## **REVIEW OF RESULTS AND OPERATIONS**

## **Group Results**

The Group delivered sales revenue growth of 8.4% and EBIT (before significant items) growth of 4.3%. Net profit after tax attributable to shareholders for the first half was \$41.9 million, compared to \$41.8 million in the prior corresponding period (pcp).

Half year ended 31 December, A\$ in millions	31 December 2015	31 December 2014

Income tax expense	(18.6)	(18.1)

Net profit after tax attributable to shareholders	41.9	41.8

<sup>(1)</sup> EBIT (before significant items) is a non-IFRS financial measure which is calculated as earnings before significant items, finance costs, net of interest revenue and tax

## Sales Revenue

Group sales revenue increased by \$53.2 million (8.4%) to \$688.2 million compared to the prior corresponding period. Sales growth was driven by acquisitions, delivering \$81 million in additional sales in the period, including Jalco, a contract manufacturing, filling and packing business acquired in September 2015, smaller bolt-on acquisitions made towards the end of the last financial year, and an additional 5 weeks contribution from the Sulo business acquired in August 2014. Movements in exchange rates also had a favourable impact. These benefits were partly offset by lower underlying volumes in the agricultural and dairy sectors, lower demand in the industrial sector due to weaker mining markets, and net contract losses during the period. Demand across most of the Group's other sectors was also subdued.

## EBIT (before significant items)

The Group reported EBIT (before significant items) of \$80.0 million, representing a 4.3% increase over the pcp, with the benefit of acquisitions (+\$3.6 million) and the delivery of efficiency (+\$2.8 million) only partly offset by lower volumes (-\$3.4 million). Focus on lowering the Group's cost of production remained a key priority and during the period significant progress was made in implementing the Efficiency Program announced in 2015. The EBIT growth in the period, delivered in challenging market conditions, demonstrates the resilience of the business and the benefits of diversification.

EBIT margins in the underlying businesses were well maintained. Although EBIT margins declined to 11.6% from 12.1%, this was primarily due to lower margins in the acquired businesses. Resin prices, in Australian dollar terms, were steady and costs were well controlled.

## Significant Items

Pre-tax significant items for the half year were an expense of \$5.4 million. This related to costs associated with the Efficiency Program (\$4.0 million), which the Group announced in FY2015, and acquisition costs (\$1.4 million).

## **Net Finance Expense**

Net financing costs for the period were \$15.5 million, a decrease of \$1.3 million versus the prior corresponding period. The reduction in net finance costs compared to the prior corresponding period reflect the beneficial impact of the refinancing completed in June 2015, the securitisation program, also established in June 2015, and reductions in market interest rates.

## **Income Tax Expense**

The income tax expense for the half year (including significant tax items) was \$17.2 million which represents an average tax rate of 29.2% of net profit before tax (pcp: 30.2%), in line with the statutory tax rates payable by the Group across its main operating geographies.

## **Net Profit after Tax**

Group net profit after tax attributable to shareholders for the first half was \$41.9 million compared to \$41.8 million in the prior corresponding period. Excluding significant items, net profit after tax attributable to shareholders was \$45.9 million, an increase of \$4.1 million over the pcp.

## **Balance Sheet**

Net debt at the end of the period was \$568.8 million. This was an increase of \$128.5 million versus 30 June 2015, impacted by funding requirements of \$79.8m for acquisitions (including \$72.6 million for Jalco and \$7.2 million deferred payment for Sulo), and an increase in working capital in line with the normal seasonal requirements of the business.

The Group's balance sheet remains strong, with net debt down by \$52.2 million (8%) versus 31 December 2014. Spend on acquisitions of \$90.7 million (including \$10.9 million on smaller bolt-on acquisitions late in FY2015), was more than offset by the benefit of the debtor's securitisation program (\$103 million) and other net cash inflows (\$39.9m).

Gearing (closing net debt / 12 month rolling EBITDA) at the end of the period was 2.7 times, which improved on 3.1 times at 31 December 2014, and was well within Management's target range. Current debt facilities comprise of a A\$590 million facility and a NZ\$180 million facility, each equally split between a tranche maturing in July 2018 and a tranche maturing in July 2020. Average tenor is 3.5 years. Unused facilities at 31 December 2015 were \$154 million.

### **Operating Cash Flow**

Statutory operating cash flow was \$21.8 million for the period, \$3.3 million lower than the prior corresponding period due to higher income tax and interest payments of \$11.3 million (payment timing), offset by proceeds from the securitisation program of \$6.1 million and stronger EBITDA performance.

## **Review of operations**

A\$ in millions	31 December 2015	31 December 2014	Change %
Sales Revenue			/ /
Pact Australia	509.0	451.1	12.8%
Pact International	179.2	183.9	(2.6%)
Total	688.2	635.0	8.4%
EBIT (before significant items) <sup>(1)</sup>			
Pact Australia	44.9	40.3	11.4%
Pact International	35.1	36.4	(3.6%)
Total	80.0	76.7	4.3%

<sup>(1)</sup> EBIT (before significant items) is a non-IFRS financial measure which is used to measure segment performance and has been extracted from the segment information disclosed in the Half Year Condensed Consolidated Financial Report. EBIT is calculated as earnings before finance costs, net of interest revenue, and tax.

#### Pact Australia

Pact Australia comprises the Group's operations in Australia where it has manufacturing plants in New South Wales, Victoria, Tasmania, Queensland and Western Australia. Pact Australia contributed 74% of the Group's total sales revenue in the first half of FY16.

Pact Australia achieved growth in both sales revenue and EBIT before significant items in the first half of the financial year.

Sales revenue grew by \$57.9 million compared to the prior corresponding period, or 12.8%, positively impacted by acquisitions. Excluding acquisitions, volumes were lower. Volume growth in the materials handling sector was offset by weaker demand from the agricultural and industrial sectors, impacted by unfavourable weather conditions and weaker mining markets, and the impact of net contract losses. Underlying demand was also subdued.

EBIT (before significant items) for the half was \$44.9 million, up \$4.6 million or 11.4% from the pcp. Earnings growth was delivered through acquisitions and efficiency improvements delivered through the 2015 Efficiency Program, which more than offset the impact of lower underlying volumes. EBIT margin at 8.8% was slightly lower than 8.9% in the prior corresponding period, negatively impacted by lower margins in the acquired businesses. Margins are expected to improve as integration is completed and cost synergies are delivered. Excluding acquisitions, underlying margins improved.

#### Pact International

Pact International comprises the Group's operations in New Zealand, China, the Philippines, Singapore, Indonesia and Thailand. Revenue sourced from these regions contributed 26% of the Group's total sales revenue in the first half of FY16.

Both sales revenue and EBIT were lower for Pact International in the first half of the year, largely due to weaker market conditions.

Sales revenue of \$179.2 million was \$4.7 million, or 2.6% down on the prior corresponding period. The business achieved higher volumes in the materials handling sector through the supply of industrial crates, and benefitted from favourable foreign currency translation impacts in the period. This was more than offset, however, by weaker demand from the agricultural, dairy and industrial sectors.

EBIT (before significant items) at \$35.1 million was down \$1.3 million, or 3.6% on the prior corresponding period, impacted by lower volumes and costs associated with the start-up of the new plant in Indonesia. EBIT margins remained strong at 19.6%, slightly lower than the 19.8% achieved in the pcp, impacted by unfavourable sales mix and start-up costs in Indonesia.

## **DIVIDENDS**

The Directors have determined to pay an interim dividend of 10.0 cents per ordinary share partially franked to 65%. This is 5.3% higher than the 9.5 cents interim dividend paid in FY2015.

The dividend is payable on 6 April 2016. The record date for entitlement to the dividend is 7 March 2016.

A 2015 final dividend of 10.0 cents per ordinary share franked to 65% per ordinary share was paid by the Company on 5 October 2015.

## NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### (a) Basis of preparation

The half year condensed consolidated financial statements for the six months ended 31 December 2015 have been prepared in accordance with AASB 134: *Interim Financial Reporting* and the *Corporations Act 2001*.

The half year condensed consolidated Financial Report does not include all of the information required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements as at and for the year ended 30 June 2015 and any public announcements made by the Group during the half year in accordance with the continuous disclosure obligations arising under the *Corporations Act 2001*.

The consolidated entity is of a kind referred to in ASIC Class Order 98/0100 dated 10 July 1998 and in accordance with that Class Order, amounts in the condensed consolidated Financial Report have been rounded off to the nearest \$1,000, unless otherwise specifically stated.

The accounting policies adopted are consistent with those of the previous financial year and prior corresponding half year reporting period, except as set out below:

## (b) New Accounting Standards and Interpretations

Australian Accounting Standards and Interpretations that have recently been issued or amended are outlined below. The Group has assessed whether there is a material impact on the condensed consolidated Financial Report for the half year, and also whether there is a requirement to restate prior year comparatives. The outcomes of this assessment are described below

## ▶ Accounting Standards and Interpretations which have been issued and are effective

There were no accounting standards applicable for the first time for the 31 December 2015 half year condensed consolidated Financial Report.

## Accounting Standards and Interpretations which have been issued but not yet effective

The following standards, interpretations and amendments below that have been issued but are not yet effective have not been early adopted by the Group as at 31 December 2015.

**AASB 9:** *Financial Instruments* - On 17 December 2014 the AASB issued the final version of AASB 9 and includes a logical model for classification and measurement, a single, forward-looking 'expected loss' impairment model and a substantially-reformed approach to hedge accounting. AASB 9 is effective for annual periods beginning on or after 1 January 2018. However, the Standard is available for early application.

The final version of AASB 9 introduced a new expected-loss impairment model that requires a more timely recognition of expected credit losses. Specifically, the new Standard requires entities to account for expected credit losses from when financial instruments are first recognised and to recognise full lifetime expected losses on a timely basis. It also includes the new hedge accounting requirements, including changes to hedge effectiveness testing, treatment of hedging costs, risk components that can be hedged and disclosures.

## For the period ended 31 December 2015

## NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Accounting Standards and Interpretations which have been issued but not yet effective (continued)

AASB 9 includes requirements for a simplified approach for classification and measurement of financial assets compared with the requirements of AASB 139.

The main changes are described below:

- Financial assets that are debt instruments will be classified based on (1) the objective of the entity's business model for managing the financial assets; (2) the characteristics of the contractual cash flows.
- ▶ Allows an irrevocable election on initial recognition to present gains and losses on investments in equity instruments that are not held for trading in other comprehensive income. Dividends in respect of these investments that are a return on investment can be recognised in the Consolidated Statement of Comprehensive Income and there is no impairment or recycling on disposal of the instrument.
- ► Financial assets can be designated and measured at fair value through the Consolidated Statement of Comprehensive Income at initial recognition if doing so eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities, or recognising the gains and losses on them, on different bases.
- Where the fair value option is used for financial liabilities the change in fair value is to be accounted for as follows:
  - The change attributable to changes in credit risk are presented in other comprehensive income (OCI)
  - The remaining change is presented in the Consolidated Statement of Comprehensive Income. AASB 9 also removes the volatility in the Consolidated Statement of Comprehensive Income that was caused by changes in the credit risk of liabilities elected to be measured at fair value. This change in accounting means that gains caused by the deterioration of an entity's own credit risk on such liabilities are no longer recognised in the Consolidated Statement of Comprehensive Income.

When applicable, this amendment is not expected to have a material impact on the Group.

AASB 2015-2: Amendments to Australian Accounting Standards – Disclosure Initiative: Amendments to AASB 101: Presentation of Financial Statements arising from the IASB's Disclosure Initiative project. The amendments are designed to further encourage companies to apply professional judgement in determining what information to disclose. For example, the amendments make clear that materiality applies to the whole of financial statements and that the inclusion of immaterial information can inhibit the usefulness of financial disclosures. The amendments also clarify that companies should use professional judgement in determining where and in what order information is presented in the financial disclosures.

When applicable, this amendment is not expected to have a material impact on the Group.

**AASB 15:** Revenue from Contracts with Customers - In May 2014, the IASB issued IFRS 15: Revenue from Contracts with Customers, which replaces IAS 11: Construction Contracts, IAS 18: Revenue and related Interpretations (IFRIC 13: Customer Loyalty Programmes, IFRIC 15: Agreements for the Construction of Real Estate, IFRIC 18: Transfers of Assets from Customers and SIC-31: Revenue—Barter Transactions Involving Advertising Services).

The core principle of IFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity recognises revenue in accordance with that core principle by applying the following steps:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Early application of this standard is permitted. The International Accounting Standards Board (IASB) has amended IFRS 15, to an application date of 1 January 2018 and will be applied by the Group commencing 1 July 2018. Management is assessing the impact of IFRS 15.

**IFRS16:** *Leases* – Issued January 2016. IFRS 16: *Leases* will replace IAS 17: *Leases*, and the new standard will be effective for annual periods beginning on or after 1 January 2019. Early application is permitted, provided the new revenue standard, IFRS 15: *Revenue from Contracts with Customers*, has been applied, or is applied at the same date as IFRS 16:

The key features of IFRS 16 are that for lessees they will be required to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee will be required to measure right-of-use assets similarly to other non-financial assets and lease liabilities similarly to other financial liabilities. Further, assets and liabilities arising from a lease will be initially measured on a present value basis. The measurement includes non-cancellable lease payments (including inflation-linked payments), and also includes payments to be made in optional periods if the lessee is reasonably certain to exercise an option to extend the lease, or not to exercise an option to terminate the lease.

## For the period ended 31 December 2015

## NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

## Accounting Standards and Interpretations which have been issued but not yet effective (continued)

IFRS 16: Leases also contains disclosure requirements for lessees.

For lessors, IFRS 16 substantially carries forward the lessor accounting requirements from IAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently. Further, IFRS 16 also requires enhanced disclosures to be provided by lessors that will improve information disclosed about a lessor's risk exposure, particularly to residual value risk.

Management is assessing the impact of IFRS 16.

Patents, trademarks and licences are carried at cost less accumulated amortisation and accumulated impairment losses. They have a finite life and are amortised using the straight line method over their useful life.

## Intangible assets arising on acquisition

Goodwill acquired in a business combination is initially measured at cost being the excess of the consideration paid over the Group's interest in the net fair value of the acquired identifiable assets, liabilities and contingent liabilities.

Following initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is reviewed for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired.

For the half year, there were no indicators of impairment and no impairment losses recognised.

## Make good on leased premises

In accordance with the form of lease agreement, the Group may be required to restore the leased premises to their original condition at the end of the lease term and upon exiting the site. The provision is based on the costs which are expected to be incurred using historical costs as a guide.

### Jalco Group

On 1 September 2015 the Group purchased 100% of the issued capital of Jalco Group Pty Limited and the following controlled entities: Jalco Automotive Pty Limited, Jalco Powders Pty Limited, Jalco Plastics Pty Ltd, Jalco Australia Pty Limited, Jalco Care Products Pty Limited, Packaging Employees Pty Limited, Jalco Cosmetics Pty Limited, and Jalco Promotional Packaging Pty Limited (Jalco). Jalco is a leading supplier of outsourced manufacturing, filling and packing in the non-food FMCG sector for a purchase consideration of \$78.8 million. The acquisition is part of the Group's overall strategy to deepen its existing FMCG customer relationships and to enter new areas of growth serving customers in this sector

Provisional goodwill of \$40.0 million has arisen as a result of the purchase consideration exceeding the fair value of identifiable net assets acquired. Goodwill is allocated to the Pact Australia reportable segment.

The fair value of Jalco's trade and other receivables acquired amounted to \$30.0 million. None of the trade receivables were impaired and it was expected that the full contractual amounts would be collected.

At 31 December 2015, the Group hedged 84% (2015: 91%) of its foreign currency purchases for which purchase orders existed at the reporting date.

#### Counterparty security risk

As the Group does not seek security from the counterparties with whom it enters into derivative financial instruments, the Group also considers the risk of counterparty non-performance. As at 31 December 2015 the Group assessed this risk to be insignificant.

### Fair value

Financial assets and liabilities are included at fair value which is the amount the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The Group's financial instruments measured at fair value comprises of derivatives only. The Group enters into derivative financial instruments with various counterparties, principally financial institutions with investment grade or better credit ratings. These derivatives are not quoted in active markets. The Group therefore uses valuation techniques such as present value, comparison to similar instruments for which market observable prices exist and other relevant models used by market participants. These valuation techniques use both observable and unobservable market inputs, of which the unobservable market inputs are considered to be insignificant. These inputs include current spot rates, forward rates and implied yield curves.

#### Fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- (i) Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- (ii) Level 2: other techniques for which all inputs that have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- (iii) Level 3: techniques that use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

To the members of Pact Group Holdings Ltd

## Report on the Half-Year Financial Report

We have reviewed the accompanying half-year financial report of Pact Group Holdings Ltd, which comprises the condensed statement of financial position as at 31 December 2015, the condensed statement of comprehensive income, condensed statement of changes in equity and condensed statement of cash flows for the half-year ended on that date, notes comprising a summary of significant accounting policies and other explanatory information, and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the half-year end or from time to time during the half-year.

## Directors' Responsibility for the Half-Year Financial Report

The directors of the company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal controls as the directors determine are necessary to enable the preparation of the half-year financial report that is free from material misstatement, whether due to fraud or error.

## Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2015 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Pact Group Holdings Ltd and the entities it controlled during the half-year, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*. We have given to the directors of the company a written Auditor's Independence Declaration, a copy of which is included in the Directors' Report.

- a) giving a true and fair view of the consolidated entity's financial position as at 31 December 2015 and of its performance for the half-year ended on that date; and
- b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.
