Company Name	WCM Global Growth Limited
Investment Adviser	WCM Investment Management
Inception Date	21 June 2017
Stock Universe	Global (ex-Australia)
Number of Stocks	20 - 40
Management Fee ³	1.25% p.a.
Performance Fee ^{3,4}	10%
Administration Fee ³	0.10% p.a.
Hedging	Unhedged
Typical Cash Allocation	0% - 7%
Benchmark ⁵	MSCI All Country World Index (ex-Australia)

Notes: 1. NTA is calculated after all fees and expenses and incorporates all company assets including WQG's operating bank account. NTA per share is based on WQG's issued capital of 175,706,982 shares as at the date of this report. NTA Before Tax has been reduced by cash payments of income tax liabilities where applicable. 2. Dividends paid in the 12-month period to the date of this report are rounded to two decimal places. 3. Fees are inclusive of GST and less RITC. 4. Performance Fee is 10% (ex-GST) of the Portfolio's outperformance relative to the benchmark after the Management Fee and subject to high water mark. Maximum fee is capped at 0.75% of the closing market value of the Portfolio in each financial year. 5. With gross dividends reinvested reported in Australian dollars and unhedged.

Performance

	1 Month	3 Months	1 Year	3 Years	5 Years	Inception ¹
Portfolio	0.82%	0.29%	25.39%	8.12%	13.65%	14.48%
Benchmark	1.72%	1.67%	20.96%	11.20%	13.28%	12.41%
Value Added ²	-0.90%	-1.38%	4.43%	-3.08%	0.37%	2.07%

Notes: Portfolio return is in AUD and calculated before expenses and taxes and after investment management and performance fees are paid. Performance includes the reinvestment of dividends and income. Periods greater than one year are annualised. 1. Inception date is 21 June 2017. 2. Value added equals portfolio return minus benchmark return.

Regional Market Allocation

Portfolio Update

The portfolio delivered a return of 0.82% during the month, compared with the MSCI All Country World Index (ex-Australia) (the **Benchmark**) return of 1.72%. The portfolio has delivered returns in excess of the Benchmark over one and five years and since inception.

After a weaker month in April, global equity markets resumed their upward trajectory in May. A strong corporate earnings season provided the positive catalyst for markets, more than offsetting some mixed inflation data. While inflation in the US is still at uncomfortably high levels, the trend in Europe is more favourable. These differences are reflected in markets expectations for interest rates, with the European Central Bank forecast to reduce rates in its June meeting but the US Federal Reserve likely to delay any reduction until closer to the calendar year end. At a regional level, developed markets outperformed emerging. In terms of sectors, the better performers included Information Technology, Utilities and Communication Services, with Energy, Health Care and Consumer Staples amongst the laggards. Global factor performance varied across regions. Stock selection was the primary driver of the Strategy's relative underperformance in May. This was most evident in the Information Technology, Financials and Materials sectors of the portfolio. The better performing sectors from a stock selection perspective included Consumer Staples, Industrials and Consumer Discretionary. In terms of sector allocation, the underweight positions in Energy, Real Estate and Consumer Staples added to relative performance. The largest drag on performance relative to the market came from the underweight exposures to Communication Services and Utilities, with above benchmark position in Health Care stocks.

During May, there were several share price driven changes to the strategy's top 10 holdings. Booz Allen Hamilton Holding, a 110-year-old company that develops technologies for critical civil, defence and national security priorities in the US, Arthur J Gallagher, a global insurance broker and risk management firm, and Canadian Pacific Kansas City, a Canadian railway holding company moved into the top 10. These three replaced Entegris, Datadog and Arista Networks each of which remain core holdings in the strategy.

Portfolio construction is an important and often under-rated skill in investment management. This is the process of selecting and weighting securities to achieve the best risk adjusted returns. Achieving the correct level of portfolio diversification is a key part of this process. One level of diversification which the team at WCM monitors is exposure to the three growth 'buckets' of secular, defensive and cyclical. Portfolio holding examples of these buckets include secular (NVIDIA and Amazon.com), defensive (Ferrari and AstraZeneca) and cyclical (General Electric and Old Dominion Freight Line). While some quality growth portfolios focus exclusively on secular and defensive holdings only, WCM's investible universe also includes cyclical companies which meet the team's expanding moat plus aligned corporate culture criteria. This diversification across growth buckets is a key contributor to the Strategy's all-weather characteristics.
