## Titomic sells custom cold spray system to University of North Texas for research and industry collaboration.

**Titomic Limited (ASX: TTT) ("Titomic" or "Company")**, the world's leading provider of cold spray solutions, is pleased to announce the sale of a custom Titomic Kinetic Fusion® (TKF) Cold Spray System for approximately AUD 1.1 million to the Center for Agile and Adaptive Additive Manufacturing (CAAAM) at University of North Texas (UNT), a prominent educational and research institution in the United States.

Titomic was chosen from a range of cold spray providers to design and install this specialised system, reflecting the Company's expertise in cold spray system design, specification, and implementation. The System is expected to support UNT's educational objectives, drive advanced research and development initiatives, and enhance collaborations with local industry, reinforcing the institution's role as a hub of innovation in additive manufacturing.

Titomic's partnership with UNT continues our strategic goal to advance our technology with academic institutions across the world. This partnership provides Titomic with increased visibility and validation in the U.S. market, contributing to the Company's expanding footprint and affirming the reliability and effectiveness of Titomic's high-pressure cold spray solutions. UNT joins an esteemed group of U.S. partners, including Triton Systems USA, OMIC R&D, the U.S. Navy's NAVSEA, and a growing list of institutions and organisations utilising Titomic's systems for their high-performance applications.

Titomic remains committed to advancing cold spray technology across the global aerospace, defence, marine, and research sectors and continues to execute its strategic plan to drive long-term growth in these key markets in accordance with SAE International's standard, Cold Spray Additive Manufacturing (CSAM) Process AMS7057. The synergy between academic institutions and industrial applications positions Titomic to be at the forefront of transformative advancements in aerospace, defence, and energy businesses.

### ABOUT TITOMIC LIMITED

Titomic Limited (ASX: TTT) is an Australian public company specialising in large integrated solutions for industrial-scale metal additive manufacturing, using its patented cold spray additive manufacturing (Cold Spray AM) technology. Titomic provides Cold Spray AM solutions, OEM production and R&D services to the global Aerospace, Defence, Shipbuilding, Oil & Gas, Mining and Automotive industries. Titomic also offers global sales and support for all of its Cold Spray AM activities from its Melbourne Head Office, as well as through local presence in the USA and Europe. Titomic delivers competitive advantages in metal additive manufacturing at every stage in the product value chain. For more information, please visit [www.titomic.com](http://www.titomic.com).

### FORWARD LOOKING STATEMENTS

Certain statements made in this release are forward-looking statements and are based on Titomic's current expectations, estimates and projections. Words such as "anticipates", "expects," "intends," "plans," "believes," "seeks," "estimates," "guidance" and similar expressions are intended to identify forward-looking statements. Although Titomic believes the forward-looking statements are based on reasonable assumptions, they are subject to certain risks and uncertainties, some of which are beyond Titomic's control, including those risks or uncertainties inherent in the process of both developing and commercialising technology. As a result, actual results could materially differ from those expressed or forecasted in the forward-looking statements. The forward-looking statements made in this release relate only to events as of the date on which the statements are made. Titomic will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this release except as required by law or by any appropriate regulatory authority.
