

New Options – Close of Offer Period

Monday 28 July 2014: Environmental Clean Technologies Limited (ECT or Company) (ASX:ESI) advises that its New Options (ESIOA) Offer closed at 5.00pm, Friday 25 July 2014.

Applications received prior to Offer close will be reconciled against cleared funds received over the coming days.

Following reconciliation and receipt of final reports from the Registry the Company will assess the final position of the Offer and provide further updates.

Subject to ASX approval, the allotment and issue of ESIOA options validly subscribed for under the Offer is currently scheduled to occur on Wednesday 6 August 2014, with trading to commence on Thursday 7 August 2014.

About ECT

ECT is in the business of commercialising leading-edge coal and iron making technologies, which are capable of delivering financial and environmental benefits.

We are focused on advancing a portfolio of technologies, which have significant market potential globally.

ECT's business plan is to pragmatically commercialise these technologies and secure sustainable, profitable income streams through licencing and other commercial mechanisms.

About Coldry

When applied to lignite and some sub-bituminous coals, the relatively simple Coldry beneficiation process produces a black coal equivalent (BCE) in the form of pellets. Coldry pellets have equal or superior energy value to many black coals and produce lower CO₂ emissions than raw lignite.

About MATMOR

The MATMOR process has the potential to revolutionise primary iron making.

MATMOR is a simple, low cost, low emission, production technology, utilising the patented MATMOR retort, which enables the use of cheaper feedstocks to produce primary iron.
