About Anatolia Energy

Anatolia has a 100% interest in the Temrezli uranium project. We are Turkey's foremost uranium exploration company and hold 18 Exploration Licences most of which are located within a 40km radius of the Temrezli deposit.

The Project is located within one of Turkey's key uranium regions, is close to established infrastructure and includes the Temrezli uranium deposit, one of Turkey's largest and highest grade uranium deposits, with a JORC compliant Mineral Resource Estimate of 13.28Mlb of contained uranium at a grade of 1,157ppm (0.115%) eU₃O₈.

The mineral resource is as follows;

Category	Tonnes (kt)	Average Grade (ppm eU ₃ O ₈)	Contained Metal (lb eU ₃ O ₈)
Measured	2,008	1,378	6,100,000
Indicated	2,178	1,080	5,185,000
Inferred	1,020	888	1,997,000
Total	5,206	1,157	13,282,000
Cut-off Grade of 200ppm U₃O₈			

Information regarding an updated Preliminary Economic Assessment (PEA) on the Temrezli deposit was released to the market via ASX on 12 and 19 May 2014 which indicated robust economics with a NPV (8% DCF) of US\$186.5 and IRR of 109%. The expected upfront capital costs are US\$30.2M, with cash operating costs of US\$20.22 / lb for a 10 year life of mine producing over 9.2M lbs U₃O₈.

Pursuant to ASX Listing Rule 5.23 the Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements made on 12 and 19 May 2014, and in the case of estimates of mineral resources or ore reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed.
