

ASX Announcement 19 May 2025

Elsight selected for elite Northrop Grumman – FedTech Accelerator Program

Key Highlights:

- Elite selection: Only 8 companies selected from over 225 applicants (a ~3.5% acceptance rate)
- Direct integration and access to Northrop Grumman's technical and procurement teams
- Fast-track to U.S. DoD-funded pilots, investor access, and strategic contracts.

Elsight Limited (ASX: ELS), a leading provider of carrier-agnostic connectivity solutions, is pleased to announce its selection as **one of only eight companies worldwide** for the prestigious 2025 Northrop Grumman Technology Accelerator, delivered by U.S. venture-builder FedTech. Over 225 companies applied, reflecting the program's competitiveness and the strategic importance of Elsight's Halo platform in high-demand defense applications. Notably, in this elite group, **Elsight is the only company specializing in communication and carrier-agnostic connectivity solutions within the selected group**.

This prestigious program provides a fast-track opportunity to collaborate directly with Northrop Grumman, one of the world's top 5 largest defence contractors, opening significant doors within the U.S. defense ecosystem. Over the next 11 weeks, participating companies will receive mentorship, education, and business development support from Northrop Grumman and FedTech.

Strengthening ties with Northrop Grumman, and through them with the U.S. Department of Defense (DoD), marks a critical strategic milestone for Elsight's expansion into the U.S. defense sector.

According to SIPRI¹, U.S. military expenditure represented approximately 37% of total global military spending in 2024, amounting to USD 997 billion out of a global USD 2.7 trillion.

Strategic Significance for Elsight

Participation in this accelerator provides Elsight with direct access to Northrop Grumman's platform teams and broader engagement within the U.S. defense ecosystem.

"Being hand-picked from over 225 applicants validates the mission-critical reliability of our Halo architecture," said Elsight CEO Yoav Amitai. "We look forward to translating this opportunity into tangible growth for our shareholders."

Authorised for release by the Board of Directors of Elsight Limited.

About Elsight (ASX:ELS)

Elsight's (www.elsight.com) flagship product, the Halo, uses Al-based multi-link bonding to provide the most robust connectivity for drones and other unmanned systems. By adding cellular communications aggregated with satellite and RF communications, the Halo is 99.99% reliable and cyber secured. With options for less than a 100-gram card or a boxed ground version, the Halo provides continuous connectivity even in the most challenging areas for stationary, portable, or actively mobile situational requirements. Elsight's products serve many vertical markets leveraging UAV and UAS technologies including the military, HLS, public safety, delivery, medical, oil and gas, utilities, inspections, surveillance and others. Elsight was founded in 2009.
