## **Mobilarm announces launch of the new sMRT Inflatable SOS Dan Buoy- a major step up in Search and Rescue.**

Mobilarm's subsidiary Marine Rescue Technologies ("MRT") announces the launch of the sMRT SOS Dan Buoy developed in partnership with SOS Marine. The product is being introduced at the Monaco Yacht Show, the world's largest mega-yacht show this week. Mobilarm has integrated its latest emergency alerting and tracking electronic MOB device the sMRT V100 Locator Beacon and incorporated it with the SOS Dan Buoy.

Once thrown into the water and inflated, the SOS Dan Buoy becomes a visual marker and at the same time the sMRT technology is activated which sends out an alert signal automatically transmitting GPS coordinates to your chart plotter via AIS and DSC. The SOS Dan Buoy can also provide flotation for the casualty. Its visual and electronic capabilities truly reduce the *Search* in Search and Rescue.

The sMRT SOS Dan buoy is a major change in marine rescue devices and suitable for many marine applications for vessels and fixed marine installations. Portable and simple to use, the sMRT Dan Buoy can be thrown into the water providing a floating marker for a person to swim towards and await rescue. The integration of MRT's sMRT beacon technology allows the tracking of the Dan Buoy and also provides an alarm mechanism to alert nearby vessels to assist with the rescue.

MRT CEO Ken Gaunt commented: "We are continuously looking to provide our customers with all potential life saving solutions. The sMRT SOS Dan Buoy is another solution with which our customers can address their man overboard risks. This product is a clear alternative for those environments in which individual protection is not viable such as large passenger vessels and cruise ships, or those facilities such as oil rigs and wind farms in which additional standby measures address the additional safety requirements needed."

SOS Marine's, Ross Spencer added: "We are very excited for sMRT SOS Dan Buoy to become a global benchmark in response to a rescue situation. The sMRT SOS Dan buoy has lifesaving capabilities. It is easy to use, anyone can pick it up and throw it overboard and is specifically designed to make rescue and recovery of a Man Over Board incident a simple and reliable operation. The sMRT SOS Dan Buoy is a very easy to use product that delivers improved safety to commercial and recreational seafarers."
