The shares of the company were suspended from official quotation by ASX on 22 April 2014.

Since completion of the mine gate sale agreement for iron ore produced at the Spinifex Ridge Iron Ore Mine, MOL has been considering merger and acquisition opportunities with a view to identifying an appropriate project for the Company to invest in and continue its business operations.

Australian Securities Exchange ("ASX") policy is to allow companies that have disposed of their main undertakings a 6 month period within which to satisfy ASX that the company has a sufficient level of operations to justify continued quotation of the company's securities on the ASX. In view

of the funds available for investment and the number of opportunities that were under consideration by Moly, the Board had expected Moly to be in a position to implement an acquisition in time to satisfy the ASX's continued operations policy.

The Board, after conducting appropriate due diligence enquiries and endeavouring to negotiate acquisition terms with various third parties, ultimately rejected several opportunities as not being in the best interests of Moly given the assets and terms available. The Board continues to pursue its consideration of opportunities strategy while ensuring that Moly's ongoing costs are reduced to the extent practicable.

Moly remains an ASX listed entity and provided it is able to recommence operations of a level adequate to justify, in the opinion of the ASX, quotation of Moly's securities in the future, Moly will be able to again seek quotation of its shares.

The TSX advised the company on 7th May 2014 that it was reviewing the company's shares based on the requirements of Section 710(a)(iii) of the TSX Company Manual, which allows a delisting to occur if an issuer has discontinued or divested a substantial portion of its operations. On 5th June 2014 the company announced that TSX had notified that the company shares would be delisted on 4th July 2014. This has subsequently occurred.
