ASX Announcement   **4 June 2015**

Telstra Health Agreement

- **Software Licence and Support Agreement with Telstra Health**
- **First customer secured**
- **Target Q1FY16 commercial release**

3D Medical Limited (ASX: **3DM**) and Telstra Health, a division of Telstra Corporation Ltd (ASX: TLS), have entered into a Software Licence and Support Agreement (Agreement) whereby Telstra Health will be a reseller of the 3D Medical Mach7 image management software and integrate the technology to create new products.

The Agreement formalises the Letter of Intent with Telstra Health previously announced on 10 March 2015.

3D Medical has secured the exclusive reseller rights in Australia and New Zealand to Mach7 Technologies, a leading developer of image management solutions for hospitals, radiology clinics and other health service providers. Mach7 delivers an Enterprise Imaging Platform built on vendor neutrality that has been designed to enable ownership, sharing and access of imaging data to improve patient care, compliance and clinician satisfaction across the enterprise.

The Agreement also allows the supply of specific Telstra Health products to 3D Medical's new and existing customers. Commercial release is planned for Q1-FY2016.

Max Ghobrial CEO of 3DM commented, "3D Medical is extremely pleased to have established a commercial partnership with Telstra Health to include our Vendor Neutral Archive solution as part of Telstra Health's future offerings. This has the potential to make a significant impact on how patient data can be stored and shared in Australia."

END

About 3D Medical Limited:

At 3D Medical our aim is to aid medical professionals in the facilitation of improved clinical care, improving medical procedures, diagnostics and ultimately improving patient outcomes.

3D Medical is a medical specific 3D printing and holographic projection and data integrations provider. Our services 3D Medical Printing; EchoPixel (holographic projection technology); GestSure (in surgery image control); Mach 7 (enterprise imaging solution provides healthcare organisations with the ability to archive, consolidate, access, and share medical imaging data across departments, locations and regions) and MediDATA service provides medical practices the opportunity to leverage their analytical capabilities to gain an improved understanding of the characteristics of the patients which drive their business.

These new and innovative products leverage data already captured by conventional imaging modalities and apply it in more meaningful ways to deliver improved economic and patient outcomes.
