REVIEW OF OPERATIONS AND ACTIVITIES

Profit and Dividend

Profit for the half-year to 31 December 2015 was \$21.1 million, an increase of 6.7 per cent from \$19.8 million in the corresponding period last half-year.

The net operating result for the half-year was \$25.6 million, up 17.8 per cent from \$21.7 million in the previous corresponding period. In the opinion of Directors, this is a better measure of Djerriwarrh's performance in deriving ongoing investment, trading and options income from the Company's portfolios as it excludes the valuation impact of net unrealised losses on open option positions.

Heightened volatility over the period combined with the strategy of maintaining call option coverage at the upper end of the Company's indicative range in a falling market has benefited the option income activity of Djerriwarrh, which in turn has lifted profit. Income from option activity and the trading portfolio was \$12.9 million, well ahead of the \$8.5 million generated last half-year.

Djerriwarrh's interim dividend has been maintained at 10 cents per share fully franked, the same as last year.

The Portfolio

The Australian equity market has seen a marked divergence over the past six months as larger companies in the S&P/ASX 200 Index have generally underperformed those outside of the top 50. The resource and energy sectors have also been particularly hard hit, with rapidly falling commodity prices.

Figure 1: Contrast in sector performance against the market

Figure 2: Portfolio performance to 31 December 2015

For Djerriwarrh, short term portfolio performance was reflective of the general bias the portfolio has to top 50 stocks; given this is where the options market is most active and the overweight position in energy stocks. Some of the better performing holdings by percentage return in the investment portfolio were CSL, Treasury Wine Estates, Veda Limited (which is under a takeover offer), Fisher & Paykel Healthcare and Macquarie Atlas Road Group.

Djerriwarrh's portfolio return for the six months to 31 December 2015 was negative 4.1 per cent, whereas the S&P/ASX 200 Accumulation Index return was negative 0.5 per cent.

Djerriwarrh seeks to provide an enhanced level of franking credits through its investment activities. For those investors

who can take full advantage of the franking credits, this adds significantly to investor returns (Figure 3 on page 4). As a long term investor, notwithstanding the recent under-performance to the index, it remains encouraging to see the 10 year performance, including franking of 7.7 per cent per annum, ahead of the index returns, including franking of 7.2 per cent per annum.

One of the objectives over the period was to look for opportunities in companies outside of the top 50. In this context Challenger, Mainfreight and Navitas were some of the new companies added to the portfolio. The existing position in Healthscope was also increased. In the larger company space Djerriwarrh participated in the Commonwealth Bank capital raising through the period as well as adding further to the Macquarie Bank holding in the portfolio.

REVIEW OF OPERATIONS AND ACTIVITIES

continued

Brief descriptions of the largest of the new additions to the portfolio are outlined below:

- Challenger focuses on providing
 Australians with financial security in
 retirement and operates through two
 divisions: life and funds management.
 The life division includes annuity and
 life insurance business carried out by
 Challenger Life Company Limited, which
 invests in assets providing long term
 income streams. The funds management
 division develops, distributes and
 manages investment products. This
 division also manages two listed funds
 and a number of unlisted fund mandates.
- Mainfreight (listed on the NZX) is headquartered in Auckland, New Zealand, and specialises in 'less than a container' loads. It is engaged in freight logistics services and supply chain solutions. The company offers managed warehousing and international and domestic freight forwarding services. Its services include managed warehousing, domestic distribution, metro and wharf cartage and international air and sea freight operations across New Zealand, Australia, Europe,
 Asia and the United States.

Figure 3: Portfolio performance including grossed up franking benefit to 31 December 2015

Note: Djerriwarrh's net asset per share growth plus dividend series is calculated after management fees, income tax and capital gains tax on realised sales of investments. It should be noted that index returns for the market do not include management expenses and tax.

The franking benefit assumes an investor can take full advantage of the franking credits.

 Navitas is a global education provider that offers a wide range of educational services through three major divisions to students and professionals, including university programs, creative media education, professional education, English language training and settlement services.

Given the general fall in the market over the half-year there were few call options exercised, although Asciano (under a takeover offer), Sydney Airport and Sonic Healthcare were the exceptions. Other sales included a lightening in the exposure in the commodities sector (BHP and Santos being the largest of these), the sale of some of the holding in Woolworths early in the half-year and the complete disposal of Twenty-First Century Fox.

Option Activity

Through the six month period where the market produced lacklustre capital returns and volatility was generally high (Figure 4), option coverage was at the upper end of the Company's indicative range through the period. As mentioned previously this meant income generated from option premium was greater than last half, although it also meant very few call option exercises occurred.

In the resources and energy sector, which remains under considerable pressure, the strategy was to continue to write call options against falling stock prices to maximise income return by taking advantage of the elevated premiums on offer. For these stocks, option coverage was generally higher than other stocks in the portfolio.

REVIEW OF OPERATIONS AND ACTIVITIES

continued

The continued addition of selected mid and small sized companies in the portfolio has also meant Djerriwarrh has remained active in using 'over the counter options' as a means of generating additional income return from these holdings. This has been an effective strategy in balancing the trade-off between capital growth and income with these potentially higher growth stocks.

Yield and Share Price

Figure 5 highlights the relative dividend yield on Djerriwarrh shares (which are fully franked) in comparison to the dividend yield on the S&P/ASX 200 Leaders Index (which is only 80 per cent franked) since the Company was listed.

It should be noted these yields do not take into account the additional franking benefits available to investors.

Further, the attractiveness of Djerriwarrh's relatively high fully franked dividend yield in a low interest rate environment has, in our view, kept the share price trading at a substantial premium above net asset backing. At 31 December 2015, the premium was over 30 per cent. Figure 6 highlights the long term pattern.

Figure 5: Relative dividend yield of Djerriwarrh and the market

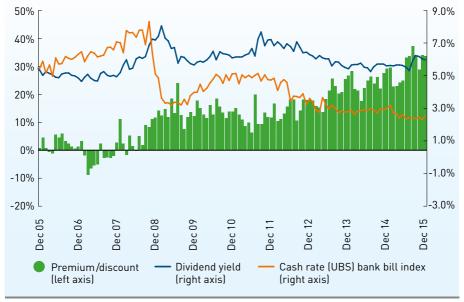

Outlook

As we move into the second half of the financial year elevated volatility is likely to remain a key feature of the market as it grapples with concerns about the nature and magnitude of global growth, in particular the Chinese economy, the ongoing impact of low commodity prices and the outlook for the domestic growth, which at this point is still uneven.

The effect of continued low interest rates and the decline in the Australian dollar could have an offsetting impact on these factors, but the extent of this is not yet clear.

High option coverage as a starting position for the portfolio should assist with the generation of income, which is one of the main objectives of the Company's investment activities. In addition, the upcoming reporting period for Australian companies will also provide an insight into how they are coping with present economic conditions and, importantly for Djerriwarrh, the outlook for dividends going forward.

A full set of Djerriwarrh's interim accounts are available on the Company's website.

HOLDINGS OF SECURITIES

As at 31 December 2015

Details of the Company's portfolios are given below. The list should not be used to evaluate portfolio performance or to determine the net asset backing per share (which is advised to the Australian Securities Exchange each month and recorded on the toll free telephone service at 1800 780 784).

Individual holdings in the portfolios may change significantly during the course of the year. In addition, holdings may be subject to call options or sale commitments by which they may be sold at a price significantly different from the market price prevailing at the time of the exercise or sale.

Unless otherwise stated, the securities in this list are fully paid ordinary shares, trust units or stapled securities.
