ASX/Media Release

21 October 2014

#### U.S. SENATOR LINDSEY GRAHAM VISITS ALEXIUM FACILITIES

Perth, WA and Greer, South Carolina, Alexium International Group Limited (Alexium) (ASX:AJX, AX:AJX, OTC QX:AXXIY) announced today that South Carolina Senator Lindsey Graham toured the Alexium facilities in Greer, SC.

##### Key Points:

- Following Representative Gowdy's successful visit, Senator Graham expressed an interest in visiting Alexium to see firsthand the applications lab and the products we are developing.
- During the site visit, Senator Graham met with employees to discuss the benefits of our flame retardant and chem/bio protection chemistries and the role that Alexium is playing in providing eco-friendly treatments.
- Senator Graham was especially interested in our chemistries for military fabrics and the work we have done thus far with the U.S. Armed Forces.

"It was a privilege to host Senator Graham at Alexium today," stated CEO Nicholas Clark. "It was a wonderful opportunity for us to showcase the benefits of our FR chemistries and for him to see the advantages of our chemistry versus the treatments currently used in the military."

##### Alexium's Sustainability:

Alexium is committed to providing novel, eco-friendly fire retardant chemistry for multiple textile applications, including those used for military fabrics. While many of the traditional FR chemistries for textiles are now banned or being withdrawn from the markets due to the evidence of toxicity of halogenated compounds, Alexium's FR coatings are free of halogen, heavy metals and formaldehyde. Senator Graham's visit shows a commitment to supporting companies that produce environmentally friendly chemicals, and it gave Alexium the opportunity to demonstrate that our products are both safe and effective.

##### About Senator Graham:

Senator Graham currently sits on the Senate Appropriations Committee, the Committee on Armed Services, the Budget Committee, and the Committee on the Judiciary. He served in the U.S. Air Force and is currently the only Senator who still serves in the Air Force Reserves. Senator Graham has earned a reputation for his support of the U.S. military and is a proponent of a strong national defense. He has also gained much respect in Congress by supporting small businesses and cutting spending.

## **About Alexium**

Alexium International Group Limited (ASX: AJX, AX:AJX OTC QX: AXXIY) holds proprietary patent applications for a process developed initially by the U.S. Department of Defense, which allows for the surface modification and attachment of nano-particles or multiple chemical functional groups to surfaces or substrates to provide functions such as fire retardancy, water proofing, oil proofing, and anti-microbial treatments. Applications under development include but are not limited to textiles, paints, and packaging, glass and building materials. Alexium's fire retardant chemical treatments are currently marketed for different fabric markets under the Ascalon™, Nycolon™, Nuvalon™, and Polytron™, Omnitron™ and Bactron™ trademarks.
