ASX and Media Release

8 February 2016

LogiTag recognised as global leading RFID-enabled technology provider for the healthcare industry

Quantum Resources Limited (ASX:QUR) (**Quantum** or the **Company**) is pleased to advise that LogiTag Systems Limited (**LogiTag**) has been awarded the *2015 European RFID Smart Cabinets for Healthcare Customer Value Leadership Award* by Frost & Sullivan.

As shareholders are aware, Quantum has entered into a binding share purchase agreement to purchase 100% of the issued share capital in LogiTag, an Israeli based provider of radio-frequency identification enabled devices (**RFID**) and cloud based inventory management systems, and which currently targets the global healthcare market.

Frost & Sullivan, which researches a comprehensive range of markets across multiple sectors and geographies, has published a report in connection with LogiTag's award. A copy of Frost & Sullivan's report is available on Quantum's website (www.qur.com).

Mr Avi Kimelman, CEO of Quantum commented, "We are pleased that LogiTag has earned this prestigious award from Frost & Sullivan. This serves to validate our confidence in LogiTag's solutions, and its ability to offer product differentiation to customers. We continue to be encouraged by the high demand in the healthcare industry for LogiTag products, and are excited by the significant potential for LogiTag to pursue further expansion in this lucrative industry. In the meantime, Quantum continues to work towards completion of its acquisition of LogiTag, and looks forward to providing further updates to shareholders."

About LogiTag

LogiTag develops, manufactures, and markets intelligent, best-in-class RFID solutions and systems through 'Internet of Things' (IOT) for real-time tracking, monitoring, and managing inventory, assets, and people. LogiTag identified a growing need for advanced RFID technology with applications in healthcare, security and enterprise. LogiTag's founders drew on their extensive knowledge and deep understanding of RFID, software, operations, and logistics to develop modular, Real-Time Location Systems (RTLS) and comprehensive hardware/software suites that integrate smoothly into lean manufacturing and operations.
