ASX ANNOUNCEMENT

MVP's new manufacturing technology declared a success

Medical Developments International Limited (ASX: MVP) is delighted to announce that its new manufacturing technology, developed in partnership with the CSIRO, has successfully completed its final technical requirement.

MVP CEO Mr. John Sharman said: "This new manufacturing technology will help change the face of our company. It provides us with significant production capacity improvements in terms of our ability to supply Pentrox, as well as delivering significant cost savings. This is an important milestone as the company continues to expand the footprint of Pentrox globally."

Mr. Sharman said "We are building a new production facility which will incorporate our new manufacturing technology. We have finalised the design of our facility and we expect construction to commence in the coming months. Once construction is completed, the new process and facility will need to be registered with the TGA. We expect to achieve this during 2016."

**About Pentrox**

Penthrox is a fast onset, non-opioid analgesic indicated for pain relief by self-administration in patients with trauma and those requiring analgesia for surgical procedures. Penthrox has been used safely and effectively for more than 30 years in Australia with excess of 5.0 million units sold. There is growing interest in Penthrox being used in patients undergoing investigatory procedures, as well as operational procedures such as colonoscopy.

About Medical Developments International Ltd

MVP is an Australian company delivering emergency medical solutions dedicated to improving patient outcomes. MVP is a leader in emergency pain relief and respiratory products. The Company manufactures Penthrox®, a fast acting trauma & emergency pain relief product. It is used in Australian Hospitals including Emergency Departments, Australian Ambulance Services, the Australian Defence Forces, Sports Medicine and for analgesia during short surgical procedures such as Dental and Cosmetic surgery as well as in other medical applications.
