About Southern Cross Gold Consolidated Ltd. (TSXV: SXGC) (ASX: SX2)

Southern Cross Gold Consolidated Ltd. (TSXV: SXGC, ASX: SX2) controls the Sunday Creek Gold-Antimony Project located 60 km north of Melbourne, Australia (the "Sunday Creek"). Sunday Creek has emerged as one of the Western world's most significant gold and antimony discoveries, with exceptional drilling results from just 77 km of drilling. The mineralization follows a "Golden Ladder" structure over 12 km of strike length, with confirmed continuity from surface to 1,100 m depth.

Sunday Creek's strategic value is enhanced by its dual-metal profile, with antimony contributing 20% of the in-situ value alongside gold. This has gained increased significance following China's export restrictions on antimony, a critical metal for defence and semiconductor applications. Southern Cross' inclusion in the US Defense Industrial Base Consortium (DIBC) and Australia's AUKUS-related legislative changes position it as a potential key Western antimony supplier. Importantly, Sunday Creek can be developed primarily based on gold economics, which reduces antimony-related risks while maintaining strategic supply potential.

Technical fundamentals further strengthen the project, with preliminary metallurgical work showing non-refractory mineralization suitable for conventional processing.

With over 1,000 Ha of strategic freehold land ownership, and a large 60 km drill program planned through Q3 2025, SXGC is well-positioned to advance this globally significant gold-antimony discovery in a tier-one jurisdiction.
