## **Suspension of Trading**

**Dear Dave**

Further to our advice provided on 6 May 2014, the Board of Alcyone Resources would like to advise that the previously announced material fundraising transaction remains in process but is not yet complete.

The Company is in discussions with a number of parties and is taking the appropriate time to consider its available options. An update to the market will be provided as soon as a material transaction is completed.

The leaching operations at the Twin Hills mine site in Texas, Queensland have reached the point where it is no longer economic to continue production without a fresh supply of ore. As a result the operation has been placed on care and maintenance until funding becomes available.

The company's securities will remain suspended until the direction of the company has been clarified and a material fundraising transaction completed, at which time all outstanding compliance requirements will be met. The Company anticipates lodging an announcement to ASX regarding the proposed transaction, and its half year financial statements, on or prior to 26 July 2014. This is expected to result in the lifting of the suspension on Friday 27 July under ASX Listing Rule 17.5.

Yours faithfully,  
ALCYONE RESOURCES LIMITED
