MasterCare EMR selected for Malaysian Mental Health program

<u>10 February 2016:</u> Global Health is pleased to announce the award of a contract through Malaysian distributor, Inter Virtual Sdn Bhd, for the implementation and ongoing support of Global Health's MasterCare shared Electronic Medical Record for the Malaysian Ministry of Health's MENTARI mental health network – a program aimed at improving community mental health services.

There are currently twelve MENTARI centres across Malaysia whilst a further 36 centres are planned to be opened over the next three years.

MasterCare will be implemented as a centralised nationwide database on Telekom Malaysia's Cloud platform ensuring consistency in data collection, process workflow and clinical management tools whilst managing access for clinicians. The approach of a nationwide database on a single Cloud platform will enable comprehensive reporting to provide continuous insights into the efficacy of treatment plans, patient outcomes and other clinical and management trends.

Global Health CEO, Mathew Cherian, commented:

> "We look forward to working with the Malaysian Ministry of Health.
>
> We view this contract as a key endorsement of MasterCare EMR's reputation as best in class amongst clinicians globally, particularly those supporting chronically ill patients who need multi-disciplinary, team-based care.
>
> We are confident of achieving further international success looking forward, given the extent of MasterCare EMR's competitive advantages in the global market."
