ALLOCATION OF INVESTMENTS

CASH BALANCE AND AVAILABLE FACILITIES

- Cash held short-term with the major banks: \$3.2 million
- Prime broker facilities available: undrawn as at 30 June 2024

OVERVIEW

The TEK pre-tax NTA as at 30 June 2024 was 2.4% lower compared to 31 May 2024. Modest gains by four of TEK's larger portfolio positions, CU6, CXL, CCR and DUG was offset by weakness across some of the smaller portfolio positions as well as a (non-cash related) reduction in the value of the carry-forward tax losses.

CHAIRMAN'S COMMENTS

"Persistently high inflationary data continues to dominate the macroeconomic commentary which has fuelled the debate as to whether further interest rate hikes by the RBA are necessary to reduce inflation to the targeted levels. Whilst there are other economic measures which can influence this decision by the RBA, for now, this issue remains one of the primary factors in the outlook for small and midcap technology stocks equity capital markets performance.

Despite this, Thorney's success has principally come from long term patient investing, and that being the case, we maintain our long term conviction on the small and microcap technology stocks in the TEK portfolio. We believe that the intrinsic value contained within the TEK the portfolio will manifest, including in key positions: CU6, CXL, CCR and DUG.

TEK continues to be active with its on-market share buyback, and, combined with the newly introduced high watermark, is focused on eliminating the persistent share price to NTA discount.

INVESTMENT PHILOSOPHY

TEK seeks to identify early-stage companies with new and disruptive technology and business models, investing in a broad range of areas of technology, such as fin-tech, e-commerce, education, agriculture, medical, telecommunication, robotics and AI.

INVESTMENT OBJECTIVES

- Deploy investment capital into listed and unlisted technology companies
- Producing absolute returns for shareholders over the medium to long-term
