	<p>Investigation at Yervas Buenas Project in Chile</p> <p>As announced on 8 July 2024, a fatal accident occurred at the Company's Yervas Buenas Project in Chile. This unfortunate incident is now being investigated by SERNAGEOMIN and the corresponding authorities. The Company is optimistic about the outcome of the investigations .</p> <p>There is the risk that there may be an adverse finding against the Company as a result of the investigations by the relevant authorities. Such findings may have an adverse impact on the Company's relationships with key stakeholders, including governments, regulators, shareholders, customers, joint venture partners, lenders, suppliers and employees. Any deterioration of the Company's relationships with key stakeholders may</p>	Section 7

	have an adverse impact on Company's operations, reputation and financial performance and position. It may also lead to reputational damage.	
	<p>Development Risk/Profitability Risk</p> <p>The Company's commercial viability will be dependent upon the successful development and operation of the Company's projects and any other activity that the Company may undertake. No assurances can be given that the Company will be able to initiate or sustain successful mining operations or continue waste material sales at any of the Company's current tenements or that operations will achieve commercial viability. Equally, no representation as to future profitability or dividends can be given.</p> <p>The Company has commenced the sale of waste material processing and sales operation in Chile. While there is no guarantee that these operations will be successful and that the Company will continue to receive orders for waste material. If the Company was not to receive further orders, then this may have a negative impact on the Company's activities, cash flows and financial performance.</p> <p>The Company notes that the Company has previously undertaken small scale mining approved by the local authorities at the Company's projects. There is no guarantee that these operations will recommence, or that they will be profitable.</p>	Section 7
	<p>Operating risk</p> <p>The nature of exploration, mining and mineral and waste material processing involves hazards which could result in the Company incurring uninsured losses and liabilities to third parties, for example arising from pollution, environmental damage or other damage, injury or death. These could include rock falls, flooding, unfavourable ground conditions or seismic activity. The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve resource estimates, predicted grades in exploration and mining, operational and technical difficulties encountered in mining,</p>	Section 7

	difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increase in the costs of consumables, spare parts, plant and equipment.	
	<p>Tariffs</p> <p>The United States of American has recently announced various tariffs on goods imported into the USA. The scope, implementation and duration of U.S. tariffs – and any retaliatory actions by other countries – remains highly uncertain. There is a risk that tariffs imposed on the Company's products exported to the USA may reduce demand for those products, that may have a negative impact on the Company's operations and financial position.</p>	Section 7
	<p>Reliance on Key Management and Personnel</p> <p>The responsibility of overseeing the day-to-day operations and the strategic management of the Company may be dependent upon the Company's senior management, key personnel and consultants. The Company may lose title to its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments or if it defaults in its obligations to third parties. It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate native title rights exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations, may be adversely affected. The Directors will closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.</p>	
	<p>Leasing Risk</p> <p>As announced on 23 April 2025, the Company has entered into a lease to expand its construction material processing and supply operations in the La Serena/Coquimbo region. Termination of the lease may have a material adverse impact on the Company and its operations.</p>	Section 7
	<p>Access and Infrastructure Risk</p> <p>Access on and to tenements may be subject to the availability of appropriate infrastructure or the consent of third parties. There is no guarantee that agreement can be reached with interested third parties or that the necessary infrastructure required to access or develop the tenements will be available or viable.</p>	Section 7

Other potential issues contributing to uncertainty such as repatriation of income, exploration licensing, environmental protection and government control over mineral properties should also be considered. Potential risk to the Company's activities may occur if there are changes to the political, legal and fiscal systems which might affect the ownership and operation of the Company's interests in Chile. This may also include changes in exchange control systems, expropriation of mining rights, changes in government and in legislative and regulatory regimes.	
	<p>Country Risk</p> <p>The following country specific risks are specifically noted:</p> <ul style="list-style-type: none"> (a) Changes in government policies (b) Economic considerations (c) Legal considerations (d) Local labour laws (e) Foreign investment requirements (f) Timing considerations (g) International operations (Generally) 	Section 7

	<p>Commodity and Currency Price Volatility Risk</p> <p>Commodity prices are subject to influencing factors beyond the control of the Company and can be subject to significant fluctuations. Some of these influencing factors include:</p> <ul style="list-style-type: none"> (a) world demand for particular commodities; (b) the level of production costs in major commodity producing regions; and (c) expectations regarding inflation, interest rates and US dollar exchange rates. <p>Any significant and/or sustained fluctuation in exchange rates or commodity prices could have a materially adverse effect on the Company's operations and financial position.</p>	Section 7
	<p>Environmental Risks</p> <p>Environmental risks are inherent in mining operations. The Company adopts practices which the Company believes are appropriate to minimise the potential of causing environmental damage in all the Company's operations, but no assurance can be made that the Company will not be affected by environmental claims or issues in the future..</p>	Section 7
	<p>Occupational Health and Safety Risk</p> <p>There is an inherent risk of workplace accidents occurring during the conduct of mining activity. 	<p>Production and Cost Estimates Risk</p> <p>By their very nature, production and cost estimates and assumptions are inherently subject to significant uncertainties. Actual results may materially differ from the Company's estimates and assumptions and may materially and adversely affect the Company's commercial viability and future results.</p>	Section 7
	<p>Government and Regulatory Risk</p> <p>There can be no assurance that all of the relevant approvals and permits necessary to conduct mineral exploration or production operations will be granted by the relevant governments and regulatory authorities or that they will remain in good standing where already granted.</p> <p>There is a risk that the Company may not obtain or may lose permits, leases, licences or approvals, essential to our operations.</p> <p>The Company cannot predict how existing, or future laws and regulations may be interpreted by enforcement agencies or court rulings, whether additional laws and regulations will be adopted, or the effect such changes may have on the Company's business or financial condition.</p>	Section 7
	<p>Going Concern Risk</p> <p>As set out in the audit report of the Company's 2024 Annual Report, there is a material uncertainty on the Company to continue as a going concern as a result of the losses in previous financial periods, the net current liabilities and the operating cash outflows.</p> <p>Recent fundraising and operational results in Chile indicate that the Company's operations are progressing and the Directors believe the Company has sufficient resources to effectively execute its business plan as a going concern.</p>	Section 7

4.3. Shortfall

Any New Shares and New Options not applied for by Eligible Shareholders under the Entitlement Offer shall form the Shortfall Securities. Eligible Shareholders can apply for additional New Shares or New Options in excess of their pro rata entitlement (**Shortfall Offer**) by completing the relevant section on their Entitlement and Acceptance Form and specifying the number of additional New Shares (and by implication, New Options) they wish to subscribe for. The issue of any Shortfall Securities under the Shortfall Offer will be dependent on the number of Shortfall

Securities available.

Applications for Shortfall Securities must be accompanied by payment in full for the price of the Shortfall Securities applied for.

Allocation of Shortfall Securities amongst applicants under the Shortfall Offer

The Board presently intends to allocate Shortfall Securities to Eligible Shareholders who apply for an excess of their full Entitlement as determined by the Directors at their discretion, so long as the issue of Shortfall Securities to that Eligible Shareholder would not take their voting power to in excess of 19.99%.

No Shares will be issued to a party under the Shortfall Offer if the effect would be to increase that party's voting power in the Company to an amount greater than 19.99%.

The Company reserves the right to issue an Eligible Shareholder a lesser number of Shortfall Securities than applied for or no Shortfall Securities at all. However, the Directors do not intend to refuse an application for Shortfall Securities from Eligible Shareholders other than in circumstances of oversubscription or where acceptance may result in a breach of the Corporations Act. If the number of Shortfall Securities applied for by Eligible Shareholders exceeds the total number of Shortfall Securities available, the Shortfall Securities will be allocated among applying Eligible Shareholders proportionate to their existing holdings.

All decisions regarding the allocation of Shortfall Securities will be made by the Directors and will be final and binding on all applicants under the Shortfall Offer; as such there is no guarantee that any Shortfall Securities applied for will be issued to Eligible Shareholders.

The Company will have no liability to any Applicant who receives less than the number of Shortfall Securities they applied for under the Shortfall Offer. If the Company scales back any applications for Shortfall Securities under the Shortfall Offer any Application monies will be returned (without interest) as soon as practicable.

The Board reserves the right to place any Shortfall Securities at their discretion within 3 months after the Closing Date at an issue price not less than the price at which the New Shares are offered under the Entitlement Offer.

Takeover law requirements

It is the responsibility of each Eligible Shareholder to ensure that it will not breach the takeovers provisions under the Corporations Act (the 20% threshold) by applying for additional New Shares and New Options under the Shortfall Offer. These provisions are set out in section 606 of the Corporations Act. No Eligible Shareholder will be permitted to acquire additional New Shares and New Options under the Shortfall Offer to the extent the Company considers (acting reasonably) that doing so would result in a contravention of the takeovers limits in section 606 of the Corporations Act.

4.4. No Minimum Subscription

There is no minimum subscription for Eligible Shareholders under the Entitlement Offer.

4.5. Eligibility of Shareholders for the Entitlement Offer

The Entitlement Offer is made only to those Shareholders whose registered address is in Australia or New Zealand as at 7.00pm (AEDT) on the Record Date (**Eligible Shareholders**).

Shareholders whose registered address is not in Australia or New Zealand, or who become registered holders of Shares in the Company after the Record Date, are not eligible to participate in the Entitlement Offer.

An Entitlement and Acceptance Form setting out Eligible Shareholders' Entitlements accompanies the Prospectus distributed to Eligible Shareholders.

Eligible Shareholders who do not take up their Entitlement in full may, as a result of this Entitlement Offer, have their percentage shareholding in the Company diluted.

4.6. Custodians and Nominees

The Entitlement Offer is being made to all Eligible Shareholders. The Company is not required to determine whether or not any Eligible Shareholder is acting as a nominee or the identity or residence of any beneficial owners of Shares.

Where any registered holder that qualifies as an Eligible Shareholder is acting as a nominee for a foreign person, that registered holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Entitlement Offer is compatible with applicable foreign laws.

Any person in the United States or any person that is, or is acting for the account or benefit of a U.S. person with a holding through a nominee may not participate in the Entitlement Offer and the nominee must not take up any Entitlement or send any materials to the United States or to any person that is, or is acting for the account or benefit of, a U.S. Person.

4.7. Eligible Shareholder Entitlements

The Entitlement of each Eligible Shareholder is shown on the personalised Entitlement and Acceptance Form.

4.8. Closing Date and Payment for New Shares

The Closing Date for acceptance of Entitlement and Acceptance Forms is 5:00pm (AEST) on 23 May 2025.

Eligible Shareholders may submit payments for New Shares applied for using EFT or BPAY®. In order to use BPAY®, please follow the instructions set out on the Entitlement and Acceptance Form. If you make payment by BPAY® or EFT, you do not need to return your Entitlement and Acceptance Form.

4.9. Allotment of New Shares and New Options

New Shares and New Options will be allotted and issued in accordance with Listing Rules and indicative timetable as set out in Section 1.2 of this Prospectus. Holding statements for all New Shares and New Options allotted shall be dispatched as soon as practicable in accordance with the Listing Rules after the issue of the New Shares and New Options.

Until the allotment and issue of the New Shares and New Options under this Prospectus, application monies will be held by the Company in trust in a separate bank account maintained for that purpose only. Any interest earned on application monies will be for the benefit of the Company and will be retained by the Company irrespective of whether allotment takes place.

4.10. ASX Quotation

On or within 7 days of the date of this Prospectus the Company will make application for the New Shares issued pursuant to the Entitlement Offer to be granted Official Quotation on the ASX.

There is no guarantee that the Company will be able to fulfil the ASX's requirements in relation to Official Quotation of those New Shares. If so, the New Shares will not be tradeable on ASX.

If ASX does not grant Official Quotation of the New Shares within 3 months after the date of the Prospectus then the New Shares will not be allotted and application monies will be repaid in full without interest.

Quotation of the New Shares on the ASX does not in any way indicate an endorsement by the ASX of the Company, the Company's projects or the New Shares. The ASX takes no responsibility for the contents of this Prospectus.

The Company does not intend that the New Options will be quoted on ASX.

4.11. CHESS System

The Company participates in the Clearing House Electronic Subregister System (**CHESS**). ASX Settlement, a wholly owned subsidiary of ASX, operates CHESS in accordance with the Listing Rules and Securities Clearing House Business Rules.

Under CHESS, Shareholders will not receive certificates for their New Shares but will receive a statement of their holdings indicating the allotment of their New Shares pursuant to their acceptance of the Entitlement Offer made under this Prospectus.

Shareholders who are broker-sponsored will receive a CHESS statement from ASX Settlement.

Shareholders registered under the Issuer Sponsored subregister will receive a statement from Automic.

A CHESS statement or Issuer Sponsored Statement will routinely be sent to Shareholders at the end of any month in which the balance of their shareholding or option-holding changes. Shareholders may also request a statement at any other time, although a charge may be made for this additional service.

4.12. New Zealand Shareholders

The Entitlement Offer is made to Eligible Shareholders with an address in New Zealand, in reliance on the Financial Markets Conduct Act 2013 (New Zealand) and the Financial Markets Conduct (Incidental Offers) Exemption Notice 2021 (New Zealand).

The New Shares are not being offered or sold to the public within New Zealand other than to such Eligible Shareholders.

Neither this Prospectus nor any Offer has been registered, filed with or approved by any New Zealand regulatory authority. This Prospectus is not an investment statement or prospectus under New Zealand law and is not required to, and may not, contain all the information that an investment statement or prospectus under New Zealand law is required to contain.

4.13. Ineligible Shareholders

This Entitlement Offer does not constitute an offer in any place in which, or to any person to whom, it would not be lawful to make such an offer. Shareholders who do not have a registered address in Australia or New Zealand are not eligible to participate in the Entitlement Offer. The laws of jurisdictions outside of Australia and New Zealand may restrict the distribution of this Prospectus. Anyone who comes into possession of this Prospectus outside Australia or New Zealand should seek advice on and observe any such restrictions. A failure to comply with those restrictions may constitute a violation of applicable securities laws.

The Company is of the view that it is unreasonable to extend the Entitlement Offer to Shareholders with registered addresses outside Australia or New Zealand, having regard to:

- the small number of Shareholders with registered addresses outside Australia and New Zealand;
- the number and value of the New Shares which would be offered to ineligible Shareholders (being Ineligible Shareholders); and
- the cost of complying with the legal requirements and requirements of the regulatory authorities, in the respective overseas jurisdictions.

Accordingly, the Entitlement Offer will not be made to Ineligible Shareholders, and this Prospectus will not be sent to those Ineligible Shareholders. In order for a Shareholder to participate in the Entitlement Offer, the Shareholder must be resident in Australia or New Zealand at the Record Date.

In particular, this Prospectus does not constitute an offer for sale of the New Shares or any right to a security into the United States or to U.S. persons. The New Shares have not been, and will not be, registered under the U.S. Securities Act and must not be offered or sold within the United States or to U.S. persons unless they are registered under the U.S. Securities Act or an exemption from the registration required of the U.S. Securities Act is available.

Eligible Shareholders holding Shares on behalf of persons who are resident outside Australia and New Zealand are responsible for ensuring that participation in the Entitlement Offer does not breach regulations in the relevant overseas jurisdiction. Return of a duly completed Entitlement and Acceptance Form or payment by BPAY or EFT will constitute a representation that there has been no breach of such regulations. Shareholders who are nominees are therefore advised to seek independent advice as how they should proceed. Where the Entitlement Offer has been dispatched to a Shareholder domiciled outside Australia or New Zealand and where the country's securities code or legislation prohibits or restricts in any way the making of the Entitlement Offer contemplated by this Prospectus, the Prospectus is provided for information purposes only.

4.14. Costs of participation

No brokerage, commissions or other transaction costs will be payable by Applicants in respect of the Application for, and allotment of, New Shares or New Options under this Prospectus.

4.15. On-sale of Shares previously issued without disclosure

This Prospectus will also remove any trading restrictions that may have been attached to Shares issued by the Company without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date (including prior to the date of this Prospectus). Relevantly, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure to investors if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body;
and
- (b) either:
 - (i) a prospectus is lodged with ASIC on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
 - (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and

the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

SECTION 5 PURPOSE AND EFFECT OF THE OFFERS

The Board may determine to alter the way funds are applied as it considers necessary and appropriate having regard to the circumstances at the time.

Shareholders are strongly urged to read this Prospectus carefully so as to better understand the purpose of the Entitlement Offer, how the funds to be raised under the Entitlement Offer will be applied, the key assumptions involved and the potential impact the new funding will have on the Company's future growth and enterprise value.

The Company will also raise a further \$700,000 if all of the Placement Options are exercised.

Note that no consideration will be received by the Company on the issue of the New Options. There is no certainty that all or some of the New Options will be exercised and consequently no certainty that the Company will receive proceeds from the exercise of the New Options, nor issue additional Shares, on the exercise of the New Options.

(c) **Effect of Offers on Control**

If all Eligible Shareholders take up their full Entitlements, there would be no significant effect on the control of the Company, as the Offer is made pro-rata and in that case no rights would lapse.

As the Company does not propose to apply to ASIC for the approval of the appointment of a nominee for the purposes of section 615 of the Corporations Act, no person will be permitted to acquire New Shares or New Options under the Offers to the extent that such acquisition results in that person holding a relevant interest exceeding 20% of the issued share capital of the Company on a post Offers basis.

SECTION 6 CONSOLIDATED STATEMENT OF FINANCIAL POSITION

Set out below is a pro forma consolidated Statement of Financial Position for the Company and its controlled entities (**Consolidated Entity**) after taking into account the effect of the Offers. This statement is based on the audit reviewed accounts of the Company as at 31 December 2024, lodged with the ASX on 14 March 2025.

The pro forma Consolidated Statement of Financial Position illustrates the effect of the Offers based upon the following assumptions and qualifications:

SECTION 7 RISK FACTORS

This Section identifies the areas the Directors regard as the major risks associated with an investment in the Company. Potential investors should be aware that an investment in the Company, as a mining entity, involves many risks, which may be higher than the risks associated with an investment in other companies. Accordingly, the Shares to be issued under this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those securities (as applicable). Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for securities in the Company.

The following summary, which is not exhaustive, represents some of the major risk factors potential investors need to be aware of as they may in the future materially affect the financial performance of the Company and the value of the Shares to be issued under this Prospectus. Potential investors should read the whole of this Prospectus in order to appreciate such matters and the manner in which the Company intends to operate before any decision is made to apply for the Shares.

There are numerous widespread risks associated with investing in any form of business and with investing in the share market generally. There is also a range of more specific risks associated with the Company's business and its involvement in the exploration and mining industry. These risk factors are largely beyond the control of the Company and its directors because of the nature of the proposed business of the Company.

7.1. Company specific

(a) Investigation at Yerbos Buenas Project in Chile

As announced on 8 July 2024, a fatal accident occurred at the Company's Yerbos Buenas Project in Chile. This unfortunate incident is now being investigated by SERNAGEOMIN and the corresponding authorities. The Company is co-operating fully with this investigation and prior to the fatality had been subject to regular safety reviews by government bodies, none of which highlighted any material safety issues. The Company is optimistic about the outcome of the investigations .

There is the risk that there may be an adverse finding against the Company as a result of the investigations by the relevant authorities. Such findings may have an adverse impact on the Company's relationships with key stakeholders, including governments, regulators, shareholders, customers, joint venture partners, lenders, suppliers and employees. Any deterioration of the Company's relationships with key stakeholders may have an adverse impact on Company's operations, reputation and financial performance and position. It may also lead to reputational damage.

(b) Development Risk/Profitability Risk

The Company's commercial viability will be dependent upon the successful development and operation of the Company's projects and any other activity that the Company may undertake. No assurances can be given that the Company will be able to initiate or sustain successful mining operations or continue waste material sales at any of the Company's current tenements or that operations will achieve commercial viability. Equally, no representation as to future profitability or dividends can be given.

The Company has commenced the sale of waste material processing and sales operation in Chile. While there is no guarantee that these operations will be successful and that the Company will continue to receive orders for waste material. If the Company was not to receive further orders, then this may have a negative impact on the Company's activities, cash flows and financial performance.

The Company notes that the Company has previously undertaken small scale mining approved by the local authorities at the Company's projects. There is no guarantee that these operations will recommence, or that they will be profitable.

(c) Operating risk

The nature of exploration, mining and mineral and waste material processing involves hazards which could result in the Company incurring uninsured losses and liabilities to third parties, for example arising from pollution, environmental damage or other damage, injury or death. These could include rock falls, flooding, unfavourable ground conditions or seismic activity. The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve resource estimates, predicted grades in exploration and mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increase in the costs of consumables, spare parts, plant and equipment.

(d) Tariffs

The United States of American has recently announced various tariffs on goods imported into the USA. The scope, implementation and duration of U.S. tariffs – and any retaliatory actions by other countries – remains highly uncertain. There is a risk that tariffs imposed on the Company's products exported to the USA may reduce demand for those products, that may have a negative impact on the Company's operations and financial position.

(e) Reliance on Key Management and Personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company may be dependent upon the Company's senior management, key personnel and consultants. This includes persons who are located at the Company's projects in Chile. There can be no assurance given that there will be no detrimental impact on the Company if one, or a number of, those employees or consultants cease their employment or engagement with the Company.

(f) Exploration Risk

Exploration for and mining of minerals is highly speculative, and no assurance can be given that production will be obtained from the areas in which the Company has or may acquire an interest, or that production and marketing of any materials discovered by the Company will prove to be economic.

Should a discovery be made, there is no guarantee that it will be commercially viable for a host of factors beyond the Company's control, for example, the economics of mining operations. While the Directors will make every effort to reduce the above risks through their experience in the exploration and mining industry, the fact remains that a commercially viable mineral discovery is very much the exception rather than the rule and success can never be guaranteed. Until the Company is able to realise value from the Company's projects, the Company is likely to incur ongoing operating losses.

In summary, mineral exploration, project development and mining by their nature contain elements of significant risk. Ultimate and continuous success of these activities is dependent on many factors such as:

- (i) the discovery and/or acquisition of economically recoverable resources at the Company's current projects;
- (ii) successful conclusions to bankable feasibility studies;
- (iii) access to adequate capital for project development;
- (iv) design and construction of efficient mining and processing facilities within capital expenditure budgets;
- (v) securing and maintaining title to tenements;
- (vi) obtaining consents and approvals necessary for the conduct of exploration and mining; and
- (vii) access to competent operational management and prudent financial administration, including the availability and reliability of appropriately skilled and experienced employees.

Other factors that could affect the Company's operations include:

- (i) failure to achieve predicted grades in exploration and mining;
- (ii) poor performance levels from external contractors;
- (iii) operational and technical difficulties encountered in mining;
- (iv) difficulties in commissioning and operating plant and equipment;
- (v) availability of suitable plant and expertise from contractors and consultants;
- (vi) mechanical failure or plant breakdown;
- (vii) unanticipated metallurgical problems which may affect extraction rates and costs;
- (viii) adverse weather conditions;
- (ix) industrial and environmental accidents;
- (x) industrial disputes;

- (xi) availability of water and power; and
- (xii) unexpected shortages or increases in the costs of labour, consumables, spare parts, plant and equipment.

Consequently, there can be no assurance that through the projects the Company will be able to develop and commercialise mineral extraction from its tenements and generate positive cashflow to sustain the Company's financial viability.

(g) Tenure and Title Risk

The Company's activities are presently carried out in Chile. Interests in tenements in Chile are governed by legislation and are evidenced by the granting of concession licences. Each licence is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. The Company may lose title to its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments or if it defaults in its obligations to third parties. It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate native title rights exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations, may be adversely affected. The Directors will closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.

(h) Leasing Risk

As announced on 23 April 2025, the Company has entered into a lease to expand its construction material processing and supply operations in the La Serena/Coquimbo region. Whilst the Company has a long term lease in place with the owner of the property, the Company may not be able to comply with the terms of the lease which may result in termination of that lease. Termination of the lease may have a material adverse impact on the Company and its operations.

(i) Access and Infrastructure Risk

Access on and to tenements may be subject to the availability of appropriate infrastructure or the consent of third parties. There is no guarantee that agreement can be reached with interested third parties or that the necessary infrastructure required to access or develop the tenements will be available or viable.

(j) Sovereign Risk

The Company's activities are presently carried out in Chile. As a result, the Company is subject to political, social, economic and other uncertainties including, but not limited to, changes in policies or the personnel administering them, foreign exchange restrictions, changes of law affecting foreign ownership, currency fluctuations, royalties and tax increases in that country. Other potential issues contributing to uncertainty such as repatriation of income, exploration licensing, environmental protection and

government control over mineral properties should also be considered. Potential risk to the Company's activities may occur if there are changes to the political, legal and fiscal systems which might affect the ownership and operation of the Company's interests in Chile. This may also include changes in exchange control systems, expropriation of mining rights, changes in government and in legislative and regulatory regimes.

(k) Country Risk

The following country specific risks are specifically noted:

Changes in government policies

Industry is subject to the policies which are implemented by the relevant governments from time to time. These policies may have a material impact on the business of the Company. These governments may, for instance, withdraw subsidies or forms of preferential treatment such as tax benefits or favourable financing arrangements.

Economic considerations

It is unclear how future economic reforms and macroeconomic measures to be adopted by governments will affect the development of a country's economy. Further, there can be no assurance that such measures will be applied consistently and effectively or that the Company will be subject to such reforms. The business of the Company may be adversely affected by any reform.

Legal considerations

Statutes, regulations and government policies are subject to change from time to time, as is the interpretation of statutes and regulations and the application of policy. Such uncertainties may affect the Company's operations.

Local labour laws

Labour laws in Chile are different to Australia and accordingly employers may be subject to different duties and obligations to their employees than they would if their employees were employed in Australia.

Foreign investment requirements

Many governments have foreign exchange controls which need to be considered as far as repatriation of funds to Australia and elsewhere is concerned. These controls may have an adverse effect on the financial position, financial performance, cash flows, growth prospects, ability to pay dividends and the share price of the Company.

Challenges to the ownership or nature of titles and other rights

The Company may potentially be exposed to challenges to the ownership or nature of titles and other rights by its partners, government authorities or third parties.

Timing considerations

It may take many years to get from a discovery to extraction of an iron, gold or copper ore asset. As such, there is a risk that the initial investment involved in discovery will

not get to the exploitation stage. Such uncertainties as to timing may affect the Company's operations and accordingly its profitability.

International operations (Generally)

International operations are subject to a wide variety of uncertainties: including (but not limited to) political, economic and other risks which may include: terrorism, revolution, border disputes, expropriation, renegotiations or modifications of existing contracts, import, export and transportation regulations and tariffs, taxation policies, including royalty and tax increases and retroactive tax claims, exchange controls, limits on allowable levels of production, currency fluctuations, labour disputes and other uncertainties arising out of foreign government sovereignty over the Company's international operations.

(l) Earthquake

Much of the west coast of Chile, including the Yervas Buenas operation and the city of La Serena where YB's and SPA's operations are based is seismically active with frequent earthquakes and occasional tsunamis. These are not regarded as significant operational risks but some earthquake activity may result in logistical delays.

(m) Resource Estimates Risk

The projects are currently exploration projects. Any resource estimates are expressions of judgment based on knowledge, experience and industry practice, and may require revision on actual production experience. All resources estimates previously disclosed to the market are necessarily imprecise and depend to some extent on statistical inferences, which may prove unreliable or be revised in the light of additional information that comes to hand.

(n) Commodity and Currency Price Volatility Risk

Commodity prices are subject to influencing factors beyond the control of the Company and can be subject to significant fluctuations. Some of these influencing factors include:

- world demand for particular commodities;
- the level of production costs in major commodity producing regions; and
- expectations regarding inflation, interest rates and US dollar exchange rates.

Any significant and/or sustained fluctuation in exchange rates or commodity prices could have a materially adverse effect on the Company's operations and financial position.

Factors affecting commodity prices include:

- supply and demand fluctuations for specific commodities;
- changes in investor sentiment toward specific commodities;
- speculative trading;

- forward selling activities; and
- macro-economic factors such as inflation and interest rates.

(o) Environmental Risks

Environmental risks are inherent in mining operations. The Company adopts practices which the Company believes are appropriate to minimise the potential of causing environmental damage in all the Company's operations, but no assurance can be made that the Company will not be affected by environmental claims or issues in the future.

The Board is strongly committed to conducting operations in an environmentally responsible manner, applying the highest standards and industry best practice to all the Company's field activities. Surface disturbance is kept to a minimum, but where it is necessary, full cognisance is given to the environmental impact of the work to be carried out. Relevant government approvals are obtained and measures are taken to minimise the environmental impact and to ensure that following the activities involved, the land is restored and rehabilitated to as close as possible to its original condition.

(p) Production and Cost Estimates Risk

By their very nature, production and cost estimates and assumptions are inherently subject to significant uncertainties. Actual results may materially differ from the Company's estimates and assumptions and may materially and adversely affect the Company's commercial viability and future results.

(q) Occupational Health and Safety Risk

There is an inherent risk of workplace accidents occurring during the conduct of mining activity. The Board is totally committed to providing a safe and healthy workplace for the Company's employees and contractors, where engaged from time to time. Hazardous activities are avoided wherever possible, but when necessary, all employees and contractors are required to conduct themselves in accordance with all applicable laws and policies in force from time to time in respect of occupational health and safety.

(r) Government and Regulatory Risk

There can be no assurance that all of the relevant approvals and permits necessary to conduct mineral exploration or production operations will be granted by the relevant governments and regulatory authorities or that they will remain in good standing where already granted.

The Company's activities will require compliance with various laws relating to the protection and rehabilitation of the environment, health and safety, culture and heritage and other matters.

In addition, the Company is required to obtain numerous government permits, leases, licences and approvals in respect of our exploration and mining operations.

There is a risk that the Company may not obtain or may lose permits, leases, licences or approvals, essential to our operations.

The Company cannot predict how existing, or future laws and regulations may be interpreted by enforcement agencies or court rulings, whether additional laws and regulations will be adopted, or the effect such changes may have on the Company's business or financial condition.

(s) Uninsured Loss and Liability Risk

Exploration for and development of minerals involves hazards and risks that could result in the Company incurring losses and liabilities to third parties. There is a risk that the Company may not be insured against all losses or liabilities that could arise from the Company's operations. If the Company incurs losses or liabilities which are not covered by the Company's insurance policies, the funds available for exploration and development will be reduced and the value and/or tenure of the Company's assets may be at risk.

(t) New Project Risk

To achieve the Company's objectives, the Company may acquire or invest in new projects from time to time. However, there is always risk that the Company may not be successful in negotiating for an acquisition of a new project.

(u) Litigation Risk

In the ordinary course of business, the Company may be involved in litigation disputes from time to time. Litigation disputes brought by third parties including, but not limited to customers, suppliers, business partners, employees and government bodies may adversely impact the financial performance and industry standing of the business, in the case where the impact of legal proceedings is greater than or outside the scope of the Company's insurance. Such litigation could negatively impact the industry standing of the Company, cause the Company to incur unforeseen expenses, occupy a significant amount of management's time and attention and could negatively affect the Company's business operations and financial position.

The Directors are otherwise not aware of any material legal proceedings pending or threatened against or affecting the Company.

(v) Future Capital Requirement Risk

The Company's ongoing activities will require ongoing expenditures. There can be no guarantee that the funds raised by the Company under the Offers and other capital raisings will be sufficient to successfully achieve all the objectives of the Company's overall business strategy. If the Company is unable to continue to use equity to fund expansion after the substantial exhaustion of the Company's existing funds, there can be no assurances that the Company will have sufficient capital resources for that purpose, or other purposes, or that it will be able to obtain additional funds on terms acceptable to the Company or at all. Any additional equity financing may be dilutive to Shareholders and any debt financing if available may involve restrictive covenants, which may limit the Company's operations and business strategy. The Company's failure

to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.

(w) Going Concern Risk

As set out in the audit report of the Company's 2024 Annual Report, there is a material uncertainty on the Company to continue as a going concern as a result of the losses in previous financial periods, the net current liabilities and the operating cash outflows.

The events and conditions, including the losses in previous financial periods, indicate the existence of a material uncertainty that may cast some doubt about the Company's ability to continue as a going concern and therefore the Company may be unable to realise its assets and discharge its liabilities in the normal course of business at amounts stated in the financial General Risks.

Recent fundraising and operational results in Chile indicate that the Company's operations are progressing and the Directors believe the Company has sufficient resources to effectively execute its business plan as a going concern.

(x) Economic Risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and future production activities, as well as on its ability to fund those activities.

(y) Currency Fluctuations

The future value of Shares may fluctuate in accordance with movements in foreign currency exchange rates.

(z) Taxation

The Company's profitability may be affected by changes in government taxation laws and policies, including royalties payable in respect of any future mining operations, in the jurisdictions in which the Company operates.

There may be tax implications arising from the acquisition of securities in the Company, any possible receipt of dividends (both franked and un-franked) and the disposal of securities in the Company (as appropriate). Investors should carefully consider these tax implications and if uncertain as to the relevant taxation issues, obtain further advice from a qualified professional adviser. Tax liabilities are the responsibility of each individual investor and neither the Directors nor the Company will be responsible for any tax or related penalties incurred by investors.

(aa) Stock Market Risks

The market price of the Shares may be significantly adversely affected by a variety of factors including (but not limited to) perceptions of, or variations in, general market conditions, operating performance, commodity prices, project and country risk, Board and management strength and expertise and a broad range of other factors which may or may not relate to the Company's operations.

(bb) Quotation of Shares

Whilst the Company intends to apply for Quotation of the Shares, there is no guarantee that the Company will be able to fulfil the ASX's requirements in relation to Quotation of those Shares. If so, the Shares proposed to be issued under this Prospectus will not be tradeable on ASX.

(cc) Geopolitical

Politics on a global, regional or local scale could impact the Company's operations and financial position. Acts of terrorism or outbreak of war may disrupt or prevent the Company from undertaking its operations and intended programs.

(dd) Natural Disasters

Natural disasters or adverse conditions may occur in those geographical areas in which the Company operates including severe weather, tsunamis, cyclones, tropical storms, earthquakes, floods, volcanic eruptions, excessive rainfall and droughts as well as power outages or other events beyond the control of the Company.

(ee) Force Majeure

The Company and its projects, now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, extreme weather conditions, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(ff) Ukraine Conflict and Gaza Conflict

The current conflict between Ukraine and Russia (**Ukraine Conflict**) and Israel and Gaza (**Gaza Conflict**) is impacting global economies and financial markets. The nature and extent of the effect the Ukraine Conflict and the Gaza Conflict may have on the Company's operations remains uncertain at this time. In the short to medium term, the Company's Share price may be adversely affected by the economic uncertainty caused by the Ukraine Conflict, the Gaza Conflict and the wider effect the conflict has on global economies and financial markets.

The Directors are monitoring the potential secondary and tertiary macroeconomics impacts of the Ukraine Conflict and the Gaza Conflict, including the fluctuations in commodity and energy prices and the potential risk of cyber activity impacting governments and businesses. Further, any governmental or industry measures taken in response to the Ukraine Conflict and the Gaza Conflict, including limitations on travel and changes to import/export restrictions and arrangements involving Russia, may be adversely impact the Company's operations and are likely to be beyond the control of the Company.

(gg) Other Risk Factors

There are risks involved with any investment in listed securities. The value of the Company's securities may rise or fall depending upon a range of factors and security

conditions which are unrelated to the Company's future financial performance. Share market conditions are affected by many factors including, but not limited to:

- economic conditions both in Australia and internationally;
- investor sentiment and local and international share market conditions;
- changes in interest rates and the rate of inflation;
- changes in metal and commodity prices;
- changes to government regulation, policy or legislation;
- changes in exchange rates; and
- the nature of competition in the industry in which the Company operates.

Some of these risks can be mitigated by the use of contingency plans and safeguards. However, many are outside the control of the Company and cannot be mitigated.

Like all businesses, the Company is affected by general economic conditions including the level of interest rates, inflation and consumer spending. Any prolonged downturn in economic activity could be expected to have a negative impact on the Company. As a company having a smaller market capitalisation, the market in the Company's securities may suffer periods of illiquidity.

Other risk factors include those normally found in conducting business including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the Company's business or trade.

Before any decision is made to subscribe for securities in the Company, the above matters, and all other matters described in this document must be carefully considered. The Shares to be allotted pursuant to this Prospectus should be regarded as speculative in nature and carry no guarantee with respect to the payment of dividends, return of capital or their market value.

Investment in the Company is regarded as speculative and neither the Company nor any of its Directors guarantee that any specific objective of the Company will be achieved or that any particular performance of the Company or its securities, including the Shares offered by this Prospectus, will be achieved.

7.2. Speculative investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Prospectus.

Therefore, the Shares to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Shares pursuant to this Prospectus.

8.1. Rights attaching to the Shares

The following is a general description of the more significant rights and liabilities attaching to the Shares. This summary is not exhaustive. - (iii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the New Options.

9.1. The Company is a Disclosing Entity

The Company is a disclosing entity for the purposes of the Corporations Act and, as such, is subject to regular reporting and disclosure requirements. As a listed company, the Company is required to comply with all applicable continuous disclosure and reporting requirements in the Listing Rules.

9.2. Section 713 Prospectus

This Prospectus has been issued under the provisions of section 713 of the Corporations Act. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospectus of the issuing company. Accordingly, this Prospectus does not contain the same level of disclosure as a prospectus of an unlisted company or an initial public offering prospectus.

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that the Company has complied with the general and specific requirements of ASX as applicable from time to time throughout the 12 months before the date of this Prospectus which required the Company to notify ASX of information about specified events or matters as they

arise for the purpose of ASX making that information available to the stock market conducted by ASX.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company. Information that is already in the public domain has not been reported in this Prospectus, other than that which is considered necessary to make the Prospectus complete.
