MasterCare MHAGIC Electronic Medical Record Now in 42 headspace Centres

2 December 2014: Global Health Ltd is pleased to advise that **MasterCare MHAGIC EMR**, the Company's team-based, case management software for mental health will be operating in 42 headspace Youth Mental Health centres by January 2015.

In addition to the 38 headspace centres it is already supporting, Global Health will finalise implementation of **MasterCare MHAGIC EMR** in four further headspace centres across New South Wales, Queensland and Victoria over the next month.

The headspace National Youth Mental Health organisation provides services to young people between the ages of 12 to 25 with issues ranging from depression, anxiety, relationship break downs, bullying, exam stress and problems with alcohol and drugs.

Revenue from the Company's MasterCare EMR application has increased by 33% in the first 4 months of the year to 31 October 2014, compared to the same period last year.

Chief Executive Office, Mathew Cherian, said the increasing focus on mental health issues was translating to increased demand for MasterCare EMR in mental health services across the public and private healthcare sectors.

"The Company is due to launch a Cloud-hosted, MasterCare as a managed Service early in the new year which will extend the reach of MasterCare EMR to international markets as well as making it more accessible for domestic providers to test-drive the application and experience the benefits already being realised by our increasing customer base," said Mr Cherian.

MasterCare EMR is the most common application utilised by 42 of the existing 77 headspace centres nationally. The total number of funded headspace centres is 100 – a target expected to be achieved by December 2016.
