Force Majeure lifted

Production update

The Board of Burleson is pleased to advise that the Force Majeure imposed by the gas plant was lifted today and all Burleson's wells are being connected to sales lines.

Truchard #3

Flow testing is progressing.

About the T #3 Well (BUR Working Interest 50%)

The T#3 spudded and commenced drilling on Wednesday 23rd July and reached the Total Depth of 11,750 feet (3,581m) on 13th August 2014. The well is a vertical development well targeting the lowermost Wilcox Prairie Bell 01 reservoir sand in the Heintschel Field.
