Dear Sir/Madam

STOP WORK INSTRUCTION

India Resources Limited (IRL) has been instructed by Hindustan Copper Limited (HCL) to stop non-essential production and development operations at the Surda mine site.

The instruction is understood to affect a number of mines, including a dozen iron ore mines, despite shortages of various raw materials in India.

In May 2014 the Supreme Court of India limited the number of lease extensions that could be obtained without a licence renewal. This has resulted in amendments to the mineral concession rules that the state government is enforcing against mines that continue to await the renewal of their licence. IRL understands this includes HCL's Surda mine.

At this time it is not known how long the stop work instruction will remain in place. The Company will keep shareholders informed of developments as they occur.

Yours faithfully

Arvind Misra
Managing Director
