DEFINITIVE FEASIBILITY STUDY² – Base Case US\$1,850/oz

- Post-Tax Free Cashflow of US\$522m over Life-of-Mine
- AISC cost in lowest quartile at US\$977/oz
- Post-Tax - NPV_{7.5} US\$255m and IRR 53%

PEAK FUNDING REQUIREMENT

- US\$54m (DFS) with 13 months payback from completion of construction
- Peak funding substantially reduced at prevailing Gold Price due to higher revenues from production during the 3-year mine development phase
- At a Gold Price (US\$2,200/oz), peak funding reduces to US\$43M

PROJECT FUNDING INITIATIVES

- South African Development Finance Institution (DTI) provided Expression of Interest and Indicative Terms for ZAR300m (~US\$16m) debt package facility with due diligence process substantively completed in June 2024
- Negotiations well advance with a SA commercial bank to participate in a larger syndicated senior debt loan alongside the DFI to fund 50% - 60% of development funding requirements. The bank has begun due diligence and is moving towards approval.
- Having a substantial portion of the funding requirement provided for by a syndicated bank debt facility would provide a strong platform for finalising arrangements for the required balance. The Company continues to engage and negotiate with several other potential sources to complete all required funding for the project.

Bird Reef Central: Uranium & Gold Opportunity

Presence of uranium mineralisation within the Bird Reef sequence provides significant opportunity for the BRC to become a joint gold and uranium operation

BRC Uranium Project has the potential to become a standalone mine with separate infrastructure accessed through the existing Circular Shaft site

Declared JORC Gold Mineral Resource - 1.38Mt Ore at 2.66g/t for 118,000oz⁵

Uranium Exploration Program

- Phase 1 2008 Exploration results³ confirmed consistent uranium mineralisation over approx. 3.3km with more than 7km of strike identified along the targeted Bird Reef section within the WBP's mining right area
- BRC Uranium Exploration Program outlined and aimed at converting the significant Uranium Exploration Target to a JORC compliant Mineral Resource Estimate (MRE) within the Bird Reef Sequence of the WBP
- Uranium Exploration Target is confined to the western margin of the WBP's mining right area and remains open for the approx. 3.75km strike length extension to the east
- 2022 Diamond Drilling results⁶ highlighted by:

Middle Reef (PH1B) - 1.59m depth @ 835ppm U & 1.46g/t Au (85.11m), including 0.96m @ 1,321ppm U & 2.30g/t Au from 85.74m)

White Reef (PH1B) - 1.20m depth @ 108ppm U & 5.45g/t Au (104.61m)
