Summary

- Completed cost rationalisation measures to significantly reduce corporate overhead and administration costs.
- Progressed evaluation of advanced exploration and near-to production projects considered suitable for potential acquisition or joint venture.
- Secured financial support from high net worth investor with access to Asian capital markets and substantial private and public investors.
- Worked closely with Ord River Resources Limited ("Ord") on the advancement of the Plutonic Dome Gold Project Joint Venture which included the following milestones:
 - * Ord satisfying the Earning Obligation under the Joint Venture which entitles Ord to a 30% direct equity in the Plutonic Dome Gold Project;
 - * The Joint Venture confirming financial support for the early development of the K2 Underground Deposit and the accelerated commercial evaluation of the Trident Deposit; and
 - * The Joint Venture confirming a significant increase in Resources and Reserves.

Corporate Overview

During the September quarter Dampier completed the rationalisation of administration overheads and settled legacy issues, including the closure of the office in West Perth, Western Australia.

During the quarter, the Board secured support from a high net worth investor with strong links to capital markets and the capacity to facilitate (along with all the other

shareholders) the continued financial support required by the Company to secure new projects. The investor was allotted 16,567,247 shares on 20 October 2014.

With respect to growth opportunities, the Board continued to pursue its strategy of identifying and reviewing a number of gold projects which range from well advanced exploration to near term development.

Preliminary discussions were held with various groups who hold suitable assets and some progress was made with these groups. Due to constraints on Dampier's cash position, the Company was not in a position to formalise negotiations and to undertake the required due diligence.

Following the placement on 20 October, Dampier is better placed to advance the evaluation of opportunities and commence further negotiations.

On 11th September 2014, Ord River Resources Limited satisfied by the expenditure of \$2M its initial earning obligation under the Dampier / Ord Plutonic Dome Gold Joint Venture and became entitled to a 30% direct equity interest in the Plutonic Dome Gold Project. Ord River Resources further committed to sole fund an additional \$1M in expenditure by 10 February 2015, following which it will be entitled to an additional 15% in the Project. Ord River Resources may continue to earn an additional 40% in the Project through the further expenditure (in two separate tranches) of \$4M by 2 January 2016.

During the quarter, the Board is pleased to note that Ord River Resources made strong progress with the evaluation of the Plutonic Dome Gold Project by positioning the Project for future production from the K2 and Trident deposits.
