Quantum Computing Launch propels Next-Gen Intelligence Forward

Sydney, September 19 2025, NoviqTech Limited (ASX: NVQ) is pleased to announce the successful beta launch of Quantum Intelligence Pty Ltd's (QI) first two products – QI Provenance and QI AI. This milestone marks the first step in bringing NoviqTech's global-first hybrid quantum-classical ecosystem into the hands of enterprises, building on the momentum of July's launch of Quantum Intelligence Pty Ltd.

Key Highlights

- **QI Provenance Open:** Now live as a self-serve service, available under a flexible subscription model.

- **QI AI Available:** Accessible via request-only access during controlled rollout.

- **Market-Ready Self-Service Offering:** Enterprises and developers can access and configure QI Provenance directly via APIs, while QI AI is available as a SaaS solution, with API access planned for full launch.

- **Flexible commercial model:** Tiered subscriptions with Stripe-powered billing, plus a limited sandbox environment for testing.

- **Next Milestone:** Release of the NVIDIA CUDA-Q–enhanced QI Platform for quantum-classical acceleration. Powered by NVIDIA CUDA-Q, the platform accelerates hybrid quantum classical computing, by up to 10x, enabling high performance execution of computationally intensive tasks without requiring dedicated quantum hardware.

Beta Launch Success

The September beta launch demonstrates NoviqTech's progress in delivering market-ready, enterprise-grade quantum solutions. QI Provenance and QI AI are now accessible to the market with a self-serve architecture, businesses can begin experimenting immediately, embedding verifiable trust and AI-driven intelligence into their systems.

QI Provenance – Now LIVE

QI Provenance enables tamper-proof digital credentials and asset provenance through a simple API, empowering businesses to embed verifiable trust into their systems. Blockchain-backed verification allows the issuance of secure documents, multimedia content, and video assets, while tracking asset origin, changes, and ownership.

As a self-service platform with Stripe-powered billing, businesses can subscribe, scale, and manage usage seamlessly. RESTful APIs, a Python library, and white-label options make integration fast and frictionless. This flexible model ensures accessibility for startups through

to large-scale global operators. A limited sandbox environment is also available for testing purposes only, giving developers the ability to trial integrations before moving into production.

QI AI – Request-Only Access

QI AI (AI-as-a-Service), a modular enterprise assistant for natural language interaction, multilingual communication, compliance alerts, and blockchain-backed transparency, is now in controlled release via request-only access. This phased approach allows NoviqTech to validate use cases and ensure robustness ahead of a wider rollout later this year.

What's Next for the Quantum Future

The next major milestone will be the launch of the Quantum Intelligence Platform (QI Platform), powered by NVIDIA CUDA-Q hybrid acceleration. This will enable enterprises to achieve up to 10x performance gains in optimisation, machine learning, and cryptography workloads – without requiring costly on-premises quantum hardware.

Freddy El Turk, CEO of NoviqTech said

"This beta launch is the first tangible delivery on our July announcement. With QI Provenance now commercially open and QI AI available by request, we are taking the first step in making verifiable trust and quantum-enhanced AI accessible to enterprises worldwide. The upcoming release of the CUDA-Q–powered QI Platform later this year will only accelerate this momentum."

With QI Provenance and QI AI live, and the CUDA-Q–enhanced QI Platform on the horizon, NoviqTech continues to position itself at the forefront of trusted, intelligent, and quantum-ready solutions for the digital economy.

Authorised by the NoviqTech Board of Directors.

About NoviqTech

NoviqTech (ASX: NVQ) harnesses the power of artificial intelligence and distributed ledger technology to provide trusted and transparent reporting across supply chains, carbon emissions reporting, and Guarantee of Origin. The NoviqTech brands – NoviqAI and Carbon Central, deliver novel and innovative technologies to organisations across the globe in sectors from maritime to regenerative agriculture, empowering them to make more informed decisions, track their carbon emissions with precision, and validate the authenticity of their products origins all in real-time.
