Xprecia Prime deal in India (Revised)

Universal Biosensors, Inc. (ASX: UBI) is pleased to announce it has agreed revised terms with its partner Point of Care Biosystems, Pvt Ltd. (POCB), in India for the sale of Xprecia Prime Systems.

The new deal includes 600 Xprecia Prime units and 55,000 strips to be delivered during H2 2024. The revised deal is estimated to be worth more than \$550,000.

FY2025 estimates received from POCB have been revised upwards. UBI now expect to deliver up to 1,275 Xprecia Devices and 375,000 strips during FY25. The 2025 deal is estimated to be worth more than \$1,250,000

End

About Xprecia Prime™

The Xprecia Prime™ Coagulation Analyzer is Universal Biosensors second generation, new and improved coagulation monitoring device. Xprecia Prime™ fits into your palm; is portable, accurate and easy to use. The device is designed for fast and reliable prothrombin time (PT) results displayed in seconds and International Normalised Ratio (INR). It is used to monitor the dosage of vitamin K antagonists in patients to ensure its safety and efficacy. Dangerous bleeding events can occur if the ideal dosage of the drug is exceeded, while if the dosage is lower than required the patient is at risk of thrombosis. The prothrombin time (PT) test allows physicians to appropriately adjust the patient's dose of the drug to compensate for any diet and lifestyle changes. Globally, approximately 10 million patients are taking warfarin, and over 300 million PT/INR tests are conducted annually to monitor the safe and effective dosage of anticoagulants, representing a major market opportunity for Xprecia Prime™.
