## **Mineral Resource Estimates (MRE's)**

During the quarter inaugural MRE's were completed for the Lady Shenton Deposit and Stirling Deposit at its MGP (Figure 1) as announced to the ASX on 23<sup>rd</sup> July 2020.

The new estimates are presented in the Table 1 and Table 2 below. Resources at the MGP have increased by 37% since the previous estimate reported in March 2020 and by 87% since September 2019. Menzies Gold Project near surface MRE's now totals 320,000 ounces (Table 5).

The Lady Shenton System (Figure 1) is a significant, structurally controlled mining centre at MGP which has delivered very high-grade production (185kt @ 32 g/t Au for 191k oz Au) prior to 1946 and then later open pit mining in the 1990's which produced 349kt @ 2.7 g/t Au for 30.3k oz Au. Extensions of this mineralisation extend at depth and are repeated adjacent to the main workings, Pericles and Stirling deposits, that have been discovered since completion of open pit mining in the 1990's with Stirling being discovered during KWR drilling in 2019.

The Lady Shenton, Stirling and Pericles deposits are considered one mineralised system by KWR. The Pericles MRE of 1.4Mt @ 1.8 g/t Au for 79.50k oz Au (as announced to the ASX on 14 Feb 2020). Combined with the recently estimated Lady Shenton and Stirling lodes this combined MRE for the Lady Shenton System stands at 166.10k oz Au. Figure 2 and 3 show block models of the Lady Shenton and Stirling lodes.

### **Resource Definition Drilling at Menzies**

Kingwest is in the process of completing Resource Definition drilling (infill and extensional) comprising approximately 100 RC holes for 10,000 metres at the MGP. This is designed to upgrade the category level and size of the MRE's, which currently total 319,900 ounces @ 2.08g/t Au (Table 5), mostly in the Inferred category.

Drilling will be spread across the First Hit, Lady Shenton, Lady Harriet, and Yunndaga Systems. To date 42 RC holes (KWR053 – KWR094) have been completed for a total of 4,004 metres. These were within the First Hit and Lady Shenton Systems. Assays have been received for KWR053 – KWR069 and KWR072 – KWR077 with the remainder pending. Table 3 summarises all significant intersections, Table 4 summarises details for all holes completed to date with full results reported to the ASX on 6<sup>th</sup> October 2020.

Within the Lady Shenton System 30 RC holes (KWR058 – KWR087) have been drilled for 2,630 metres at the Pericles Deposit (Figure 4). Assays have been received for KWR058 – KWR069 and KWR072 – KWR077 with the remainder pending.

Within the First Hit System 12 holes (KWR053 – KWR057 and KWR088 – KWR094) have been completed for 1,374 metres. Assays have been received for KWR053 – KWR057 with the remainder pending. At the Selkirk Deposit KWR056 intersected 4m @ 3.39g/t Au from 95m including 1m @ 11.41g/t Au from 95m. This drill-hole is outside the current MRE and demonstrates its potential to grow as more drilling is completed.

<b>Total</b>	<b>5,361</b>	<b>106</b>	<b>5,255</b>	
<b>Remaining Cash</b>			<b>4,918</b>	

### Notes:

1. Cash balance on 24 May 2018 varies to cash balance on 24 August 2018 due to payments towards expenses of the Offer and administration expenses over this period.
2. Actual Exploration expenses are \$1,225k below the use of funds budget. Following the IPO the Company completed a drilling campaign totalling 13,188m with mixed exploration success. To complement the existing Leonora assets the Company entered into an Agreement to acquire the Menzies and Goongarrie Gold Project in July 2019 as approved by shareholders in September 2019. Given the exploration success at Menzies since acquisition, the primary focus of the Company and its available funds has been on the Menzies Gold Project. During the quarter the Company announced that it had disposed of the remaining

Leonora tenements being the Crawford's and Gambier Lass tenements, proceeds from the disposal of these tenements were received subsequent to September quarter end.

3. Actual administration and overhead costs are \$939k higher than the use of funds budget due to the additional costs incurred with the acquisition of the Menzies Gold Project and associated capital raisings. Additional costs incurred (separate to direct capital raising costs – refer note 6) included legal and due diligence costs, costs associated with convening a shareholder meeting to approve the acquisition and corporate advisory costs. The Company utilised excess working capital funds to fund the additional administration and overhead costs.
4. Expenses of the Offer paid for the period are showing as being below the use of funds budget by \$162k due to \$196k in IPO costs paid pre IPO (refer Note 1). Total expenses of the offer were materially consistent with the use of funds budget.
5. Proceeds received during the June 2020 quarter from the disposal of the Emperor Project, King of the West Project and Wells Group of tenements at Leonora. Proceeds from the disposal of Crawford's and Gambier Lass tenements were received subsequent to September quarter end.
6. In September 2019 the Company completed the acquisition of the Menzies Gold Project for an initial cash consideration of \$1.75M. KWR completed an initial 6,520m drilling campaign to December 2019 and completed another 12,292m drilling campaign in June 2020. Funding for the cash consideration and exploration expenditure of the Menzies Gold Project was from the capital raising in September 2019 of \$4m and February 2020 of \$3.5m. In September 2020 the Company also completed a non-renounceable rights issue to raise \$3.3M from eligible shareholders followed by a follow up \$1M placement to professional and sophisticated investors. Direct costs associated with the capital raisings were \$857k.
