KEY INVESTMENT RISKS – SUMMARY

Please read and consider this Prospectus in full and in conjunction with any specific matters which have or may be referred to in the Company's ASX announcements before deciding to apply for New Shares, exercise existing options or to invest in the Company. In particular, the risks described in Section 5 include risk areas considered specific to the Company that are summarised below.

- The markets for both information technology and social media management software are highly competitive. The Company faces potential competition from businesses that are either owned or affiliated with large information technology market players that can pursue aggressive strategies to capture market share. The Company can have little influence or control over the activities or actions of competitors. The potential actions of competitors to capture market share may be detrimental to future revenue and/or profitability, planned growth and the underlying financial condition of the Company. A key risk is that the Company may not maintain differentiation from its competitors. There is potential that the maturation of the market may cause downward pressure on pricing.
- The Company must constantly adapt its social media management software to be compatible with developments in existing social media platforms and the emergence of new social media platforms. The rapid expansion of social media, including the introduction of new social media platforms, creates an environment where unforeseen change occurs quickly, making it difficult for the Company to adapt its services to cope. There is a risk the Company's service may become less effective if it cannot keep up with the progression of the social media market through accommodating changes to existing social media platforms or failing to integrate with new social media platforms.
- Hackers may, without authorisation, infiltrate the Company system to obtain data or insert a cyber-virus or bug to disrupt or affect the Manalto software or otherwise affect systems using the Manalto software. Such action could compromise client data and cause service shutdown, leading to customer dissatisfaction and a loss of goodwill.
- The Company relies on third parties for aspects of the operation and delivery of software, for example, cloud based hosting providers. There is a risk a third party may no longer be capable of providing services or refuse to provide services without increased licence fees or other payment.
- The Company is reliant on the talent and expertise of its personnel. The loss of key personnel, or various other personnel, may adversely affect the operation. There is a further risk that, where development staff with knowledge of the technology and business leave the Company, that knowledge will be lost with their departure. This risk involves departing staff potentially having information in respect of the Company's intellectual property or business which has commercial value to the Company, as well as the costs of replacing departing staff and training new staff.
- A lack of knowledge of information availability may impede or even prevent uptake by businesses of social media management technology. Conversely, large, centrally-controlled businesses with awareness of the need and options for managing a growing social media presence tend to develop a program through internal staff where all decisions are made by head office. The Company primarily targets multi-location/multi-brand organisations, such as franchise businesses, who have a fragmented social media presence and desire a local level of participation in decision making.
- In a dynamic market experiencing considerable growth there is a risk the Company may not establish a meaningful market share or position before its competitors. The ability to effectively market efficient technical solutions to an emerging customer base is just as important for the Company as developing such solutions. The Company needs to employ effective direct and indirect marketing strategies to avoid having a potentially successful product beaten to the market by competitors.
- Although the Company has applied for a provisional patent in respect of its social media management software, a full patent application is yet to be filed. Once filed, there can be no assurance that it will be accepted without variation, or at all. The granting of intellectual property protection, such as a

registered patent, does not guarantee rights of other patents are not infringed, that competitors will not develop technology avoiding the patent or that third parties will not seek to claim an interest in the intellectual property to seek commercial benefit from the Company. There is a risk of competition obtaining and sustaining protection of intellectual property, which given its complexity, can lead to expensive and lengthy disputes for which there can be no guaranteed outcome.

Even if the Company obtains protection of intellectual property there is no certainty it would be notified of an infringement or be in a financial position to pursue necessary remedial action in the event of a breach. There further can be no assurances that employees, consultants or third parties will not breach confidentiality, or infringe or misappropriate the Company's intellectual property.

- The Company is raising funds in Australian dollars. It is expected the primary market for Manalto software will be the USA for the short to medium term. This means the Company expenditure and revenue will be primarily received and made in US dollars. Consequently, the Company may be adversely affected by fluctuations in the US dollar and Australian dollar exchange rates, including risks on conversion to US dollars.
- The Company does not have a significant record of activities or performance. It has not generated profits and is reliant on raising capital to fund its activities.

In addition to the above specific risks, there are other risks of a more general nature (such as general economic risks and market conditions) that apply to investment in the Company. Please read and consider the risks outlined in Section 5 before making any decision regarding applying for Shares under the Offer.

If ASX does not grant permission for the Official Quotation of either tranche of the New Shares within 3 months after the date of issue of this Prospectus (or such period as is permitted by the Corporations Act), the Company, in its absolute discretion, will either repay the application monies in respect of that tranche to Applicants without interest or (subject to any necessary ASIC or ASX waivers or consents being obtained) issue a supplementary or replacement Prospectus and allow applicants one month to withdraw their application in respect of that tranche and be repaid their application monies in respect of that tranche without interest.

1.4 Minimum subscription

There is no minimum subscription for New Shares under the Offer.

1.5 Issue of New Shares after Closing Date

The Board reserves the right to issue New Shares in response to applications received after the Closing Date.

Issue of shares under the placement is being conducted in two tranches. 24,500,000 shares, representing the Company's 25% capacity, were issued on 18 December 2015 (**Tranche 1 Placement Shares**). 19,714,286 shares, representing the remainder of the placement shares, shareholder approval for the issue of which was obtained at the general meeting of the Company held on 23 February 2016, are anticipated to be issued on or about 7 March 2016 (**Tranche 2 Placement Shares**).

2. Purpose and effect of the Offer

2.1 Purpose of the Offer

The purpose of this Prospectus and the Offer made under it is to comply with section 708A(11) of the Corporations Act so that New Shares can be offered for sale within 12 months of their issue.

The Tranche 2 Placement Shares are to be issued without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date.

Generally, section 707(3) of the Corporations Act requires a prospectus be issued for an entity to whom securities were issued without disclosure under Part 6D of the Corporations Act to offer those sales within 12 months of issue.

Section 708A(11) of the Corporations Act provides an exemption from this general requirement where:

- (a) The relevant securities are in a class of securities of the Company that are quoted securities of the body; and
- (b) A prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued.

This Prospectus has been prepared to facilitate secondary trading of Shares issued prior to the Closing Date.

The Company anticipates that approximately \$1,380,000 will be raised from the conduct of the Offer and issue of the Tranche 2 Placement Shares in combination (before costs).

5. Risks

The Shares offered under this Prospectus are considered speculative. There are various factors, both specific to the Company and general, which may affect the future operating and financial performance of the Company and the value of any investment in the Company.

Some of these factors can be mitigated through safeguards and appropriate commercial action and controls. However, many are outside the control of the Company and therefore cannot be mitigated. There are also general risks associated with share investment. Hence, investors should be aware that the performance of the Company may be affected and the value of its Shares may rise or fall over any given period.

This section describes certain (non-exhaustive) risks associated with investment in the Company. Prior to making an investment decision, prospective investors should carefully consider the following risk factors, as well as all other information contained in this Prospectus.

5.1 Specific Risks

(A) Competition Risk

The Company is competing in both the market for information technology and social media management software. Both markets are competitive, with a number of businesses that are owned or affiliated with information technology market players being direct competitors. These businesses have capacity to adopt aggressive strategies to capture market share.

The Company can have little influence or control over the activities or actions of its competitors. Actions by competitors to capture market share may negatively affect future revenue and/or profitability, planned growth and the overall financial condition of the Company.

In this competitive environment the key risk for the Company is that it may not maintain differentiation from its competitors and an appreciable market share. As the market matures there is a risk of downward pressure on pricing. Although the Company seeks to keep its services as a highly scalable, cost effective offering, thereby placing it in a defensive position against potential reductions, it is nonetheless vulnerable to an increase in competition that may lead to a sustained and material drop in price.

(B) Technology Risk

Technology Risk - Industry

The Company must continually adapt its social media management software to be compatible with both developments in existing social media platforms and emerging social media platforms. The rapid growth of social media, in particular the introduction of new social media platforms, creates an environment where unforeseen change can occur quickly, making it difficult for the Company to adapt its services to cope. There is a risk of the Company's services having reduced effectiveness if it is unable to maintain progression with the social media market generally, cannot adapt to accommodate changes in existing social media platforms or cannot integrate with new social media platforms.

Technology Risk - Security

The Company could suffer unauthorised infiltration of its system by hackers to obtain data or insert a cyber-virus or bug. This may disrupt or affect the Manalto software or otherwise affect the system of outlets using Manalto software. Such actions could compromise client data and cause service shutdown, leading to customer dissatisfaction and loss of goodwill. The Company, and the service providers on which it relies to provide cloud-based infrastructure, employ practices to protect its systems from being compromised. Further processes are in place to reduce the prospect of a cyber-virus or bug being introduced to the Company's services and these processes are regularly reviewed

for improvement. The Company works with its cloud-based hosting service to ensure daily backups are made of client data, ensuring capability of retrieval within one (1) to two (2) days if required.

Technology Risk – Third Party Reliance

To some extent, the Company relies on third parties for key aspects of operation and delivery of its software. There is risk a third party may no longer be capable of providing services, or refused to provide services without increased license fees or other payments. The Company's strategy is to avoid dependence on singular third party technology by, where possible, using standardised open source or royalty-free tools and libraries. The Company intends to evolve its platform so that the loss of a third party service provider would not create a significant impact or it would be in a position to use an alternative service provider.

(C) Personnel

The Company is dependent on the talent and expertise of its personnel. The loss of key personnel, or various general personnel, may adversely affect the Company's service. There is also a risk that, where there is turnover of development staff with knowledge of the technology and business, that knowledge will be lost upon their departure. This involves the risk that those staff who leave have information of the Company's intellectual property or business which has a commercial value to the Company. There are further costs of replacing staff who leave and training new staff.

The Company seeks to mitigate these risks by maintaining remuneration arrangements and good relationships with key personnel. In addition, employment contracts used by the Company contain provisions with respect to intellectual property and confidentiality, limiting potential losses resulting from departure of key personnel. Further, although Manalto software will continue to develop, the initial substantive development work has been completed and, accordingly, loss of key development staff would have less impact than if the Company were in the early phases of software development.

(D) Market Risk

The social media management sector in which the Company operates is a relatively undeveloped market. As such, it is difficult to ascertain or gauge the level of knowledge and confidence in the market or its size and growth potential. A lack of knowledge or information availability may impede or even prevent business uptake of social media management technology. Conversely, large centrally controlled businesses who are aware of the need and options for managing a growing social media presence tend to adopt an internally developed capacity, with decisions and actions being made at head office. The Company primarily targets multi location and/or multi brand organisations, such as franchise businesses, who have a fragmented social media presence and desire for local participation in decision making.

There is risk in a fast growing and dynamic market that the Company may not be able to establish a meaningful market share prior to its competitors. It is just as important to market effectively to an emerging customer base before competitors as it is to provide an efficient technical solution. The Company needs to employ effective direct and indirect marketing strategies to avoid having a potentially successful product beaten to the market by more efficient competitor marketing.

(E) Intellectual property risk

Although the Company has applied for a provisional patent in respect of its social media management software, a full patent application is yet to be filed and, once filed, there can be no assurance it will be accepted without variation, or at all. Furthermore, the granting of intellectual property protection, such as a registered patent, does not guarantee that the rights of others are not infringed, that competitors will not develop technology to avoid the patent or that third parties will not seek to claim an interest in the intellectual property, with a view of seeking commercial benefit from the Company. There is also risk of competition in obtaining and sustaining protection of intellectual

property, which given its complex nature, can lead to expensive and lengthy dispute where the outcome is not guaranteed. Even if the Company obtains protection of intellectual property through patents, there is no certainty it would be notified of infringement or be in a financial position to pursue necessary remedial action in the event of a breach.

There can be no assurance that employees, consultants or third parties will not breach confidentiality, infringe or misappropriate the Company's intellectual property. The Company seeks to mitigate the risk of unauthorised use of its intellectual property by limiting disclosure of sensitive material to particular employees, consultants, and others on a need-to-know basis. Where appropriate, parties with potential access to such sensitive material will be required to provide written commitments as to confidentiality and ownership of intellectual property.

(F) Currency risk

The Company is raising funds in Australian dollars. In the short to medium term it is expected that the primary market for Manalto software will be the United States of America. Therefore, the Company's expenditure and revenue will predominantly be received and made in US dollars. As a result, the Company may be adversely affected by fluctuations in the US dollar and Australian dollar exchange rates, including risks on conversion of funds received to US dollars.

(G) No significant record of activities, revenue or profits

The Company does not have a significant record of activities or performance. Prior to March 2015 Manalto's business was conducted by Manalto Inc (a US company). Manalto Inc is now a subsidiary of the Company. Manalto Inc commenced its activities in November 2013. Neither Manalto Inc nor the Company generated profits. Revenues have not been sufficient to pay operating and other costs, and there is no certainty that revenues will necessarily increase, costs be reduced or profits be achieved in a foreseeable period or at all. The Company is therefore reliant on its ability to raise capital to fund its operations and expenditure.

5.2 General Risks

(A) Additional Requirements for Capital

Depending on the ability of the Company to generate revenue from its operations, the Company may require further financing in addition to amounts raised under the Offer. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company cannot obtain additional financing as needed, it may be required to reduce scope of operations.

(B) Litigation risks

The Company is exposed to possible litigation risk including contractual disputes, occupational health and safety claims and employee claims. The Company may be involved in disputes with other parties in the future, potentially resulting in litigation. Any such claim or dispute, if proven, may adversely impact the Company's operations, financial performance and financial position.

(C) Liquidity

There can be no assurance there will be, or continue to be, an active market for Shares or that the price of Shares will increase.

(D) Economic risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may adversely affect the Company's activities, as well as its ability to fund those activities. Further,

share market conditions may affect the value of Company securities regardless of the Company's operating performance. Share market conditions are affected by many factors, such as:

- general economic outlook;
- interest rates and inflation rates;
- currency fluctuations;
- changes in investor sentiment toward particular market sectors;
- the demand for, and supply of, capital; and
- terrorism or other hostilities.

(E) Taxation

There may be tax implications arising from applications for New Shares, the receipt of dividends both franked and unfranked (if any) from the Company, participation in any on-market buy-back and on the future disposal of Shares.

5.3 Investment speculative

The above risk factors ought not to be taken as an exhaustive list of the risks faced by the Company or its Manalto software business, or by investors in the Company. The above risk factors, and others not specifically referred to above, may materially affect the future financial performance of Company and the value of securities offered under this Prospectus.

The shares to be issued pursuant to this Prospectus carry no guarantee with respect to payment of dividends, returns of capital or market value. The company does not expect to declare any dividends in the short to medium term.

Potential investors should consider investment in the Company as highly speculative and consult their professional advisers before deciding whether to apply for shares offered under the Prospectus.

6. Acceptance Instructions

6.1 Completing an application form

Any applications for New Shares under the Offer contained within this Prospectus must be made on the Personalised Application Form accompanying this Prospectus in accordance with the instructions set out in the form. Payment must be made in accordance with the instructions set out in the form, or as arranged with the Lead Manager, Bell Potter.

Prior to lodging a completed Personalised Application Form and making payment, ensure you have read this Prospectus and the Personalised Application Form in their entirety and seek professional advice if necessary.

An application for New Shares or payment may not be effective if received after the time specified in the Personalised Application Form on the Closing Date (or by such later time or date as may be agreed with the Lead Manager or the Company may specify), in which case no New Shares would be issued to you in respect of your application or payment, and any payment received will be refunded to you after the date of allotment in accordance with the Corporations Act, without interest.

The amount payable will be deemed not to have been received until receipt of cleared funds. Payments in cash will not be accepted.

If payment received is insufficient to pay in full for the number of New Shares you have applied for you may be taken to have applied for such whole number of New Shares which is covered in full by your payment, or your application may be rejected (without prejudice to any rights of the Company or the Lead Manager to recover unpaid sums).

If payment exceeds the number of New Shares applied for you will be taken to have applied for the number of shares outlined on the completed Personalised Application Form that you lodge. In the case of overpayment, the difference between the amount paid and cost of New Shares issued will be refunded to you without interest after the date of allotment in accordance with the Corporations Act.

You should be aware that your financial institution may implement earlier cut off times with regards to electronic payments, and should therefore take this into consideration when making payment. You may also have your own limit on the amount that can be paid by electronic transfers. It is your responsibility to check that the amount you wish to pay does not exceed your limit. The Company and the Share Registrar accept no responsibility for unsuccessful, delayed, or incomplete transfers or payments.

To apply for New Shares you should:

- read this Prospectus and the Personalised Application Form in their entirety and seek appropriate professional advice if necessary; and
- complete the Personalised Application Form which accompanies this Prospectus (instructions for completing and returning the Personalised Application Form are set out on the form); and
- return the completed Personalised Application Form and pay the applicable amount (being the offer price of 7 cents (\$0.07) per New Share multiplied by the number of New Shares for which you are applying for) to Bell Potter in accordance with the instructions in the Personalised Application Form so that it is received by no later than the time specified in the Personalised Application Form on the Closing Date, or such later date as the Company may specify. The Company and the Lead Manager, Bell Potter, accept no responsibility for delayed or misdelivered application forms or payments.

Cheques should be made payable to “Manalto Limited” and crossed “Not Negotiable”. Cheques must be payable in Australian dollars, drawn on an Australian branch of an Australian bank.

6.2 **Further Information**

If you have any questions about the Offer please contact the Lead Manager, Bell Potter (Les Owen +61 2 9255 7442 or Nick Reid +61 2 9255 8127). Alternatively, contact your stockbroker or other professional adviser.

The issue of any New Shares is expected to occur after the Offer has closed on or before the dates set out in the timetable on page 4 of this Prospectus (which date may change without notice). Thereafter statements of holdings relating to any issued New Shares will be despatched. It is the responsibility of recipients to determine their allocation prior to trading in New Shares. Recipients trading New Shares before they receive their statements do so at their own risk.

The Company may reject an application where payment of the application amount is not received or a cheque is not honoured, or without prejudice to its rights, issue New Shares in response to the application and recover outstanding application amount from the recipient. If your Personalised Application Form is not completed correctly it may still be treated as a valid application for New Shares. The Directors' decision whether to treat a form as valid and how to construe, amend or complete the form is final. The Company accepts no responsibility for failure by your stockbroker or other third parties to carry out your instructions.

This Prospectus does not constitute an offer in any place in which, or to any person to whom, it would not be lawful to make such an offer. Persons resident in countries outside Australia should consult their professional advisers as to whether governmental or other consent are required or whether formalities need

to be observed for them to acquire new Shares. Return of a Personalised Application Form or payment will be taken by the Company to constitute a representation that there has been no breach of such requirements.

No account has been taken of the particular objectives, financial situation or needs of recipients of this Prospectus. Because of this, recipients of this Prospectus should have regard to their own objectives, financial situation and needs.

Recipients of this Prospectus should make their own independent investigations and assessment of the Company, its business, assets and liabilities, prospects and profits and losses, and the risks associated with investing in the Company. Independent expert advice should be sought before any decision is made to accept the Offer, or to acquire New Shares or other securities of the Company.

7. Continuous Disclosure Obligations

This Prospectus is issued by the Company in accordance with the provisions of the Corporations Act applicable to a prospectus for continuously quoted securities.

Section 713 of the Corporations Act enables a company to issue a special prospectus where the securities under that prospectus are continuously quoted securities within the meaning of the Corporations Act. This generally means that the relevant securities are in a class of securities that were quoted enhanced disclosure securities at all times during the 3 months before the date of this Prospectus and that other requirements relating to the Company not being subject to various exemptions and orders under the Corporations Act within the last 12 months are met.

In summary, special prospectuses are required to contain information in relation to the effect of the offer of securities on the company and the rights and liabilities attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company. Accordingly, this Prospectus does not contain the same level of disclosure as a prospectus of an unlisted company or an initial public offering prospectus.

Having taken such precautions and having made such enquiries as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 12 months before the date of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

For the purpose of satisfying section 713(5) of the Corporations Act a prospectus must incorporate information if such information:

- (a) has been excluded from a continuous disclosure notice in accordance with the ASX Listing Rules; and
- (b) is information that investors and their professional advisors would reasonably require for the purpose of making an informed assessment of:
 - the assets and liabilities, financial position and performance, profit and losses and prospects of the Company; and
 - the rights and liabilities attaching to the securities being offered.

The Prospectus must contain this information only to the extent to which it is reasonable for investors and their professional advisors to expect to find such information in the Prospectus. The Company is not aware of any matters that need to be disclosed under this section of the Corporations Act that have not been previously disclosed or which have not been set out in this Prospectus.

The Company seeks and engages in discussions on an ongoing basis in respect of potential new investment opportunities both in Australia and overseas. Funds may be used to fund the costs associated with identifying, investigation and pursuing new opportunities. While the Company continues to seek and negotiate potential investment opportunities in this respect, there is no certainty that any arrangement(s) will be finalised on

particular terms, at a specific time, or at all. The Company will make further announcements in respect of any such discussions or negotiations in accordance with its disclosure obligations as developments occur.

As a disclosing entity under the Corporations Act, the Company is subject to regular reporting and disclosure obligations. Copies of documents lodged with ASX and ASIC in relation to the Company may be obtained from or inspected by accessing the respective web sites.

Any person may request, and the Company will provide free of charge, a copy of each of the following documents during the application period of this Prospectus. Such documents are also available on-line from the ASX web site.

Continuous disclosure notices given by the Company since the lodgement of the Annual Financial Report to the date of this Prospectus are listed in Section 8 of this Prospectus.
