The Directors of Vector Resources Limited ("Vector" or the "Company" ASX: VEC) are pleased to provide the quarterly report for the period ended 30 September 2014.

At the date of this Quarterly Report, the Company has 303,053,625 fully paid ordinary shares and 150,107,260 listed options (\$0.25 exercise, 30 January 2015 expiry) on issue.

During the quarter, the Company de-mobilised the temporary infrastructure utilised to undertake the bulk sampling program on the Gwendolyn Gold Project which commenced late in March 2014.

All infrastructure was removed from site during July and final rehabilitation operations were also completed during that month.

The processing of ore which commenced early in June 2014 was completed on the 4th July. Mill clean out and reconciliation of the metal balance results on the processed ore from the bulk sample program followed.

The total ore processed resulted in 29,219dmt being milled with an overall reconciled mill head grade of 3.50gpt, compared with the estimated belt sampling head grade of 3.63gpt, with a recovered grade of 3.35gpt.

The bulk sample campaign produced 3,150 Au ounces with the average mill feed grade achieved significantly below the Company's expectations based on the independent assessment from the grade control model.

The bulk sample program was undertaken to allow the Company to accurately forecast the economics of the remaining Phase 1 and larger-scale Phase 2 operations at Gwendolyn, based on establishing a set of parameters obtained from the bulk sample relating to the course gold (nugget factor affect) influencing the mineralisation.

The Company has taken the opportunity to undertake a review of its entire tenement portfolio and will also continue to assess new project opportunities that the Board believes will add shareholder value.

As a result of the ongoing review, the Company took the decision to relinquish its interest in the Muriels Extension project.
