#### About Dart Mining

Dart Mining's (ASX: DTM) aim is to evaluate and develop several historic Lithium prospects and gold fields as well as substantiating a new porphyry province in NE Victoria. The area is prospective for precious, base, and minor metals. These include Lithium, Gold, Silver, Copper, Molybdenum, Zinc, Tungsten, Tin, Tantalum, and a host of other important minerals. Dart Mining has built a strategic gold footprint in the Central and Northeast Region of Victoria where historical surface mining and alluvial gold indicates the existence of potentially significant gold endowment.
