March Quarter Update | 24 April 2025

Grant Hackett OAM
Group Chief Executive Officer | Generation Development Group

Generation Development Group (ASX:GDG) delivered a strong performance in the March quarter, with all businesses contributing to growth despite continued market volatility. The Group remains well-positioned with a robust financial profile, strong net inflows, and clear strategic momentum.

Following the successful acquisition of Evidentia Group, GDG is now the market leader across all segments of the managed accounts sector. The newly combined¹ Evidentia Group funds under management (FUM) increased from \$25.4bn in December to \$26.8bn in March, with Lonsec Investment Solutions contributing \$13.3bn in FUM — up 28% on previous corresponding period (PCP) — and net inflows of \$685m, representing a **year-on-year increase of over 325%**. The integration of Lonsec Investment Solutions, Implemented Portfolios and Evidentia is progressing to plan, with key milestones being met. Evidentia Managed Accounts continues to win more client mandates, ensuring a healthy FY26 pipeline of committed inflows.

Generation Life further strengthened its leadership in the investment bonds market, **reaching \$3.95bn in FUM, up 23% on PCP**, and achieving **record quarterly inflows of \$239m or up 55%**.

Lonsec Research and Ratings also delivered a strong result, with revenue up materially over prior period, supported by growth in private markets, equity, and income research activity.

Each of our businesses are strategically positioned to benefit from long-term industry tailwinds, and we remain focused on executing our growth agenda.

In closing, we are incredibly proud to have reached the milestone of **becoming an ASX 200 company** — this is a strong reflection of the sustained growth, strategic focus, and disciplined execution that have defined GDG in recent years. On behalf of the leadership team and GDG Board, I extend our sincere thanks to our shareholders, staff, and clients for their continued belief in our vision. Most importantly, congratulations to our exceptional team whose unwavering commitment have made this achievement possible. We look forward to building on this momentum and continuing to deliver outstanding performance in the years ahead.

Michael Wright
Chief Executive Officer | Evidentia Group

With the recent successful acquisition of Evidentia Group, Generation Development Group has solidified its position as the undisputed market leader in every category of the fast-growing managed accounts market.

As at the end of December 2024, Evidentia Group held⁵ **\$25.4bn in FUM**. By 31st March, this has grown to **\$26.8bn**, driven by strong inflows despite challenging market conditions.”

Combined Evidentia Group⁴

The integration of the Lonsec Investment Solutions, Evidentia and Implemented Portfolios business units is progressing well, with the new Evidentia Group operating model agreed and now in the implementation phase. As business integration progresses, further FUM updates will be provided on a combined basis.

Lorraine Robinson
Chief Executive Officer | Lonsec Research & Ratings

Revenue in the managed fund research business grew strongly in the March quarter, with the outstanding result driven by ongoing strength in the pipeline of new investment products brought to market.

While the expansion in private markets products underpinned the growth, pleasingly there were also a number of new funds across real assets, equities and income. Financial market conditions do impact the number of new products brought to market by fund managers, but the research product pipeline and the momentum in new product growth remains solid.”

Key highlights

Recently launched products including the Lonsec Research Logos and the In the Spotlight video series continue to build good traction in the market and are enhancing engagement with fund managers.

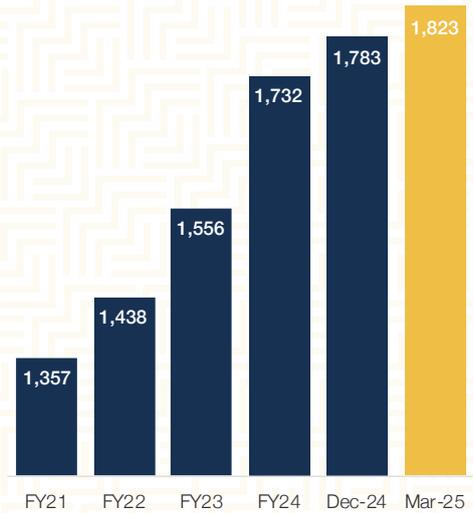

SuperRatings launched a new comparison tool for super funds during the quarter and enhanced an existing solution to help super funds and advisers meet best practice as outlined by ASIC Report 779. These new solutions are driving sales growth to existing customers, resulting in substantial uplift in average revenue per active customer.
