

QUARTERLY REPORT FOR THE PERIOD ENDING 30thJUNE 2014

HIGHLIGHTS

- > FYI Thailand potash strategy advances
- > Targeting high grade, large tonnage, shallow potash deposits
- Further Special Prospecting Licence areas applied for
- Board and management site visit
- Board and management changes
- Successful interim financing completed
- Project development pipeline developed

REVIEW OF OPERATIONS JUNE QUARTER 2014

Thailand Potash

FYI continues its commitment to the Thailand Potash strategy and believes the aggregated potash portfolio to have the potential to be world class.

As previously reported, a further 6 Special Prospecting Licence (SPL) application areas were finalised based on the recommendation of the Company's in-house local management group after receiving encouraging reviews of prospective target areas.

The new tenement areas are in the North East part of Thailand and cover an area of approximately 90 km² and will complement the current West Mekong project by providing a project pipeline for FYI in terms of timing of exploration activity.

In preparation for the West Mekong SPL approvals and the subsequent commencement of exploration activities, 2 board members of FYI undertook a country visit for a project strategy briefing with the in-country management team and also to familiarise themselves with the assets, the perceived country risk and regulatory environment.

Project Review

The in-country management group presented a technical and strategic review of the Thai potash industry and of the company projects to the visiting board members. The review highlighted the technical merit, potential quality and project/industry advantages that the Thai potash portfolio represents.

Sovereign Risk

The board's assessment of the apparent sovereign risk arising from the recently imposed military law is that the actual in-country impact is minor, and if anything, is mildly positive. The impartiality of the temporary governing army allows bureaucratic functions and civil activities to continue in a normal fashion without being interrupted by opposing political parties and their supporting disruptive factions.

Regulatory Environment

Following a meeting with senior personnel at a tier one international legal and accounting firm in Bangkok, the visiting board members were satisfied that Thailand is a commercially suitable and secure jurisdiction under which to operate in the short and long term.

The outcome of the visit resulted in an renewed endorsement and support for the Potash strategy by the FYI board.

Strategy Progress

During the June Quarter, a number of key events were achieved, being:

- o FYI non-executive Board and management country visit
- Project pipeline developed in conjunction with the in-country management team
- ESM SPL project area applications submitted
- o exploration and development strategy outlined with the local technical and administration team
- Finalised the requisite local company and industrial relations agreements
- Structured and registered a local operating Company "East Siam Minerals Ltd"

Board Changes

FYI have affected a number of board changes to address the change in the Company's corporate direction and expected increase in activity as well as to accommodate the personal requirements of some of the members.

Due to an increase in his executive work commitments with another listed company, the past non-executive Chairman, Dr David Sparling resigned in favour of the now Chairman, Mr Edmund Babington. We would like to thank Dr Sparling for his many years of dedicated service to FYI and wish him the best in the future.

FYI will benefit from Mr Babington's legal and corporate experience at an important juncture in the Company's development.

Roland Hill was formally appointed to the position of Managing Director from CEO to facilitate an increase in responsibility in parallel with the anticipated increased level of technical and corporate activity.

Capital Raising

FYI successfully completed an equity raising of \$250,000 via the issuance of 5,000,000 shares at \$0.05 cents per share. The proceeds of this capital will be used towards the ongoing development of the Thai potash strategy.

Capital Preservation

The management of FYI are committed to maximising shareholder value and are very conscious of minimising expenditure – especially in these difficult market conditions. As such – the Board and management have taken commensurate steps in sacrificing a proportion of their remuneration and fees to support FYI and itsThai potash strategy.

Yarlarweelor

No field work was undertaken during the quarter.

Corporate Activities

Since committing to the Potash strategy in Thailand and recognising its potential to host a world class deposit, FYI has ceased its project generation activities and will focus on the exploration and development of its potash assets.

About FYI

FYI is an ASX listed natural resources focused public company. The principle assets are the portfolio of quality potash projects being assembled in Thailand and the Yarlarweelor Uranium project near Meekatharra in Western Australia.

Notes

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- Issued and quoted securities The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- The definitions in, and provisions of, AASB 1022: Accounting for Extractive Industries and AASB 1026: Statement of Cash Flows apply to this report.
- Accounting Standards ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
