

**Update on Dargues Gold Mine and future  
exploration plans**

**Mining NSW Conference**

**27 August 2014**

**Unity Mining Limited**

# Disclaimer

This presentation has been prepared by Unity Mining Limited (“Company”). The material contained in this presentation has been prepared for information purposes only, and is not an offer, invitation or recommendation for subscription or purchase of securities in the Company.

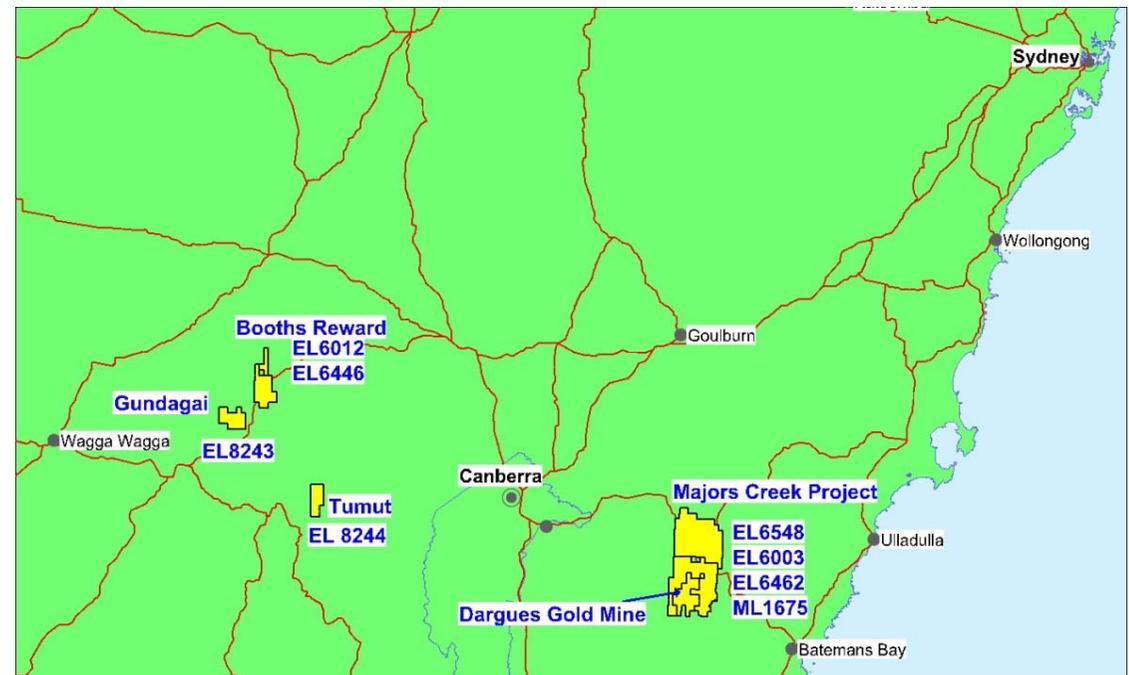

This presentation may contain certain forward-looking statements regarding (i) estimated resources and reserves, (ii) planned production and operating costs profiles, (iii) planned capital requirements and (iv) plans, strategies and corporate objectives. Such forward looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Unity Mining Limited.

The forward looking statements are inherently uncertain and may therefore differ materially from results ultimately achieved. External and other factors may impact the Company and affect the forward-looking statements in this release since its preparation. Subject to applicable law and stock exchange listing rules, Unity Mining does not intend to publicly update any of the forward-looking statements or any assumptions on which any such forward-looking statement is made.

The Company estimates its Mineral Resources and Ore Reserves in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves, 2012 Edition (“JORC Code”), which governs such disclosures by companies listed on the Australian Securities Exchange.

# Outline

- Dargues Gold Mine update
- Majors Creek Project Exploration
  - Dargues Reef
  - Near Mine Exploration
  - Regional Exploration
- Booths Reward
- Conclusion

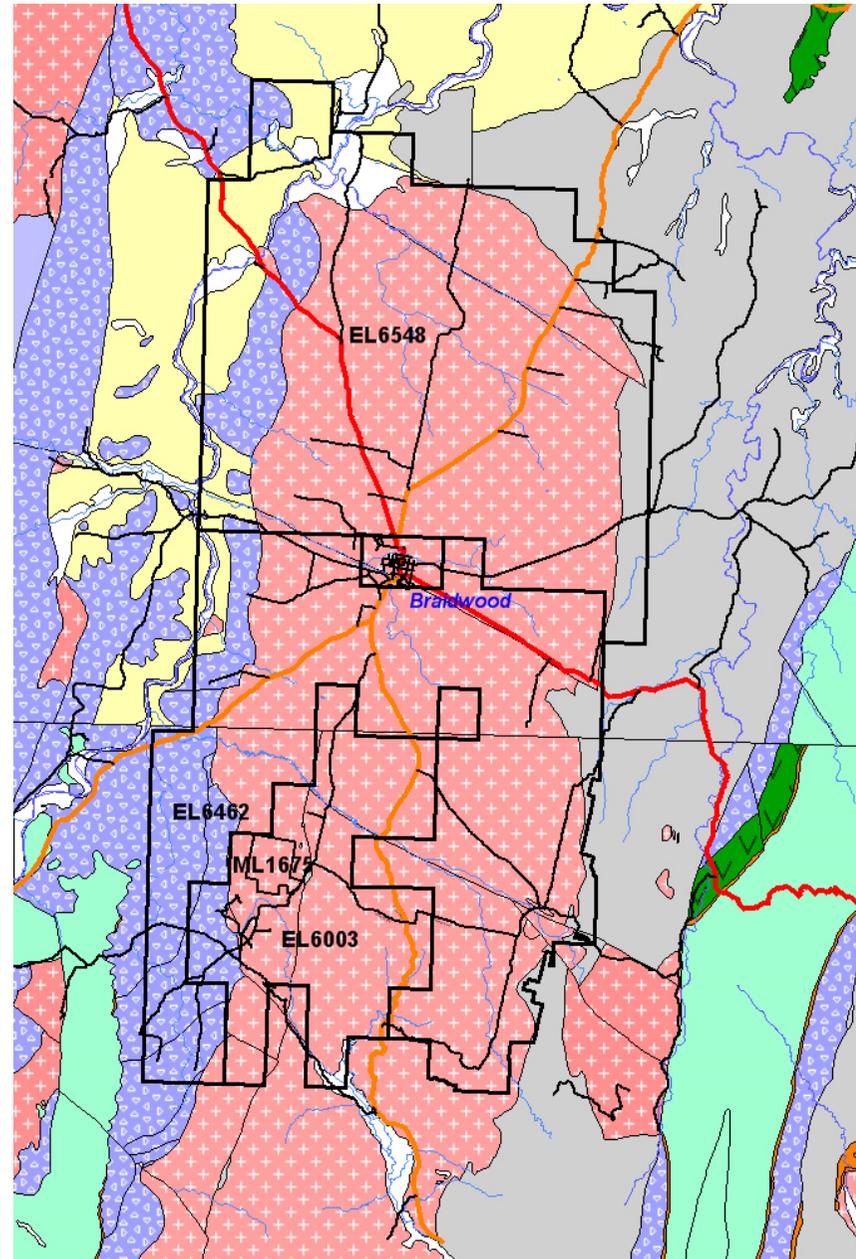

# Dargues Gold Mine Update

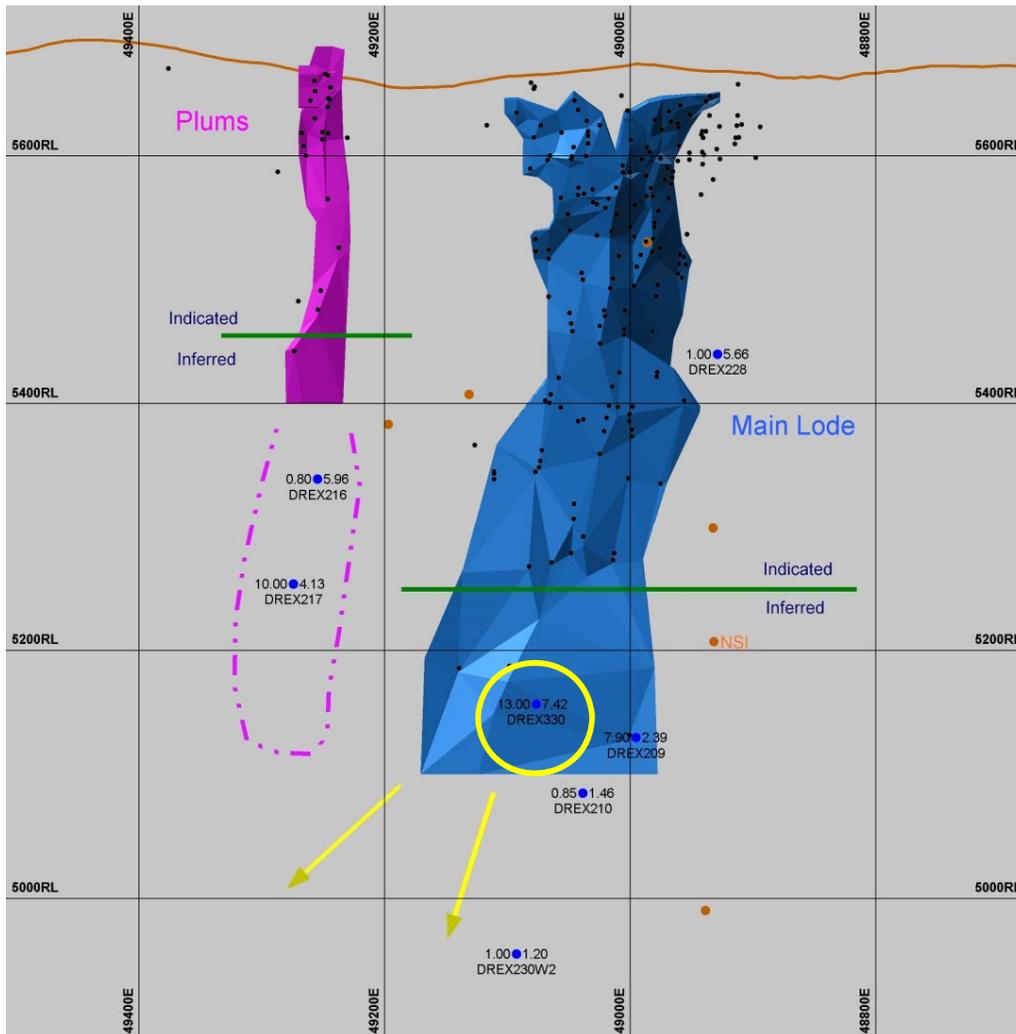

- Located approx. 60km SE of Canberra
  - Planned underground mine to produce approximately 50,000oz gold pa. over an initial 5 year mine life
  - Estimated cost to complete of \$70M\*, excl. targeted savings from “Project 30” initiatives of \$8.9M
  - Estimated cash operating cost of \$700/oz\*\*
  - Completion of engineering and optimisation studies currently underway
  - Resources: 1.6Mt at 6.3g/t for 327 koz gold
  - Reserves: 1.4Mt at 5.2g/t for 233 koz gold
  - Deposit remains open at depth
  - Preliminary earthworks complete, on care & maintenance
- \*Assumes gold concentrate processing at Kangaroo Flat processing plant
  - \*\* Net of state royalties and silver credits

- Overview
- Dargues Gold Mine
- **Majors Creek Project**

# Dargues Exploration Upside

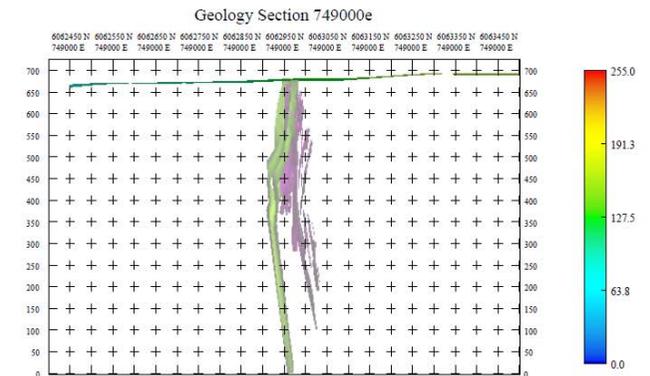

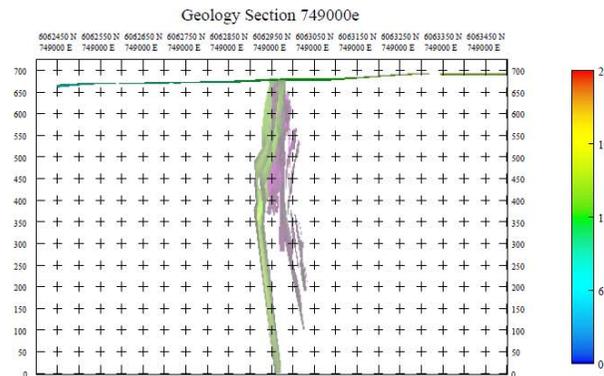

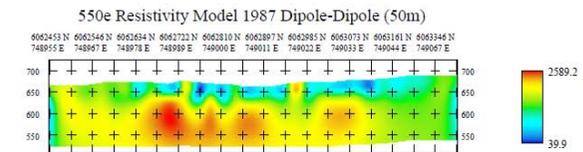

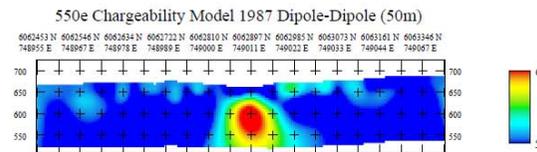

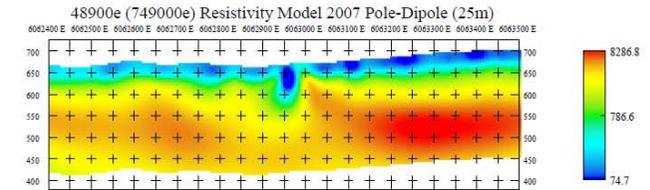

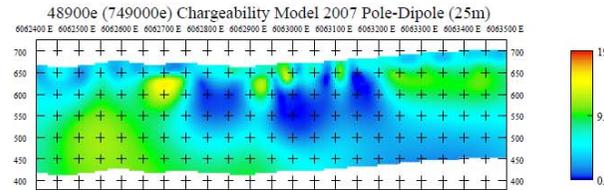

Dargues Resource Outlines

Recent drilling of the Dargues Main Lode encountered high grade mineralisation below the reserve boundary

- 13 m at 7.4 g/t, incl. 4 m at 12.8 g/t gold
- Potential down dip on Main Lode and Plums to increase resource

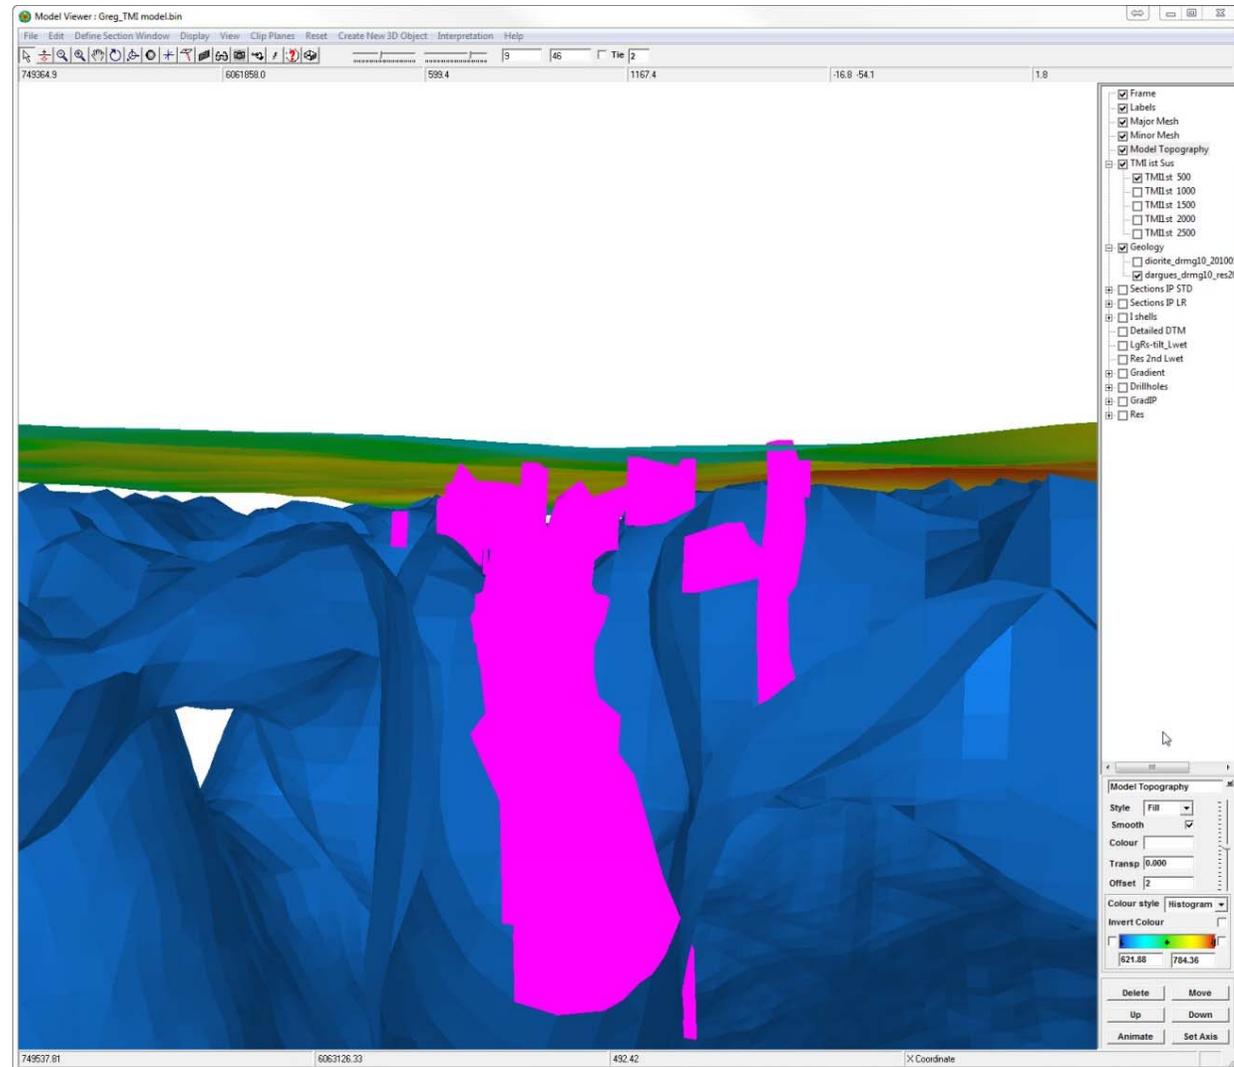

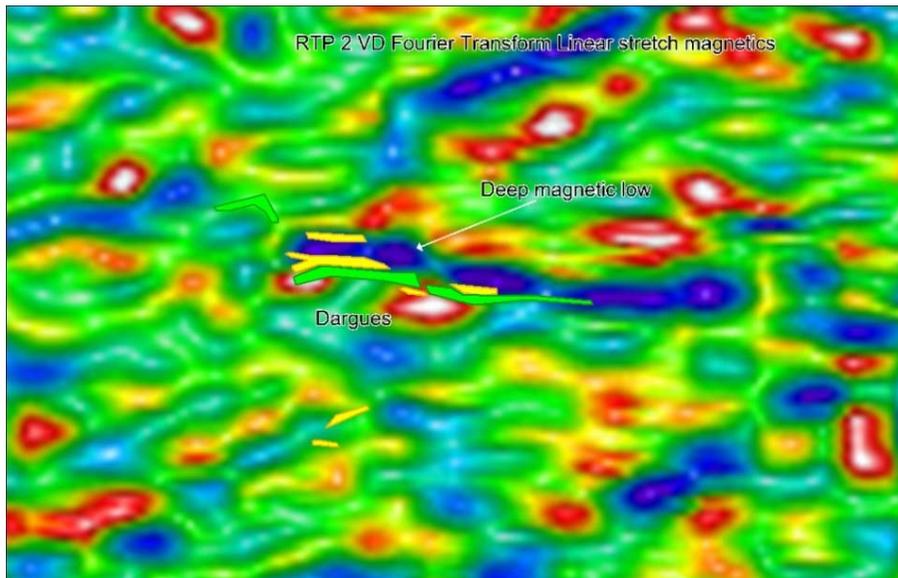

# Dargues Geophysics

- IP
- Never comfortable with results of 2007 pole-dipole IP
- Reprocessed 1987 dipole-dipole
- Dargues shows up as a strong chargeability anomaly
- Which is what you would expect from disseminated sulphide mineralisation

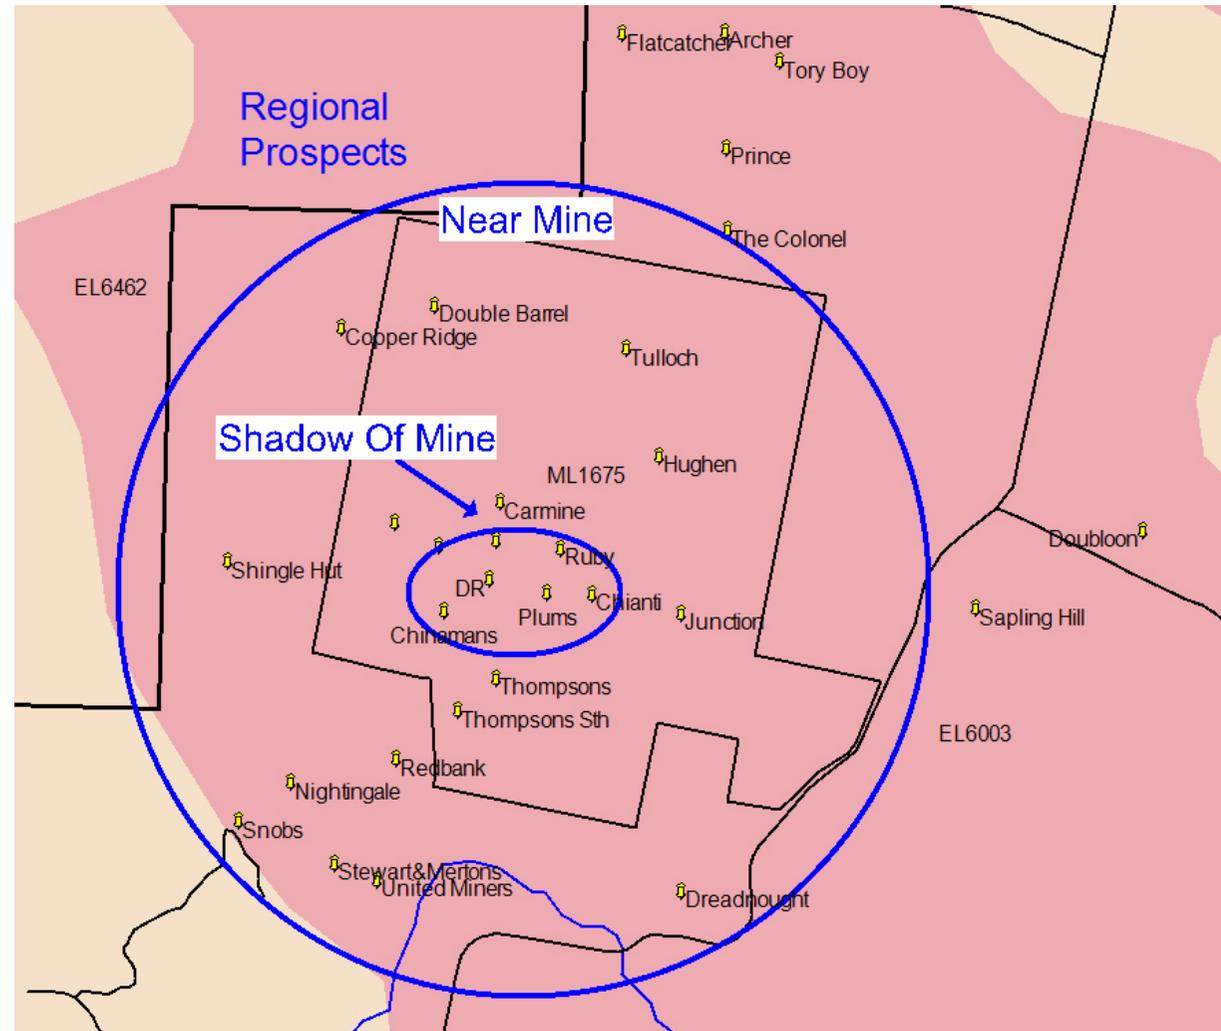

# Dargues Geophysics

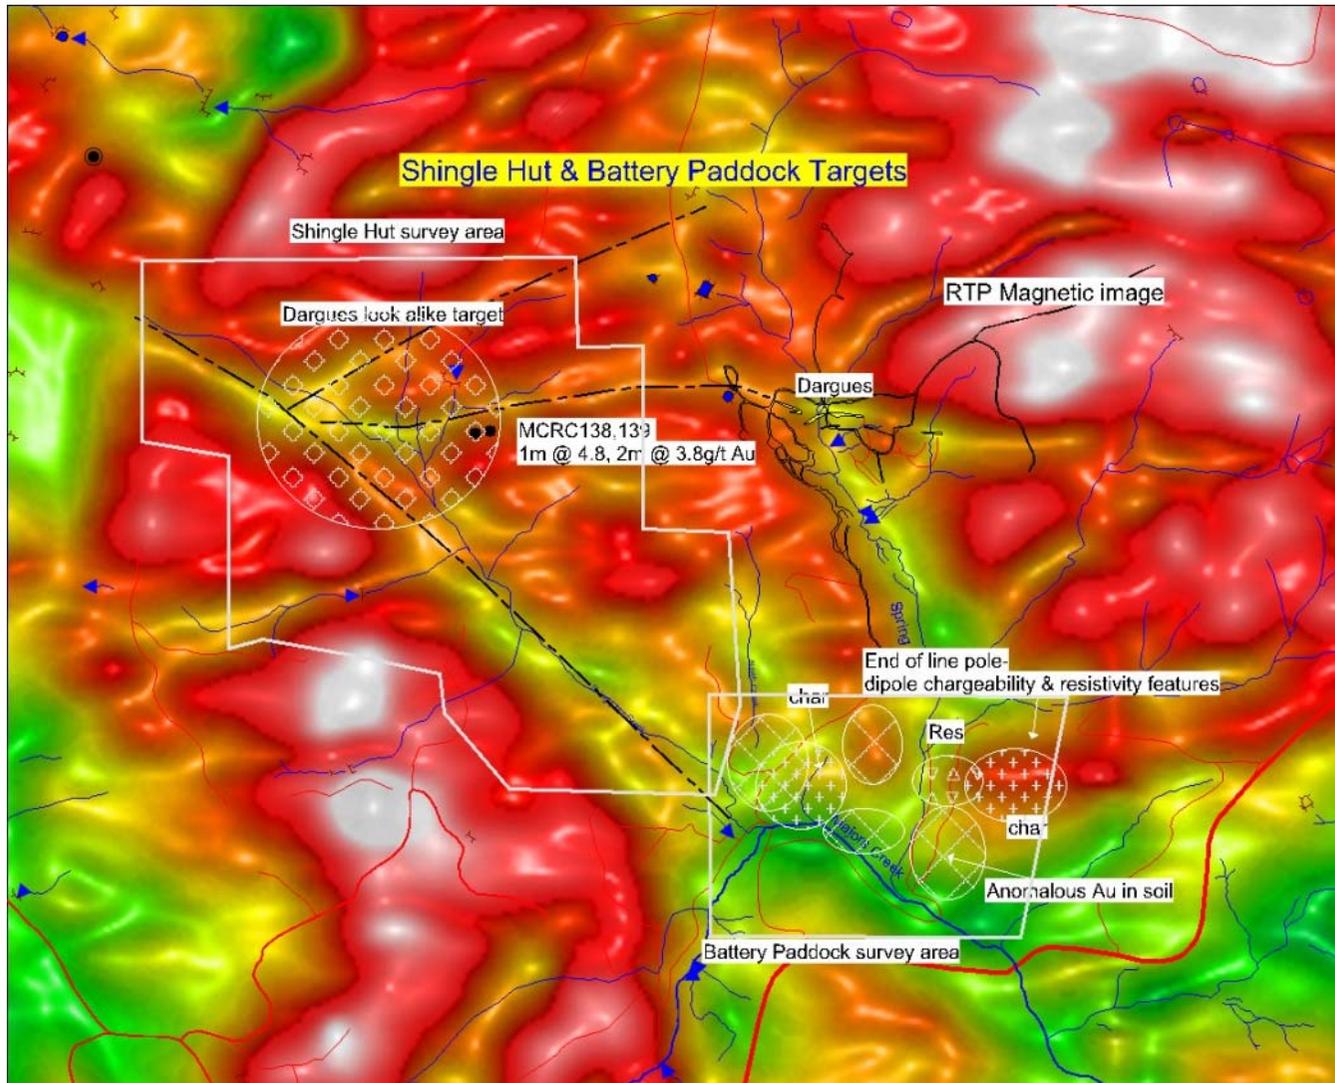

- Magnetics
- Re processing and 3D modelling shows very deep mag low associated with mineralisation

- Overview
- Dargues Gold Mine
- Majors Creek Project
- **Near Mine Exploration**

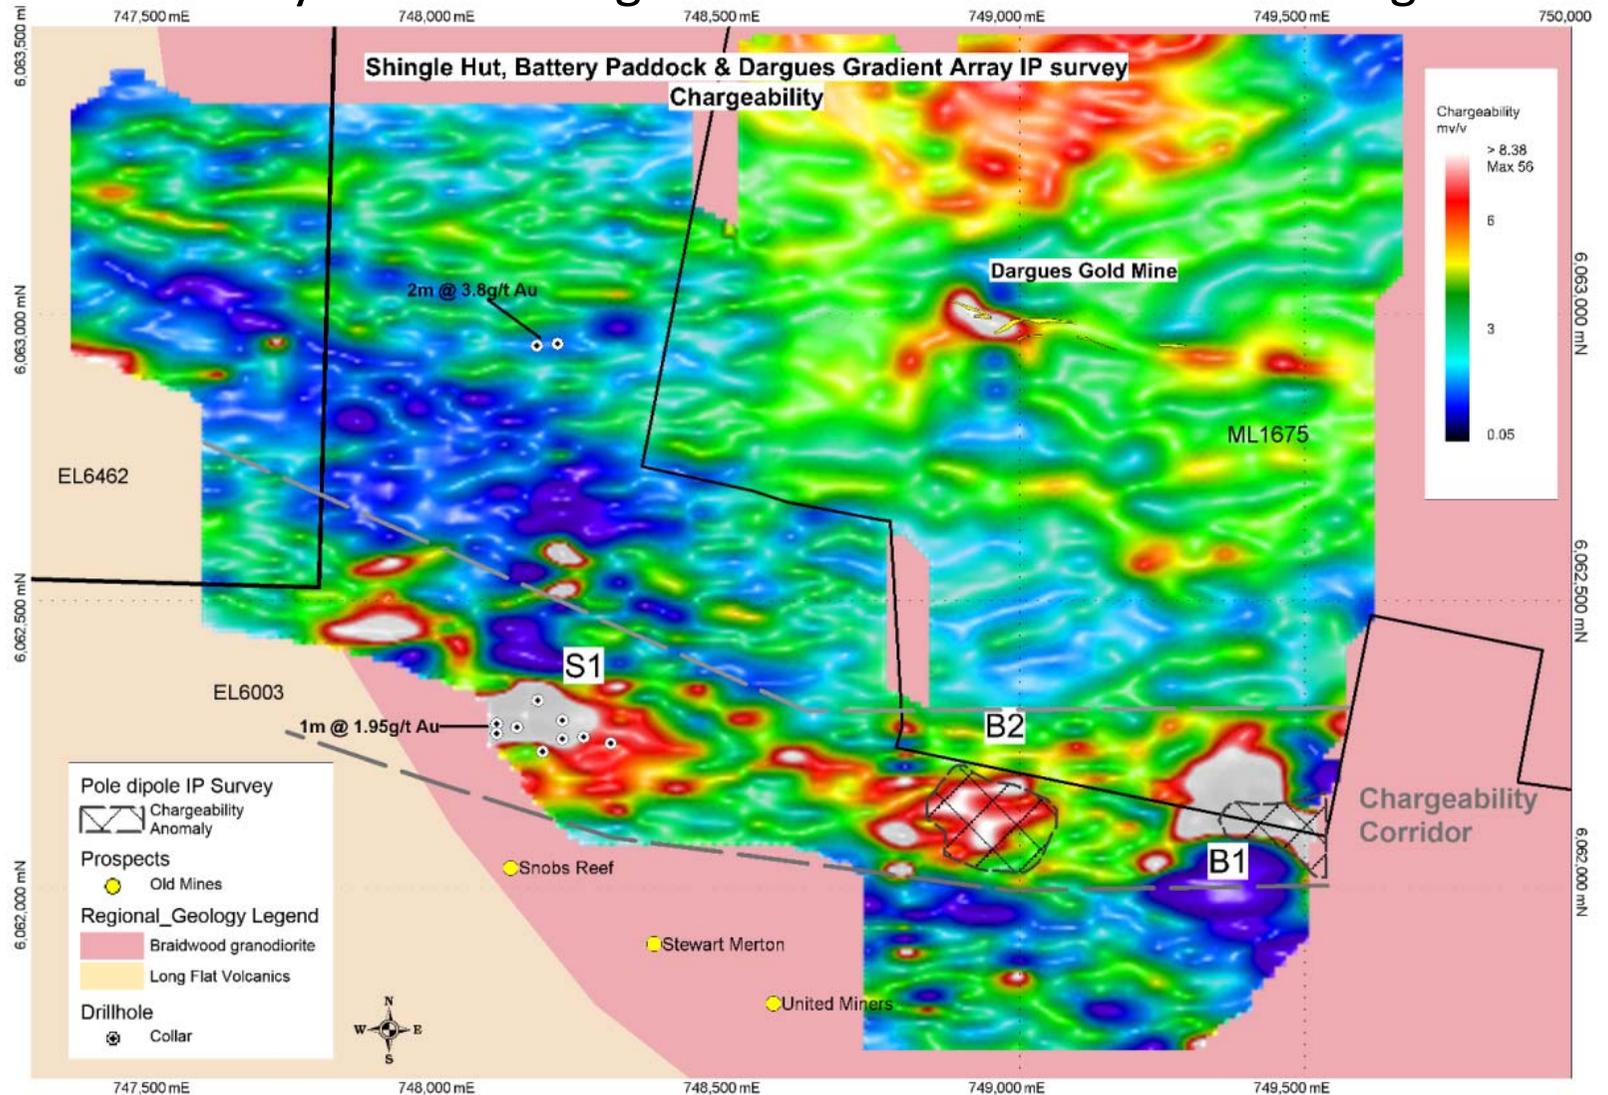

# Targets

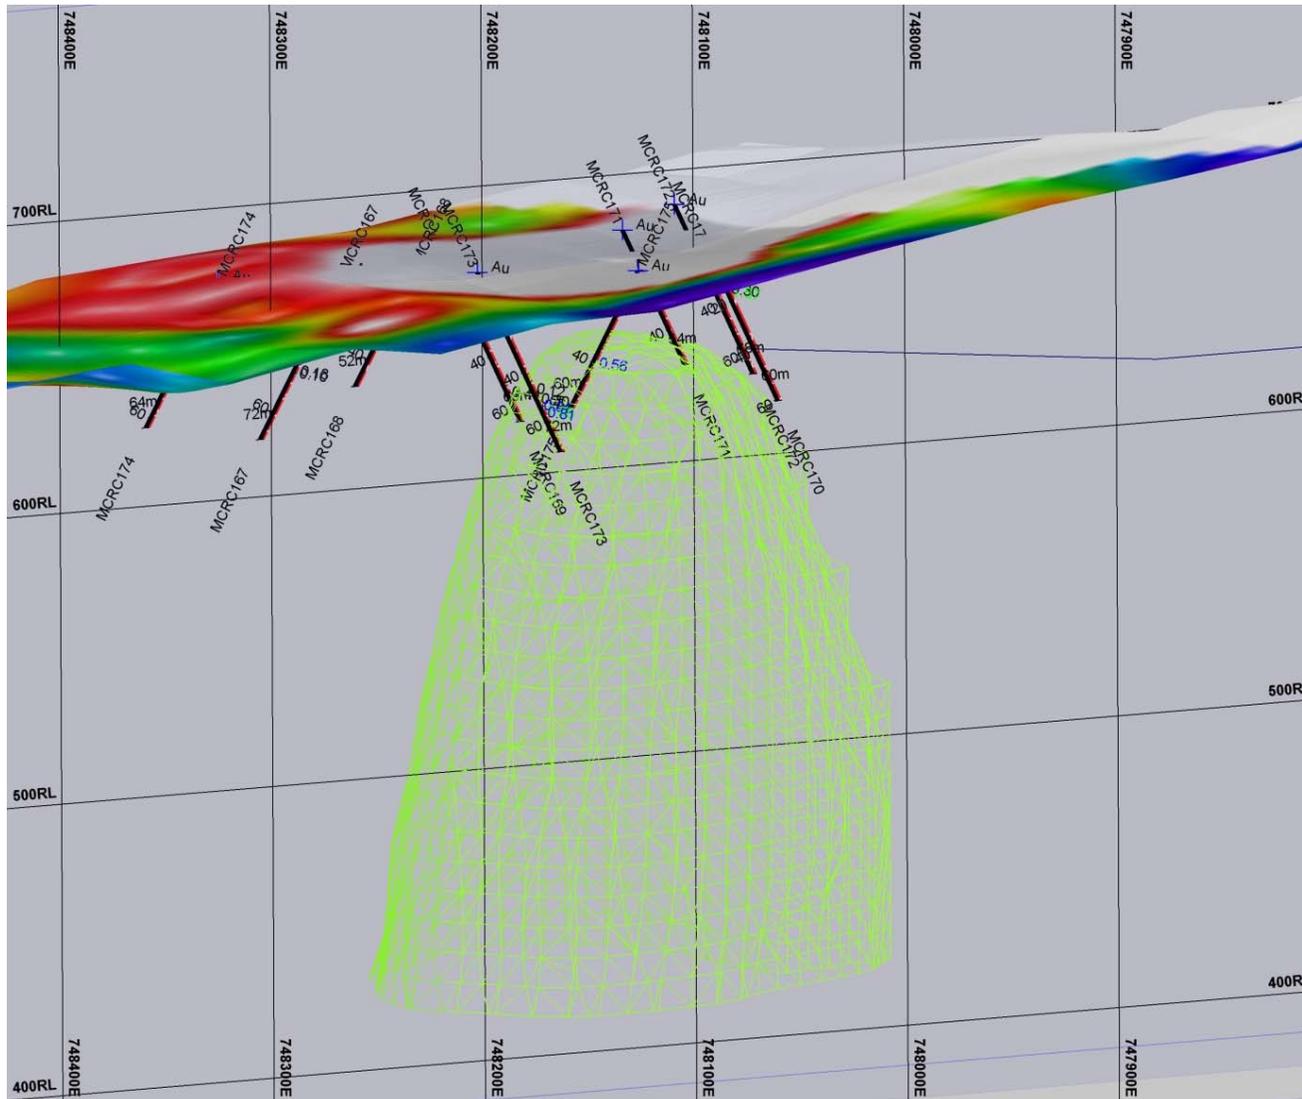

- Targets are either
- IP chargeability anomalies
- deep magnetic lows
- Dargues look alike structures
- Anomalous soil or rock samples

# Geophysics

- Completed Gradient Array IP to test targets to the south and west of Dargues

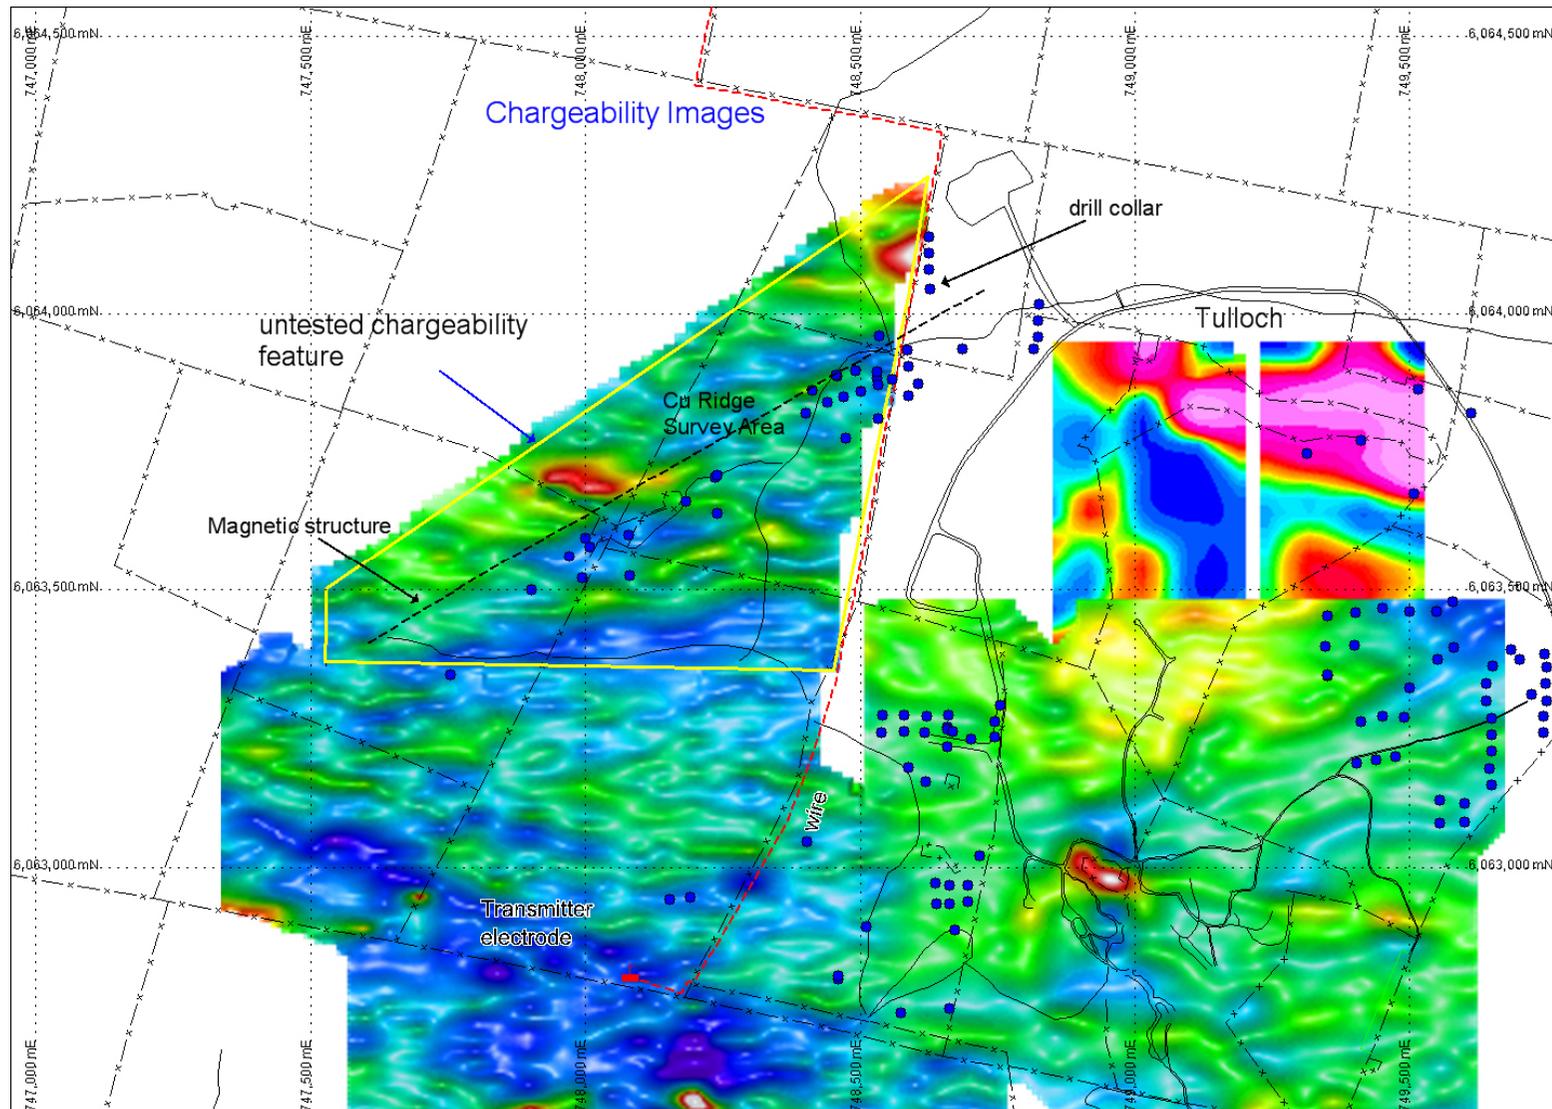

# Anomaly S1

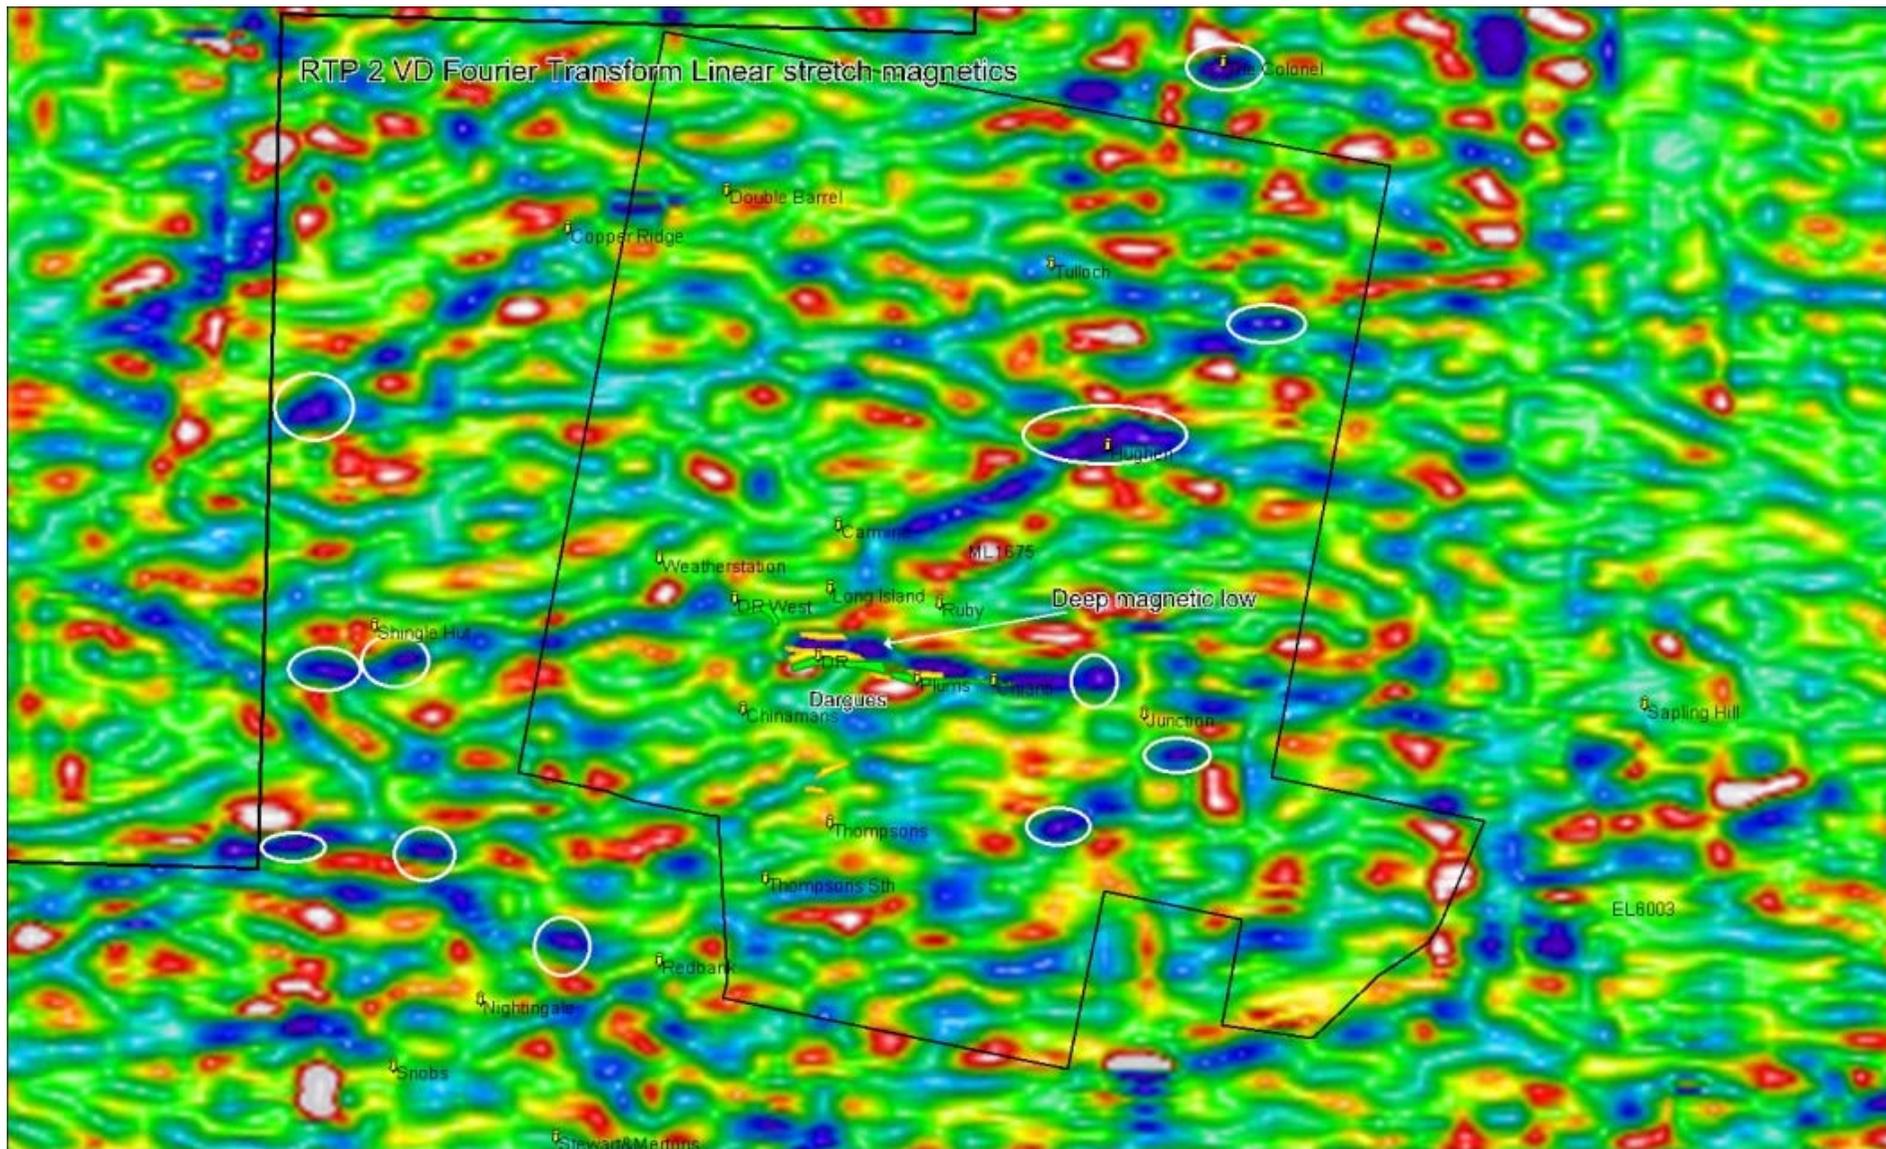

- Previously shallow drilled based on soils & mag
- 1m @ 1.95 g/t Au
- 0.4% Cu, 0.6% Pb, 0.6% Zn, 1125ppm Sb, 36ppm Ag, 6% S (pyrite)
- Hallmarks of Majors Creek style mineralisation.
- Drilling only tested top

# Latest IP results for Cu Ridge Prospect

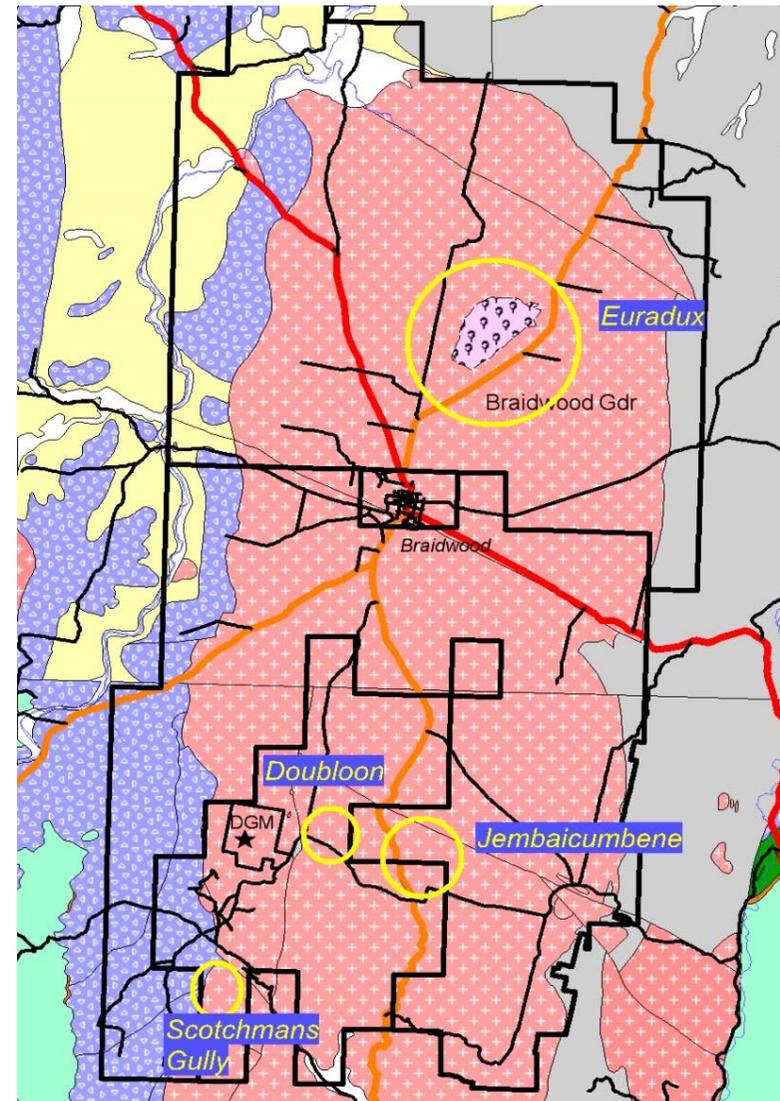

# Geophysics – Mag Targets

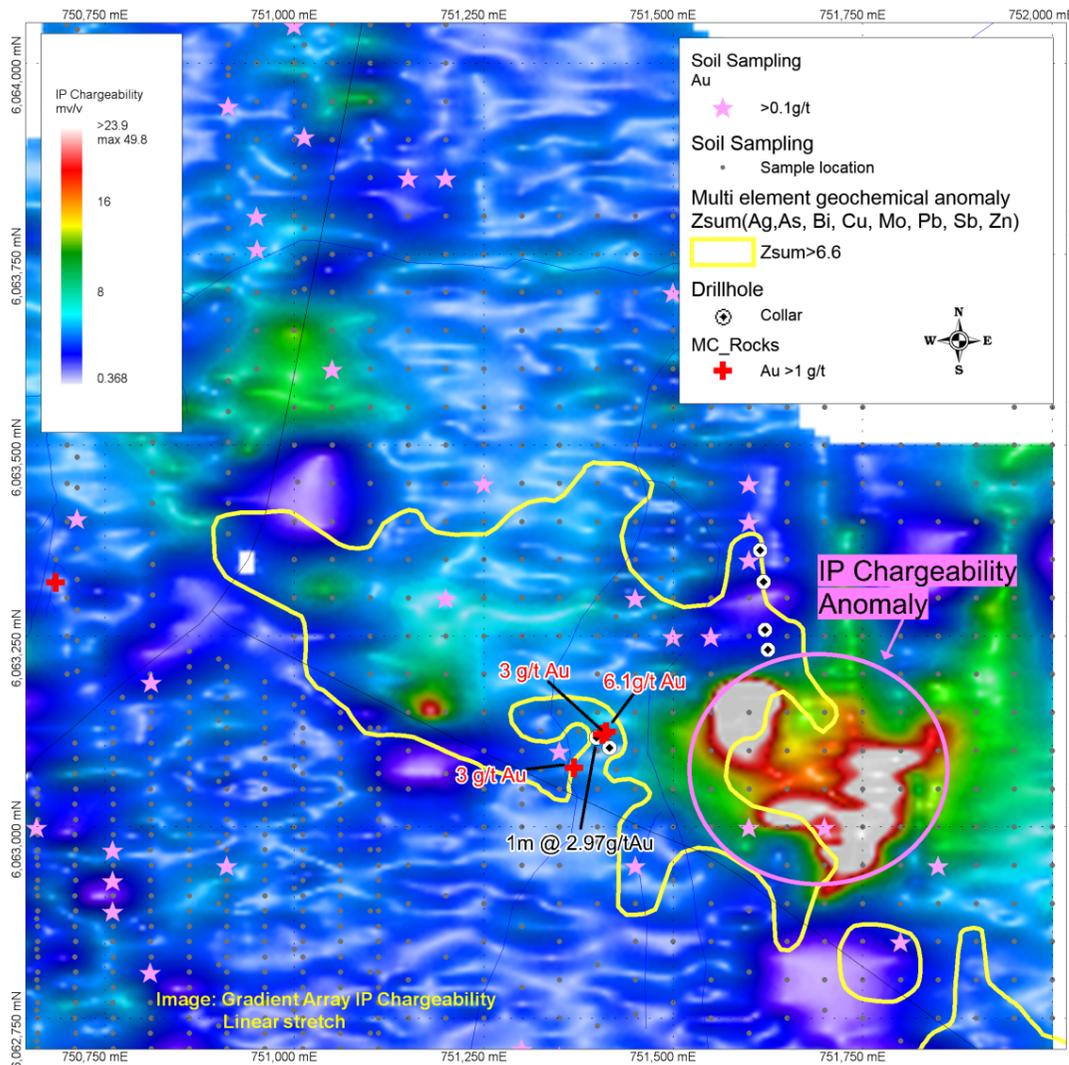

- Overview
- Dargues Gold Mine
- Majors Creek Project
- Near Mine Exploration
- **Regional Exploration**

# Regional Exploration Results

- Recent soil sampling campaign on regional prospects yielded encouraging results.
- Doubloon- multi element soil geochemical anomaly, mag structures, alluvial Au
- Jembaicumbene – soil sampling testing source of alluvial Au
- Euradux – Multi element soil anomalies, E-W mag structures, late stage Euradux granite
- Scotchmans Gully- old workings, reprocessed IP, shallow drilling

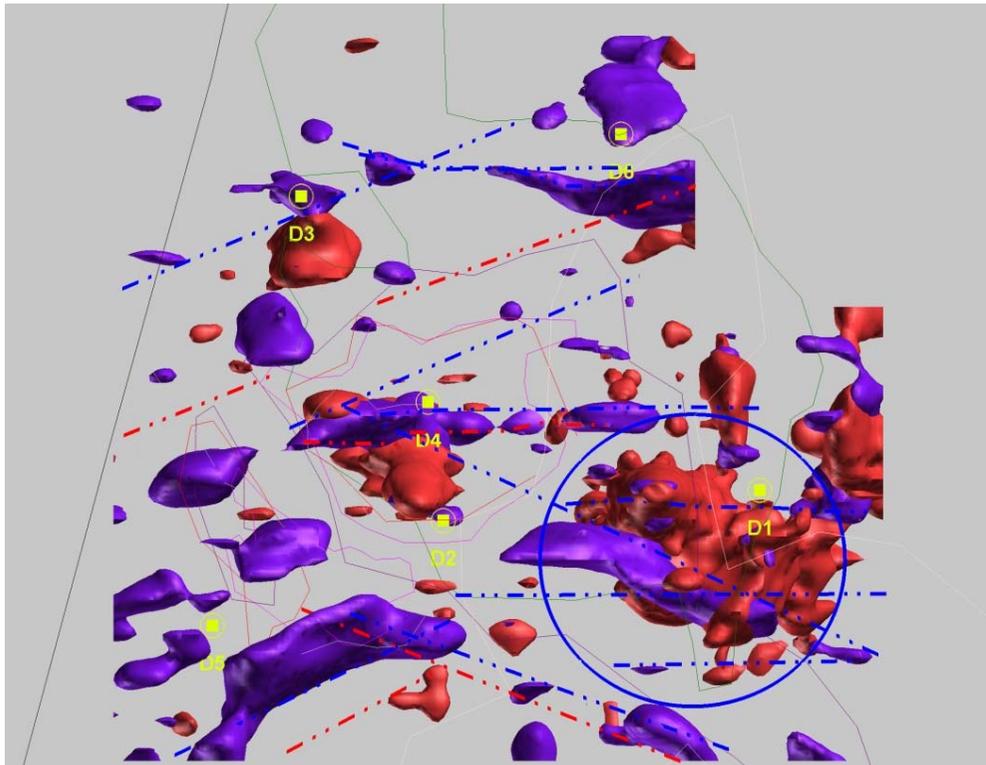

# Doubloun

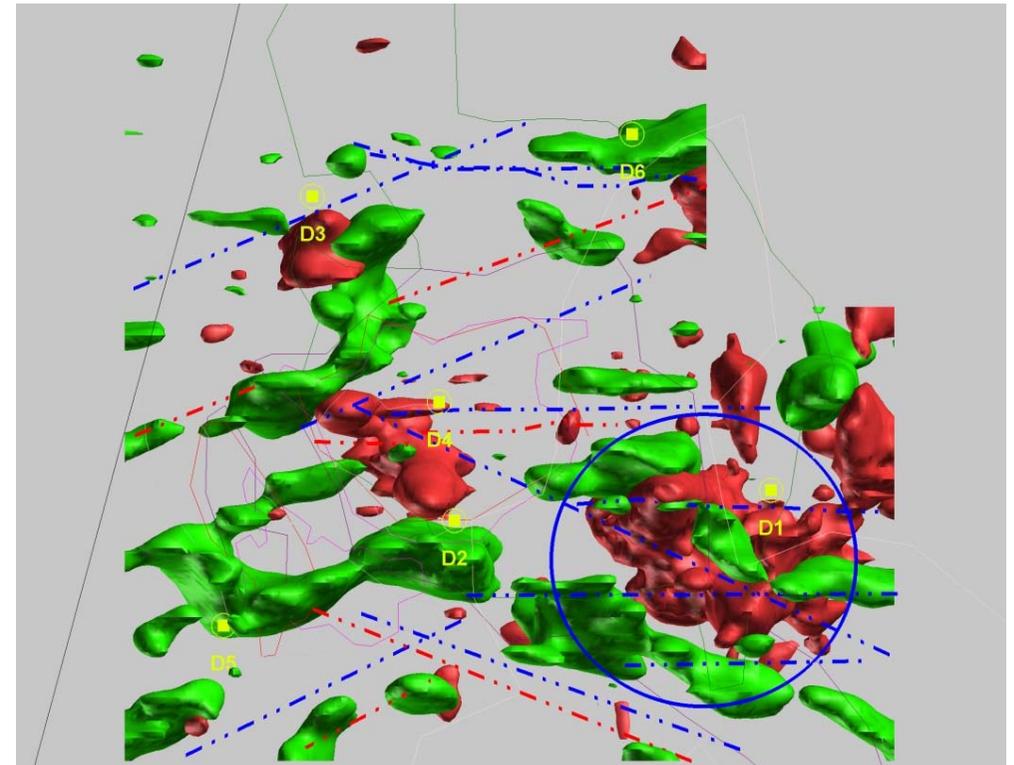

- Anomalous multi element soil and rock samples
- Gradient Array IP
- Very strong complex Chargeability anomaly
- Testing source of Au in alluvial workings

# Doubloun

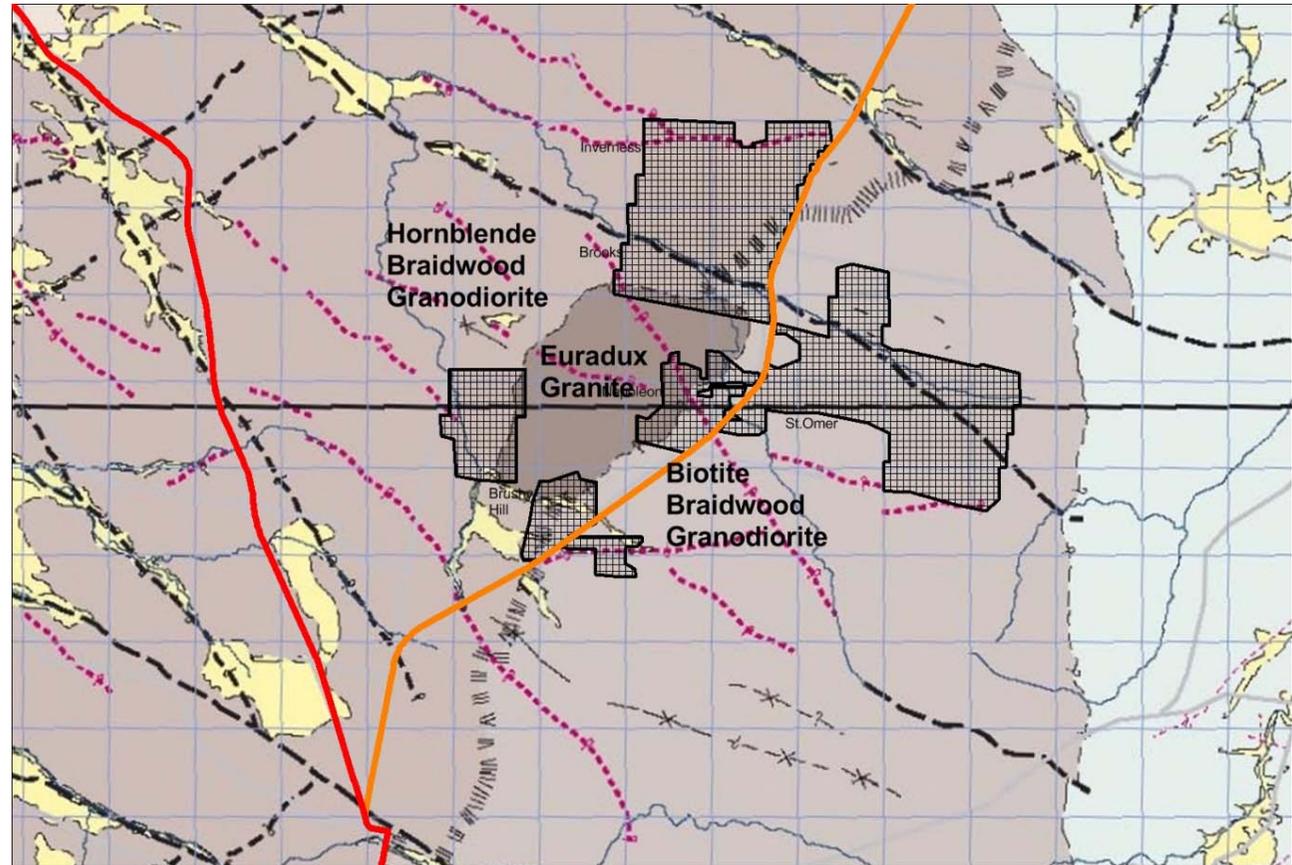

High chargeability – Red  
 Low resistivity- purple  
 Interpreted structures from IP

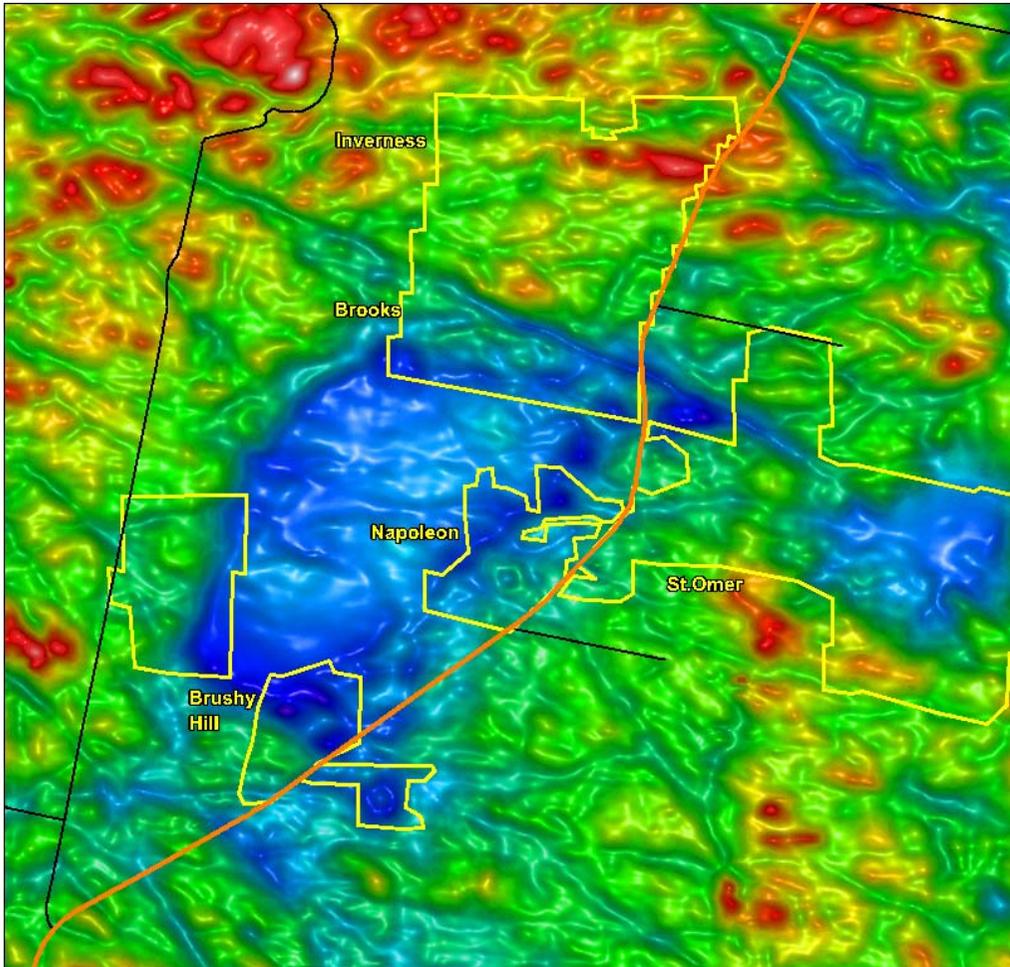

High chargeability – Red  
 High resistivity- green  
 Interpreted structures from IP

# Euradux

- 10km Nth of Braidwood
- Low magnetic, late stage Euradux Granite
- E-W Structures
- Napoleon prospect
- Dykes
- Soil sampling
- Anomalous Geochemistry

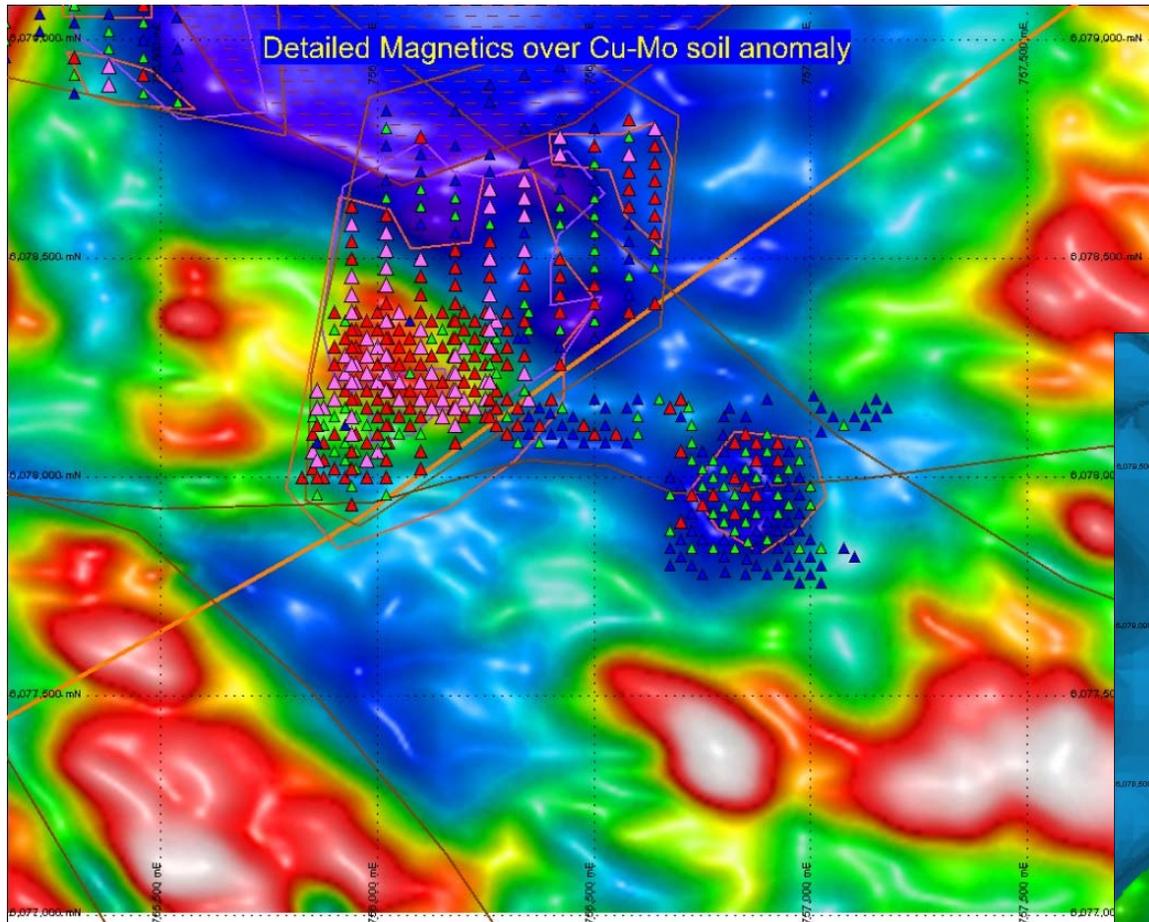

# Euradux

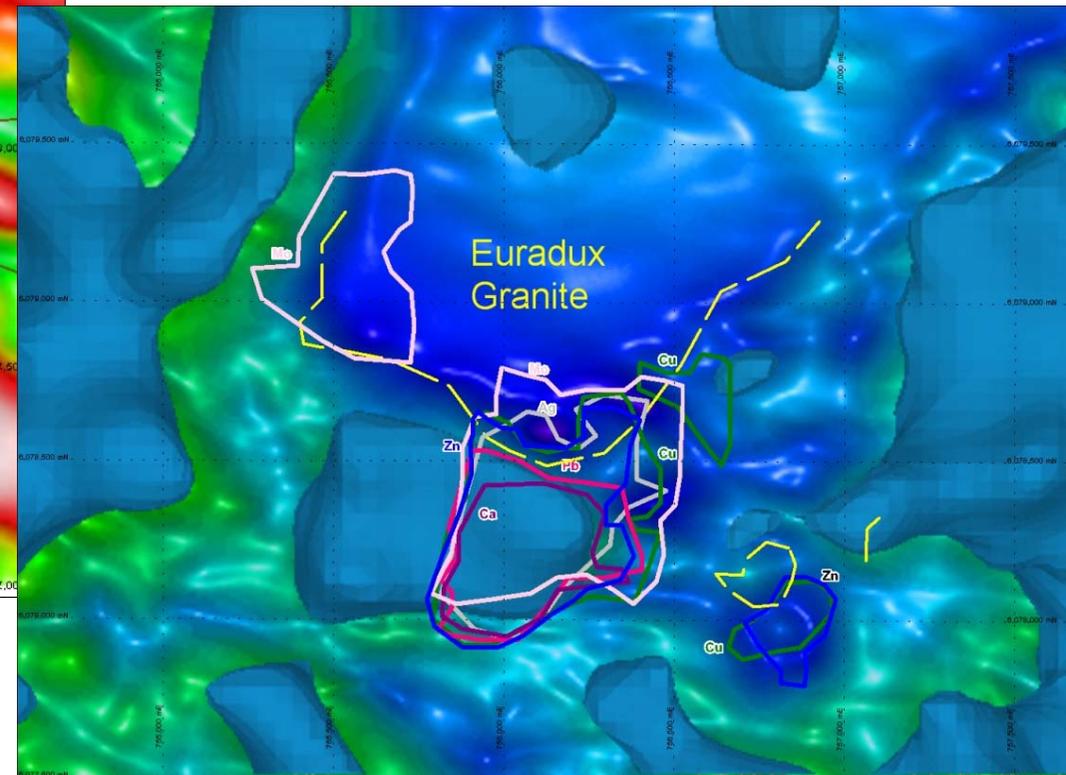

- Napoleon
  - 6.22g/t and 4.46g/t Au rock chips.
  - drill holes - quartz veining. 1m at 0.62g/t gold, 0.9% Cu, elevated Ag, Mo, Pb, Zn, Sb, Bi
- Elevated Cu, Bi, Mo, Sb, Ag, Zn in soils around Euradux Granite
- There is a lot happening around Euradux

# Brushy Hill Cu-Mo soil anomaly

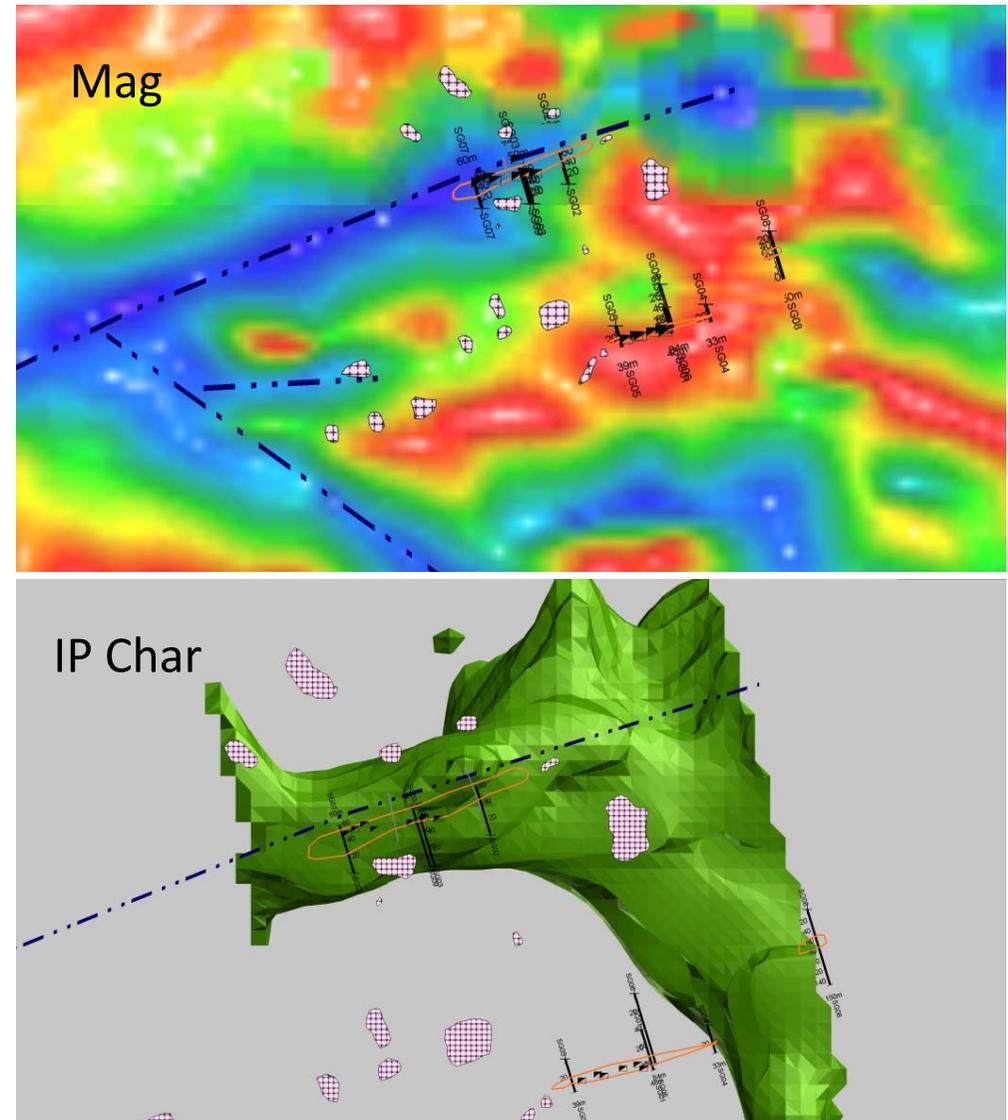

- Anomalous Cu, Mo
- Elevated Ag, Pb, Zn, Sb

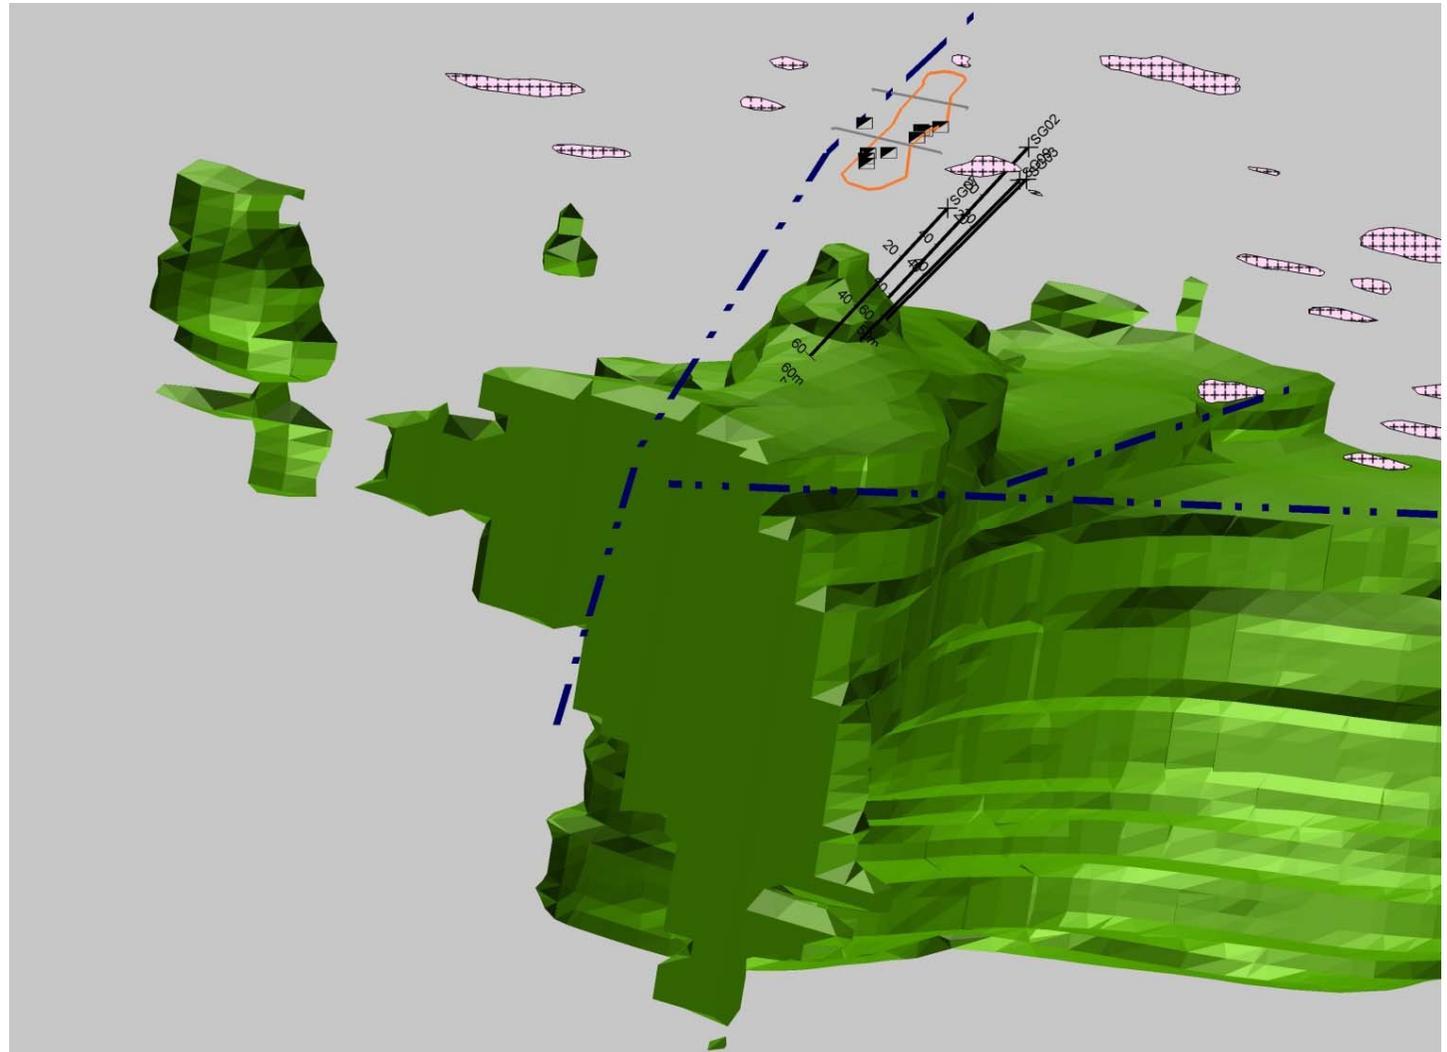

# Scotchmans Gully

- 5km south of Dargues
- Historic mining
- Dipole-dipole IP – reprocessed
- Shallow drilling
- Silica-py alteration in drilling
- Low grade Au up to 2g/t
- Deep mag low
- Dargues look alike structure

# Scotchmans Gully

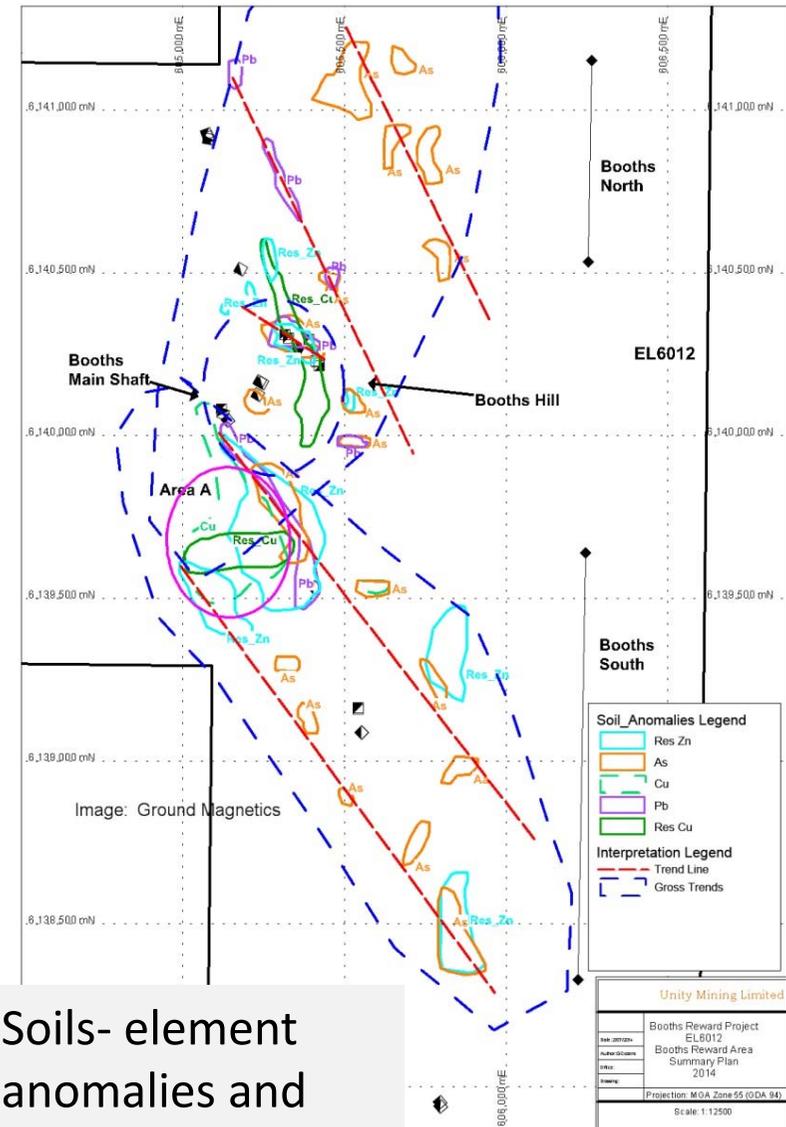

- Shallow drilling – only touched top of IP anomaly
- Only small part of mag low structure has been tested

- Overview
- Dargues Gold Mine
- Majors Creek Project
- Near Mine Exploration
- Regional Exploration
- **Booths Reward Project**

# Booths Reward

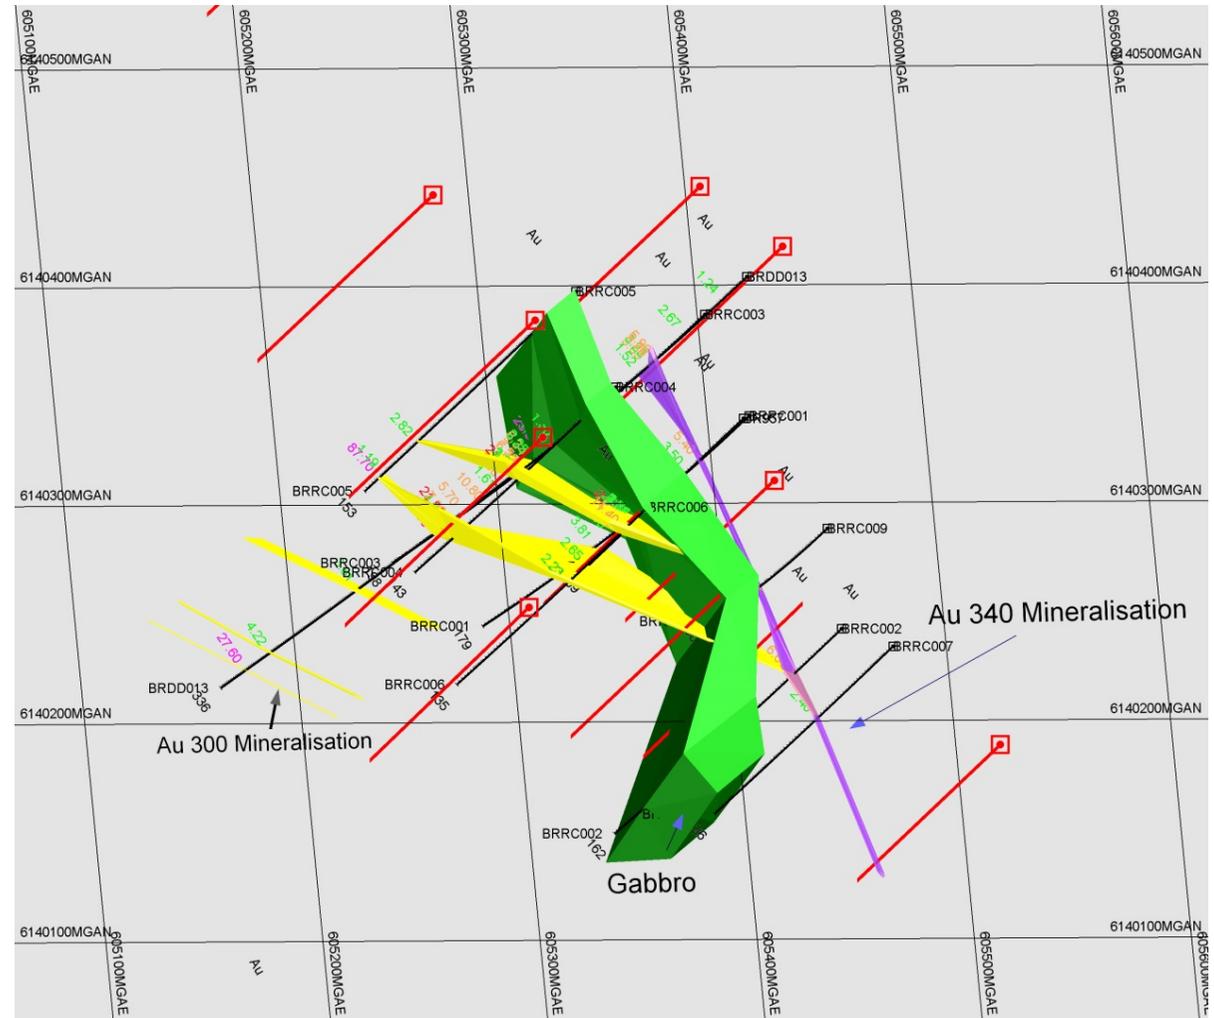

- Intensely deformed Ordovician Jindalee Gp sediments & intrusives
- Structurally controlled – cross cutting stratigraphy
- Au in Qtz- carb-sulphide veins/stringers and disseminated clots of Cpy & Py
- Infill and extension soil sampling highlights several orientations of anomalism
- Analysis using Niton XRF
- Drilling to test for extensions to Booths Hill Au mineralisation

# Booths Reward

Selected previous drill Au intercepts

Hole_Id	depth_from	dh_length	Au
BRDD013	135	2	13.46
BRDD013	195	5	8.71
BRDD013	321	0.5	27.6
BRR001	54	1	12.4
BRR001	86	3	11.47
BRR002	35	1	6.61
BRR003	35	6	6.01
BRR003	64	1	8.96
BRR003	122	2	7.13
BRR003	169	1	8.18
BRR003	172	3	20.23
BRR004	69	3	9.11
BRR004	92	1	10.8
BRR005	142	1	87.7
BRR006	17	1	11.4
BRR006	20	1	7.1

Rotated view looking down plane of mineralisation  
Red trace – planned drillhole

# Conclusion

- Dargues Gold Mine – high grade intersection in inferred resource increases confidence for down plunge extension
- Near Mine Exploration-
  - Further understanding of geophysical character of Dargues
  - geophysical surveys identify several promising targets
- Regional Exploration-
  - re-processing of old data shed new light
  - IP surveys identify new targets
  - Soil sampling identifies new style of mineralisation at Euradux
  - Booths Reward - drilling to commence in October to test for extensions to Au mineralisation
- So many targets!

# Thank you
