Director	Meetings held while in office	Meetings attended
Clayton Dodd	4	4
Bevan Wakelam	4	4
Damon O'Meara	4	4
Feiyu Qi	4	3

The Company does not have any committees. Matters usually considered by an audit, remuneration or nomination committee were dealt with by the whole Board during regular Board meetings.

5. PRINCIPAL ACTIVITY

The principal activity of the Group during the course of the financial year was mineral exploration in Australia.

6. OPERATING AND FINANCIAL REVIEW

The Group incurred an after-tax loss for the year of \$797,640 (2023: \$752,726).

As at 30 June 2024, the Group had cash and cash equivalents of \$1,481,221 (30 June 2023: \$3,355,502) and net assets of \$5,071,477 (30 June 2023: \$5,734,735).

Operations:

During the year the Group continued exploration activities within its key exploration projects in Western Australia, including the large 202km² Talga Li-Au tenement package in the East Pilbara Region, the Byro REE-Li Project in the Gascoyne Region and the Yallalong Ni-Cu Project in the Midwest region. The Group has formed a joint venture with Future Metals Limited (ASX:FME) whereby FME is earning-in to the Group's East Kimberly PGE-Ni-Cu project.

On 24 January 2024 the Group announced it had entered into an option agreement to acquire 100% of Byro Mining Pty Ltd, which holds the Byro Sedimentary REE and Lithium project. This agreement provides the Group with 24 months from the date of signing to complete necessary due diligence activities and to obtain all the necessary board, shareholder and regulatory approvals (including shareholder approval under ASX listing rules 10.1 and 10.11 and Chapter 2E of the Corporations Act), while the vendors of the project must keep the project in good standing and debt free. The consideration for the acquisition will comprise the following:

- The reimbursement of vendor expenses of up to a maximum of \$240,000 in cash or a combination of cash and shares (at a deemed price per share equal to the 5-day VWAP of the Company's shares as traded on the ASX prior to completion date)
- The issue of 3,000,000 shares to the vendors
- Upon and subject to the publication of a scoping study, or equivalent higher-level study, by an independent mining-related consultant on the two tenements comprising the Byro project (or either of them individually), the issue to the vendors 2,000,000 shares.
- A granting to the vendors of the Byro project a 1% Net Smelter Royalty.

DIRECTORS' REPORT (CONTINUED)

Corporate:

During the period, the Group and First Au Limited ('FAU') entered into an agreement whereby the Group purchased the remaining 30% interest in the Talga JV, which includes the 20% free carried interest to a decision to mine, held by FAU. Consideration for the acquisition comprised a cash payment of \$200,000; the issue of 1.25million ordinary shares in Octava (subject to 6 months voluntary escrow) and a 0.75% net smelter royalty ("NSR").

During the financial year no other options or performance rights were issued, expired or lapsed unexercised.

Since the end of the financial year, no options or performance rights have been granted and 2,481,260 options have expired.

7. RISK MANAGEMENT

Material business risks

There are inherent risks associated with the exploration for minerals. The Group faces the usual risks encountered by companies engaged in the exploration, evaluation and development of minerals. The Board has delegated the day to day management of risks to the Managing Director. The material business risks for the Group include:

Exploration and development risk

The exploration for and development of mineral deposits involves significant risks that even a combination of careful evaluation, experience and knowledge may not eliminate. While the discovery of an ore body may result in substantial rewards, not all exploration activity will lead to the discovery of economic deposits. Major expenditure may be required to locate and establish Ore Reserves, to establish rights to mine the ground, to receive all necessary operating permits, to develop metallurgical processes and to construct mining and processing facilities at a particular site.

Environmental risks

The Group's operations and projects are subject to the laws and regulations of the jurisdictions in which it has interests and carries on business (Western Australia) regarding environmental compliance and relevant hazards. There is also a risk that the environmental laws and regulations may become more onerous, making the Group's operations more expensive which may adversely affect the financial position and /or performance of the Group. The Directors are not aware of any environmental law that is not being complied with.

The Group may be impacted by climate related risks including reduced water availability, extreme weather events and changes to legislation and regulation in relation to climate.

Government regulations and tenements risks

Changes in law and regulations or government policy may adversely affect the Group's operations. There is no guarantee that current or future exploration claim applications or existing tenement renewals will be granted, that they will be granted without undue delay, or that the Company can economically comply with any conditions imposed on any granted exploration tenements. Loss of tenements may adversely affect the financial position and /or performance of the Group. The Group monitors proposed changes to industry regulations and policies.

In addition to the risks described above, the Group's ability to successfully develop projects is contingent on the Group's ability to fund those projects through debt or equity raisings.

8. DIVIDENDS

No dividends were paid or declared by the Company during the financial year.

9. EVENTS SUBSEQUENT TO BALANCE DATE

On 17 September 2024, the Company announced the expiry of 2,000,000 unquoted options exercisable at \$0.30 on or before 13 September 2024 and 481,260 unquoted options exercisable at \$0.90 on or before 16 September 2024.

Other than the above, there has not been any matter or circumstance that has arisen after balance date that has significantly affected, or may significantly affect, the operations of the Group, the results of those operations, or the state of affairs of the Group in future financial periods.

DIRECTORS' REPORT (CONTINUED)

10. LIKELY DEVELOPMENTS

The Company will continue planning and executing exploration and development work on its existing projects in Australia as well as projects under review in Australia to complement and expand on existing tenement holdings.

11. DIRECTORS' INTERESTS

The relevant interest of each Director in the shares and options of the Company as notified by the Directors to the Australian Securities Exchange in accordance with S205G(1) of the Corporations Act 2001, at the date of this report is as follows:

Director	Ordinary shares	Unlisted options	Performance Rights
Clayton Dodd	-	-	1,000,000
Bevan Wakelam	100,000	-	1,500,000
Damon O'Meara	383,334	300,001	750,000
Feiyu Qi	-	-	-

The above table includes indirect shareholdings held by related parties to the directors.

12. ENVIRONMENTAL REGULATIONS

In the course of its normal mining and exploration activities Octava adheres to environmental regulations imposed on it by the various regulatory authorities, particularly those regulations relating to ground disturbance and the protection of rare and endangered flora and fauna. Octava has complied with all material environmental requirements up to the date of this report. The Board believes that Octava has adequate systems in place for the management of its environmental requirements and is not aware of any breach of these environmental requirements as they apply to it.

13. REMUNERATION REPORT – AUDITED

13.1 Principles of compensation

Remuneration levels for key management personnel and other staff of Octava are competitively set to attract and retain appropriately qualified and experienced personnel and therefore includes a combination of cash paid and the issuance of options and rights. Key management personnel comprise the directors of the Company and senior executives for Octava. Staff remuneration is reviewed annually.

Consequences of performance on shareholder wealth

In establishing performance measures and benchmarks to ensure incentive plans are appropriately structured to align corporate behaviour with the long-term creation of shareholder wealth, the Board has regard for the stage of development of the Company's business, share price, operational and business development achievements (including results of exploration activities) that are of future benefit to the Company. In considering Octava's performance and benefits for shareholder wealth, the Board have regarded the following indices.

	2024	2023 (i)
Loss per share (cents)	(1.69)	(1.93)
Net loss (\$)	(\$797,640)	(\$752,726)
Share price at 30 June	\$0.044	\$0.12

(i) – the Company was admitted to the official list of the ASX on 14 September 2022.

Service contracts

Bevan Wakelam – Managing Director:

The Company entered into an Executive Service agreement with Mr Wakelam on 31 March 2022. An Executive service fee of \$250,000 (including superannuation) per annum is payable with an indefinite term. Either Party can terminate the agreement subject to a three-month notice period. Mr Wakelam is not entitled to any termination payments other than for services rendered at time of termination.

DIRECTORS' REPORT (CONTINUED)

Mark Pitts – Company Secretary

Mr Pitts is a Principal in the Company Secretarial and CFO advisory divisions of the Automic Group providing secretarial support and corporate and compliance advice, pursuant to an engagement agreement with the Company. The agreement has no fixed term with the option of termination by either party with two months' written notice. Mr Pitts is not entitled to any termination payments other than for services rendered at time of termination.

Non-executive directors

Non-executive Directors receive a Directors' fee of up to \$60,000 (inclusive of superannuation benefits as required under the applicable legislation). The Chair receives a fixed annual fee of \$100,000 (inclusive of superannuation benefits as required under the applicable legislation).

The maximum aggregate amount of non-executive Directors' fees payable by the Company as approved by the Company's shareholders is \$300,000 per annum.

Share trading policy

Upon admission to the official list of the ASX, Octava introduced a share trading policy which sets out the circumstances in which directors, executives, employees, and other designated persons may deal with securities held by them in the Company. This includes any shares, or any other securities issued by the Company such as options. The policy includes restriction on key management personnel and other employees from entering into arrangements that limit their exposure to losses that would result from share price decreases. Entering into such arrangements has been prohibited by law since 1 July 2011.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. REPORTING ENTITY

Octava Minerals Limited ("the Company") is a company domiciled in Australia. The Company's registered office is 159 Stirling Highway, Nedlands, Western Australia. The consolidated financial statements of the Company for the financial year ended 30 June 2024 comprises the Company and its subsidiaries (together referred to as "the Group").

The Group is a for profit entity and its principal activity is mineral exploration in Australia.

2. BASIS OF PREPARATION

(a) Statement of compliance

The consolidated financial statements are general purpose financial statements which have been prepared in accordance with Australian Accounting Standards (AASBs) adopted by the Australian Accounting Standards Board (AASB) and the Corporations Act 2001. The consolidated financial statements also comply with International Financial Reporting Standards (IFRS's) adopted by the International Accounting Standards Board (IASB).

The consolidated financial report was authorised for issue by the Directors on 19 September 2024.

(b) Basis of measurement

The financial report is prepared on the historical cost basis except for share based payments and financial assets which are measured at their fair value.

(c) Functional and presentation currency

The financial report is presented in Australian dollars which is the functional and presentation currency of the Company and its subsidiaries.

(d) Use of estimates and judgements

Set out below is information about:

- critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements; and
- assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year.

Critical judgements

i. Going concern

A key assumption underlying the preparation of the financial statements is that the Group will continue as a going concern. An entity is a going concern when it is considered to be able to pay its debts as and when they are due, and to continue in operation without any intention or necessity to liquidate or otherwise wind up its operations. A significant amount of judgement has been required in assessing whether the Group is a going concern, as set out in note 2(f).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2. BASIS OF PREPARATION (continued)

(d) Use of estimates and judgements (continued)

Critical judgements (continued)

ii. Ore Reserves and Mineral Resources

Economically recoverable reserves represent the estimated quantity of product in an area of interest that can be expected to be profitably extracted, processed and sold under current and foreseeable economic conditions. The Group determines and reports ore reserves and mineral resources under the standards incorporated in the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves, 2012 edition (the JORC Code). The determination of ore reserves or mineral resources includes estimates and assumptions about a range of geological, technical and economic factors, including: quantities, grades, production techniques, recovery rates, production costs, transport costs, commodity demand, commodity prices and exchange rates. Changes in ore reserves and mineral resources impact the assessment of recoverability of exploration and evaluation assets, provisions for site restoration and the recognition of deferred tax assets, including tax losses.

iii. Exploration and evaluation assets

Determining the recoverability of exploration and evaluation expenditure capitalised in accordance with the Group's accounting policy (refer note 3(h)), requires estimates and assumptions as to future events and circumstances, in particular, whether successful development and commercial exploitation, or alternatively sale, of the respective areas of interest will be achieved. Critical to this assessment are estimates and assumptions as to ore reserves (refer note 2(d)(ii)), the timing of expected cash flows, exchange rates, commodity prices and future capital requirements. Changes in these estimates and assumptions as new information about the presence or recoverability of an ore reserve becomes available, may impact the assessment of the recoverable amount of exploration and evaluation assets. If, after having capitalised the expenditure under accounting policy note 3(h), a judgement is made that recovery of the expenditure is unlikely, an impairment loss is recorded in the statement of profit and loss and other comprehensive income in accordance with accounting policy note 3(c). The carrying amounts of exploration and evaluation assets are set out in note 11.

iv. Share based payments

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using a valuation model considering the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity. Refer to note 18 for further information.

(e) Adoption of new and revised standards

The Group has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

(f) Going concern

The financial report has been prepared on the going concern basis, which assumes continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business. The Directors believe that the Group will have sufficient working capital to meet its minimum project development and administrative expenses in the next twelve months following the date of signing of the financial report.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

2. BASIS OF PREPARATION (continued)

For the year ended 30 June 2024, the Group has incurred a loss before tax of \$797,640 and net cash outflows from operating and investing activities of \$1,874,281. As at 30 June 2024 the Group had \$1,481,221 in cash and cash equivalents and an excess of working capital of \$1,434,621.

Whilst not immediately required, the Group may need to raise additional funds to meet its planned and budgeted exploration expenditure as well as regular corporate overheads.

The Group's capacity to raise additional funds will be impacted by the success of the ongoing exploration activities and market conditions. Additional sources of funding available to the Group include a capital raising via preferential issues to existing shareholders or placements to new and existing investors. If necessary, the Group can delay exploration expenditure and the directors can also institute cost saving measures to further reduce corporate and administrative costs.

However, should the above planned activities to raise or conserve capital not be successful, there exists a material uncertainty which may cast significant doubt surrounding the Group's ability to continue as a going concern and, therefore, its ability to realise its assets and dispose of its liabilities in the ordinary course of business and at the amounts stated in the financial report.

3. STATEMENT OF MATERIAL ACCOUNTING POLICIES

The Group has consistently applied the accounting policies set out in this note to all periods presented in these consolidated financial statements.

(a) Basis of consolidation

i. Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which control commences until the date on which control ceases.

ii. Transactions eliminated on consolidation

Intragroup balances, and any unrealised gains and losses or income and expenses arising from intragroup transactions, are eliminated in preparing the consolidated financial statements.

(b) Financial instruments

Recognition and derecognition

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument. Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all the risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Classification and initial measurement of financial assets

Financial assets are initially measured at fair value adjusted for transaction costs (where applicable).

For the purpose of subsequent measurement, financial assets, are classified into the following categories:

- amortised cost
- fair value through profit or loss (FVTPL)

The classification is determined by both:

- the entity's business model for managing the financial asset
- the contractual cash flow characteristics of the financial asset.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

3. STATEMENT OF MATERIAL ACCOUNTING POLICIES (continued)

(b) Financial instruments (continued)

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables which is presented within other expenses.

Subsequent measurement of financial assets

Financial assets at amortised cost

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as FVTPL):

- they are held within a business model whose objective is to hold the financial assets to collect its contractual cash flows
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, these are measured at amortised cost using the effective interest method.

Financial assets at fair value through profit or loss (FVTPL)

Financial assets that are held within a different business model other than 'hold to collect' or 'hold to collect and sell' are categorised at fair value through profit and loss. Further, irrespective of business model financial assets whose contractual cash flows are not solely payments of principal and interest are accounted for at FVTPL.

The category also contains an equity investment. The Group accounts for the investment at FVTPL and did not make the irrevocable election to account for the investment in unlisted and listed equity securities at fair value through other comprehensive income (FVOCI). The fair value was determined in line with the requirements of AASB 9, which does not allow for measurement at cost. Assets in this category are measured at fair value with gains or losses recognised in profit or loss. The fair values of financial assets in this category are determined by reference to active market transactions or using a valuation technique where no active market exists.

Classification and measurement of financial liabilities

The Group's financial liabilities include trade and other payables.

Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method.

All interest-related charges that are reported in profit or loss are included within finance costs or finance income.

(c) Impairment

Non-financial assets

The carrying amounts of the Company's non-financial assets, other than deferred tax assets (see accounting policy 3(h)) are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognised in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

3. STATEMENT OF MATERIAL ACCOUNTING POLICIES (continued)

(c) Impairment (continued)

In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(d) Share capital

Ordinary shares

Transaction costs of an equity transaction are accounted for as a deduction from equity, net of any related income tax benefit.

(e) Share based payment transactions

The grant-date fair value of equity-settled share-based payment arrangements granted to employees is generally recognised as an expense, with a corresponding increase in equity, over the vesting period of the awards. The amount recognised as an expense is adjusted to reflect the number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognised is based on the number of awards that meet the related service and non-market performance conditions at the vesting date.

For share-based payment awards with non-vesting conditions, the grant-date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcome.

(f) Income tax

Income tax in the statement of profit and loss and other comprehensive income for the periods presented comprises current and deferred tax. Income tax is recognised in the statement of profit and loss and other comprehensive income except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(g) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors of the Company.

(h) Exploration and evaluation expenditure

Exploration for and evaluation of mineral resources is the search for mineral resources after the Group has obtained legal rights to explore in a specific area, as well as the determination of the technical feasibility and commercial viability of extracting the mineral resources.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

3. STATEMENT OF MATERIAL ACCOUNTING POLICIES (continued)

(h) Exploration and evaluation expenditure (continued)

Accordingly, exploration and evaluation expenditures are those expenditures incurred by the Group in connection with the exploration for and evaluation of minerals resources before the technical feasibility and commercial viability of extracting mineral resources are demonstrable.

Accounting for exploration and evaluation expenditure is assessed separately for each area of interest. An area of interest is an individual geological area which is considered to constitute a favourable environment for the presence of a mineral deposit or has been proved to contain such a deposit.

Expenditure incurred on activities that precede exploration and evaluation of mineral resources, including all expenditure incurred prior to securing legal rights to explore an area, is expensed as incurred.

For each area of interest, the expenditure is recognised as an exploration and evaluation asset where the following conditions are satisfied:

- a) The rights to tenure of the area of interest are current; and
- b) At least one of the following conditions is also met:
 - i. The expenditure is expected to be recouped through successful development and commercial exploitation of an area of interest, or alternatively by its sale; and
 - ii. Exploration and evaluation activities in the area of interest have not, at reporting date, reached a stage which permits a reasonable assessment of the existence or otherwise 'economically recoverable reserves' and active and significant operations in, or in relation to, the area of interest are continuing. Economically recoverable reserves are the estimated quantity of product in an area of interest that can be expected to be profitably extracted, processed and sold under current and foreseeable conditions.

Exploration and evaluation assets include

- Acquisition of rights to explore;
- Topographical, geological, geochemical and geophysical studies;
- Exploratory drilling, trenching, and sampling and
- Activities in relation to evaluating the technical feasibility and commercial viability of extracting the mineral resource.

General and administrative costs are allocated to, and included in, the cost of exploration and evaluation assets only to the extent that those costs can be related directly to the operational activities in the area of interest to which the exploration and evaluation assets relate. In all other instances, these costs are expensed as incurred.

Exploration and evaluation assets are transferred to Development Assets once technical feasibility and commercial viability of an area of interest is demonstrable. Exploration and evaluation assets are assessed for impairment, and any impairment loss is recognised prior to being reclassified.

The carrying amount of the exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective area of interest.

Impairment testing of exploration and evaluation assets

Exploration and evaluation assets are assessed for impairment if sufficient data exists to determine technical feasibility and commercial viability or facts and circumstances suggest that the carrying amount exceeds the recoverable amount. Exploration and evaluation assets are tested for impairment when any of the following facts and circumstances exist:

- The term of exploration licence in the specific area of interest has expired during the reporting period or will expire in the near future, and is not expected to be renewed;
- Substantive expenditure on further exploitation for and evaluation of mineral resources in the specific area are not budgeted or planned;

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

3. STATEMENT OF MATERIAL ACCOUNTING POLICIES (continued)

(h) Exploration and evaluation expenditure (continued)

- Exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the decision was made to discontinue such activities in the specified area; or
- Sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development of by sale.

Where a potential impairment is indicated, an assessment is performed for each cash generating unit which is no larger than the area of interest. The Group performs impairment testing in accordance with accounting policy 3(c).

Farm-in arrangements (in the exploration and evaluation phase)

For exploration and evaluation asset acquisitions (farm-in arrangements) in which the Group has made arrangements to fund a portion of the selling partner's exploration and/or future development expenditures (carried interests), these expenditures are reflected in the financial statements as and when the exploration work progresses.

Farm-out arrangements (in the exploration and evaluation phase)

The Group does not record any expenditure made by the party farming-in on its account. It also does not recognise any gain or loss on its exploration and evaluation farm-out arrangements but redesignates any costs previously capitalised in relation to the whole interest as relating to the partial interest retained.

Monies received pursuant to farm-in agreements are treated as a liability (advanced cash call) on receipt and until such time as the relevant expenditure is incurred.

To be eligible for a rate of 25% (2023: 25%) the Group must satisfy a section of the Income Tax Act that requires no more than 80% of its assessable income to be classified as base-rate passive income. The Group's only source of income is from interest and sundry income and this is regarded as base-rate passive income. Accordingly, the tax rate of 30% has been adopted.

A deferred tax asset has not been recognised with respect to the carry forward of unused tax losses as at this stage it is not probable that future taxable profits will be derived. Income tax losses approximate \$1,022,342 and capital losses approximate \$226,822 as at balance date.

As Rich Well had no assets or liabilities other than the tenements as at the date of acquisition, the acquisition of this subsidiary has not been recognised as a business combination, rather an acquisition of an asset, in accordance with the Group accounting policies. Refer Note 15 for details

{b} – During the current year, the Company paid \$200,000 in cash and issued 1,250,000 to First Au Limited to acquire the remaining interest in the Company's Talga Project. These shares were valued at \$84,000, refer to Note 15 for details.

The ultimate recovery of costs carried forward for exploration and evaluation phases is dependent on the successful development and commercial exploitation or sale of the respective areas of interest at an amount greater than or equal to carrying value. Refer note 3 (h).

Expenses capitalised to Exploration and Evaluation Expenditure assets for the year include direct exploration costs (drilling, rock chip programs and surveys including magnetic and SAM), laboratory costs (assaying, analysis and review), geological and geochemical consultants as well as allocated administration costs (including salary and wages) where those costs can be directly attributed to the exploration or evaluation activities upon a given area of interest.

Exploration costs capitalised with respect to a surrendered tenement were written off.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

17. COMMITMENTS

a) Exploration Expenditure Commitments

In order to maintain current rights of tenure to exploration tenements the Company is required to perform minimum exploration work to meet the minimum expenditure requirements specified by various State Governments within Australia. These obligations may be reset when application for a mining lease is made and at other times. As a result, exploration expenditure commitments beyond twelve months cannot be reliably determined.

These obligations are not provided for in the financial report and are payable:

Joint arrangements

The Group has the following farm-in / farm-out arrangements:

Future Metals – Panton North Farm-In Agreement

During the financial year ended 30 June 2023, the Group entered into an agreement with Future Metals NL (ASX:FME, "FME"), whereby the Group has granted FME the right to acquire up to a 70% interest in the Panton North and Copernicus North tenements owned by the Group. This acquisition is through the sole expenditure by FME on the tenements of \$2 million over 4 years. Once the farm-in is completed, the Group will retain a 30% free-carried interest through to the decision to mine.

As consideration for this agreement, the Group received \$400,000 in FME shares (3,500,000 ordinary shares) during the year ended 30 June 2023 and a further \$200,000 in FME shares (6,674,887 ordinary shares) during the year ended 30 June 2024.

22. SEGMENT INFORMATION

The Group operates in one segment, being mineral exploration in Western Australia.

23. FINANCIAL INSTRUMENTS DISCLOSURES

Overview

The Group has exposure to the following risks from their use of financial instruments:

Credit risk

Liquidity risk

This note presents information about the Group's exposure to each of the above risks, their objectives, policies and processes for measuring and managing risk, and the management of capital.

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework. Management monitors and manages the financial risks relating to the operations of the Group through regular reviews of the risks.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Group's receivables from customers and investment securities.

Trade and other receivables

As the Group operates in the mining exploration sector it does not have significant trade receivables and is therefore not exposed to credit risk in relation to trade receivables. The Group receives advanced cash calls from its farm-in / joint arrangement partner which are classified as liabilities. The cash call amounts are reduced as and when expenditure in terms of the farm-in/ joint arrangement agreement is incurred.

Presently, the Group undertakes exploration and evaluation activities in Australia. At the balance sheet date there were no significant concentrations of credit risk.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Exposure to credit risk

The carrying amount of the Group's financial assets represents the maximum credit exposure. The Group's maximum exposure to credit risk at the reporting date was:

	Note	Carrying amount	
		30 June 2024 Consolidated \$	30 June 2023 Consolidated \$
Trade and other receivables	10	17,545	27,332

Impairment losses

None of the Group's trade and other receivables are past due and impaired (2023: Nil).

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due (refer Note 2(f)). The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group manages liquidity risk by maintaining adequate reserves by continuously monitoring forecast and actual cash flows. Typically, the Group ensures it has sufficient cash on demand to meet expected operational expenses for a period of 90 days, this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

The expected settlement of the Group's financial liabilities is as follows:

	Carrying Amount	Contractual Cash-Flows	< 6 months	6-12 months	1-2 years	2-5 years
Consolidated						
30 June 2024						
Trade and Other Payables	33,257	33,257	33,257	-	-	-

Trade and Other Payables	73,734	73,734	73,734	-	-	-
	73,734	73,734	73,734	-	-	-

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Currency risk

The Group has no exposure to currency risk on investments and transactions that are denominated in a currency other than the respective functional currencies of Group entities. The Group has not entered into any derivative financial instruments to hedge such transactions and anticipated future receipts or payments that are denominated in a foreign currency.

Interest rate risk

The Group is not exposed to interest rate risk on borrowings as it has no borrowings subject to variable interest. The Group is exposed to interest rate risk on its cash balances.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

23. FINANCIAL INSTRUMENTS DISCLOSURES (continued)

Profile

At the reporting date the interest rate profile of the Company's and the Group's interest-bearing financial instruments was:

	Carrying amount	
	30 June 2024	30 June 2023
	Consolidated	Consolidated
	\$	\$
Fixed rate instruments		
Cash and cash equivalents	870,000	2,750,000
Weighted average interest rates	4.85%	4.00%
Variable rate instruments		
Cash and cash equivalents	611,221	605,502
Weighted average interest rates	1.13%	1.32%

Fair value sensitivity analysis for fixed rate instruments

The Group does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect profit or loss or equity (2023: Nil).

Cash flow sensitivity analysis for variable rate instruments

A sensitivity of 50 basis points has been used and considered reasonable given current interest rates. A 0.5% movement in interest rates at the reporting date would have increased equity and profit or loss by the amounts shown below. This analysis assumes that all other variables remain constant. The analysis for 2023 was performed on the same basis.

Consolidated	Loss		Equity	
	50bp increase	50bp decrease	50bp increase	50bp decrease

30 June 2024				
Variable rate instruments	\$3,056	(\$3,056)	\$3,056	(\$3,056)
Company				
30 June 2023				
Variable rate instruments	\$3,028	(\$3,028)	\$3,028	(\$3,028)

Carrying amounts versus fair values

The fair values of financial assets and liabilities materially equates to the carrying amounts shown in the statement of financial position.

	30 June 2024	30 June 2023
	Consolidated	Company
	\$	\$
Financial assets carried at amortised cost

Financial liabilities carried at amortised cost		
Trade and other payables	(33,257)	(73,734)
Employee entitlements	(30,888)	(33,185)

There are no off-balance sheet financial asset and liabilities at year-end.

All financial assets and liabilities were denominated in Australian dollars during the years ended 30 June 2024 and 2023.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

23. FINANCIAL INSTRUMENTS DISCLOSURES (continued)

Fair value risk

The group uses three different methods in estimating the fair value of a financial investment. The methods comprise:

- Level 1 – the fair value is calculated using quoted prices in active markets; and
- Level 2 – the fair value is estimated using inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices)
- Level 3 – the fair value is estimated using inputs other than quoted prices.

Quoted market price represents the fair value determined based on quoted prices on active markets as at the reporting date without any deduction for transaction costs.

The fair value of derivatives that do not have an active market are based on valuation techniques. Level 2 derivatives include market observable inputs whilst level 3 derivatives do not include market observable inputs.

Transfer between categories

There were no transfers between levels during the year.

Other Market Price Risk

Other Equity price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. Investments are managed on an individual basis and material buy and sell decisions are approved by the Board of Directors. The primary goal of the Group's investment strategy is to maximise investment returns.

Commodity Price Risk

The Group operates primarily in the exploration and evaluation phase and accordingly the Group's financial assets and liabilities are subject to minimal commodity price risk at this stage.

The fair value of financial instruments as well as the methods used to estimate the fair value are summarised in the table below.

Consolidated	Quoted Market Price Level 1 \$	Valuation Technique: Market Observable Inputs Level 2 \$	Valuation Technique: Non-market Observable Inputs Level 3 \$	Total \$
30 June 2024				
Equity securities – listed on ASX at quoted prices	193,323	-	-	193,323

	115,500	-	-	115,500

Fair value sensitivity analysis for equity securities (listed investments)

A sensitivity of 10% has been used and considered reasonable given current market rates. A 10% movement in market prices at the reporting date would have increased equity and profit or loss by the amounts shown below. This analysis assumes that all other variables remain constant. The analysis for 2023 was performed on the same basis.

Capital Management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern, so as to maintain a strong capital base sufficient to maintain future exploration and development of its projects. In order to maintain or adjust the capital structure, the Group may return capital to shareholders, issue new shares or sell assets to reduce debt. The Group's focus has been to raise sufficient funds through equity to fund exploration and evaluation activities.

There were no changes in the Group's approach to capital management during the year. Risk management policies and procedures are established with regular monitoring and reporting.

Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements.

INDEPENDENT AUDITOR'S REPORT

To the Members of Octava Minerals Limited

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Octava Minerals Limited ("the Company") and its controlled entities ("the Group"), which comprises the consolidated statement of financial position as at 30 June 2024, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, notes to the financial statements, including material accounting policy information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion, the accompanying financial report of the Group is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the Group's financial position as at 30 June 2024 and of its financial performance for the year then ended; and
- (b) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* ("the Code") that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 2(f) in the financial report, which indicates that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the *Material Uncertainty Related to Going Concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Key Audit Matter	How our audit addressed the key audit matter
Exploration and evaluation expenditure Refer to Note 11	
In accordance with AASB 6 <i>Exploration for and Evaluation of Mineral Resources</i>, the Group capitalises all exploration and evaluation expenditure and as at 30 June 2024 had a deferred exploration and evaluation expenditure balance of \$3,443,533. This included accounting for the acquisition of the remaining interest in the Talga Project for consideration of \$200,000 in cash and the issue of 1,250,000 fully paid ordinary shares with a fair value of \$84,000. Accounting for exploration and evaluation expenditure was determined to be a key audit matter as it is important to the users' understanding of the financial statements as a whole and was an area that involved the most audit effort and communication with those charged with governance.	Our procedures included but were not limited to: - Obtained an understanding of the key processes associated with management's review of the carrying value of exploration and evaluation expenditure; - Considered the Directors' assessment of potential indicators of impairment in addition to making our own assessment; - Obtained evidence that the Group has current rights to tenure of its areas of interest; - Considered the nature and extent of planned ongoing activities; - Ensured that management has correctly applied relevant accounting standards in accounting for the acquisition of the remaining interest in the Talga Project; - Agreed the cash consideration to bank statements and tested the equity component of the consideration with reference to AASB 2 <i>Share-Based Payment</i>; - Substantiated a sample of expenditure by agreeing to supporting documentation; and - Examined the disclosures made in the financial report.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2024, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report, or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Report

The directors of the Company are responsible for the preparation of:

- the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001*; and

- (b) the consolidated entity disclosure statement that is true and correct in accordance with the *Corporations Act 2001*, and

for such internal control as the directors determine is necessary to enable the preparation of:

- (a) the financial report (other than the consolidated entity disclosure statement) that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- (b) the consolidated entity disclosure statement that is true and correct and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON THE REMUNERATION REPORT

Opinion on the Remuneration Report

We have audited the Remuneration Report included within the Directors' Report for the year ended 30 June 2024.

In our opinion, the Remuneration Report of Octava Minerals Limited for the year ended 30 June 2024 complies with Section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with Section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
