Dear Sir

MAJOR SALE OF MEDTECH EVOLUTION IN NEW ZEALAND

Medtech Global Limited (MDG) is pleased to announce that it has secured a major sale of its new Medtech Evolution practice management software (PMS).

Nirvana Group, one of Auckland's largest healthcare groups has selected Medtech Evolution to replace Medtech32 as its PMS in all its clinics.

Nirvana Group, through its trading entities East Tamaki Healthcare, Whitecross, West Auckland Healthcare and Mt Roskill Healthcare, comprises 22 General Practice clinics.

Dr Kanti Patel, Nirvana Group Chairman, says the multi-clinic group rigorously reviewed Evolution General Practice at both clinical and practice management levels, taking into consideration key criteria such as security, patient safety and ease of use.

"This product is superior to comparisons both locally and internationally," Dr Patel says. "We are confident this product will cater for our future needs and growth and has significant flexibility over Medtech32 or any other software we have reviewed in our selection process.

"The technology is highly secure and also interoperates with other products. The product will include browser and mobile solutions, enabling better healthcare for patients beyond the clinic in the future. Through investing in our IT infrastructure and transitioning to Evolution, the group is strengthening its leading role in clinical developments."

Vino Ramayah, the chairman of MDG, says Nirvana Group's endorsement of Evolution is a significant milestone in the company's history.

"The product is built on the latest Microsoft Technologies with SQL database," Mr Ramayah says. "It will revolutionise the workflow of GPs, Specialists and Allied Health providers enabling

them to deliver better healthcare to patients through increased efficiencies. The system has many artificial intelligence elements added to it through Medtech's Clinical and Business Intelligence Tool called (CBIT)."

Medtech32 has been the market leading PMS in New Zealand for more than 30 years and Medtech's products are also in the United Kingdom, United States, India and Australia. Evolution has been developed with inputs from leading clinicians, practice managers and other healthcare professionals and Medtech's Medical Advisory Group.

Evolution gives both clinicians and practice managers a higher level of visibility of data, enabling enhanced patient care and efficiencies within their practices.

Evolution is fully integrated with other Medtech products such as ManageMyHealth (Shared Electronic Health Record and Patient Portal) and Vitelmed which provides telehealth solutions. These products are already deployed and gaining momentum in several countries.

Yours faithfully

Russell G Clarke
Executive Director
