Mach7 Signs Distribution Agreement in South Africa to Deliver Monthly Revenue

- **Mach7 enters into 5-year distribution agreement with the leading diagnostic solutions provider in South Africa, IntriHEALTH**
- **IntriHEALTH to distribute Mach7 Enterprise Imaging Platform initially across 40 diagnostic imaging sites throughout South Africa**
- **Mach7 to generate USD monthly revenue based on number of diagnostic images**

3D Medical Limited (ASX:**3DM**) (**3D Medical** or the **Company**) is pleased to announce that Mach7 Technologies has signed a 5-year distribution agreement (**Agreement**) with IntriHEALTH®.

IntriHEALTH selected Mach7 Enterprise Imaging Platform as the underlying software technology to provide standardisation, scalability and next generation VNA (Vendor Neutral Archive) functionality to its hosted medical image management platform that serves its existing base throughout South Africa.

Mach7 Enterprise Imaging Platform delivers enterprise-level medical image management capabilities, with fully-integrated mobile image capture, workflow management, reporting and referral portal functionality that can be distributed by IntriHEALTH as a hosted solution to its customer base of 40 clinical sites.

IntriHEALTH currently supports more than 300 medical practitioners who are using the solution daily across South Africa making IntriHEALTH the largest single database of clinical images in South Africa, with over 2 million studies archived to date.

Under the Agreement, Mach7 will generate licence revenue to be paid monthly in USD from IntriHEALTH calculated under a pay-per-procedure revenue model. The licence fee is charged on each procedure ingested into the Mach7 platform and the agreed rate-per-procedure is within the example pricing previously described by the Company in its announcement on 3 March 2016.

The Agreement provides Mach7 with regular annuity-style revenue over the initial 5-year term; establishes a significant clinical footprint across South Africa and provides a highly-scalable solution to IntriHEALTH that can be easily rolled out to new clinical sites as they come on-board.

The combination of annual pre-agreed rate increases under the Agreement, a growing volume of medical image studies from existing clinical sites and the prospect of new clinical sites joining IntriHEALTH's hosted platform over the term of the Agreement, assures the Company of incremental year-on-year revenue growth.

Mr Mike Simpson, CEO of IntriHEALTH said: "Mach7 provides superior technology to solve the critical needs of our customers and patients in Africa. Advancing enterprise imaging through the use of technology is gaining rapid adoption among providers across Africa. Our integration and implementation experience with Mach7 has been both swift and seamless, a testament to the technology and support teams at Mach7."

About 3D Medical Limited:

At 3D Medical our aim is to aid medical professionals in the facilitation of improved clinical care, improving medical procedures, diagnostics and ultimately improving patient outcomes. 3D Medical is a medical specific 3D printing and holographic projection and data integrations provider. Our services comprise 3D Medical Printing; EchoPixel (holographic projection technology); GestSure (in surgery image control); and Mach7 (enterprise imaging solution provides healthcare organisations with the ability to archive, consolidate, access, and share medical imaging data across departments, locations and regions). These new and innovative products leverage data already captured by conventional imaging modalities and apply it in more meaningful ways to deliver improved economic and patient outcomes. On 27 January 2016, 3D Medical announced that it had entered into a binding Share Sale Agreement with Mach7 Technologies. Subject to shareholder approval, and upon successful completion of the merger, 3D Medical will change its name to Mach7 Technologies.

About Mach7 Technologies:

Mach7 Technologies is a global provider of enterprise image management systems that allow healthcare enterprises to easily identify, connect, and share diagnostic image and patient care intelligence where and when needed. Mach7's award-winning platform delivers image management including rapid record identification, integration, synchronisation and routing, advanced clinical viewing, and optimized vendor neutral archiving. Mach7 has locations in the U.S., Asia, Australia, Africa and the Middle East. For more information, visit www.mach7t.com
