

Fastbrick's Hadrian in action

Fastbrick Robotics Limited (ASX:FBR) ("FBR" or "Fastbrick Robotics") is pleased to provide the first video demonstration of its automated bricklaying process in action. The video also contains a detailed animation of the Hadrian 109 Commercial Prototype that was fully funded in the oversubscribed Prospectus Offer that closed 23 October 2015.

The video can be viewed via the link below:

About Fastbrick Robotics

Fastbrick Robotics has developed the world's latest innovation in mobile robotic technology that will vastly improve the speed, accuracy and safety of the global brick construction industry. Fastbrick Robotics is finalizing the development of its prototype and will be progressing the development of the Hadrian 109 model for commercial use in 2016/2017.
