client base encompassing schools and universities, venues and leisure facilities, the energy, resources and Defence sectors, hospitals and aged care facilities, airline lounges and feeding thousands of people at work.
