

Weebit Nano quadruples revenue to \$4.4 million

27 August 2025 – Weebit Nano Ltd (**ASX: WBT, Weebit**), a leading developer and licensor of advanced memory technologies for the global semiconductor industry, has delivered revenue of \$4.4 million in FY25 – a 300% increase on the prior corresponding period.

Revenues comprised IP licensing and Non-Recurring Engineering fees for its embedded ReRAM Non-Volatile Memory (NVM) technology. Weebit Nano currently has IP licensing agreements with three fabs and a design agreement with one product company.

Weebit Nano CEO, Coby Hanoch, said: “Our strong revenue growth over the past year reflects our continued commercial progress, including signing an agreement with Tier-1 Integrated Device Manufacturer (IDM) onsemi, and progressing towards qualification with leading foundry DB HiTek. We expect revenues to steadily increase over the coming year as we sign additional licensing agreements with foundries and IDMs as well as new design agreements with product companies.”

About Weebit Nano Limited

Weebit Nano Ltd. is a leading developer and licensor of advanced semiconductor memory technology. The company's ground-breaking Resistive RAM (ReRAM) addresses the growing need for significantly higher performance and lower power memory solutions in a range of new electronic products such as Internet of Things (IoT) devices, smartphones, robotics, autonomous vehicles, 5G communications and artificial intelligence.

Weebit's ReRAM allows semiconductor memory elements to be significantly faster, less expensive, more reliable and more energy efficient than those using existing flash memory solutions. As it is based on fab-friendly materials, Weebit ReRAM can be integrated within existing flows and processes faster and easier than other emerging technologies, without requiring special equipment or large investments.
