## **Alliance established with African-based redeployable camp supplier to jointly develop large capacity accommodation camps in Mozambique**

### **Key Points**

- **The global Covid-19 pandemic has led to a change in the way project accommodation camps are developed and operated in Mozambique, to cater for social distancing standards and to minimise the risks of community transmission**
- **This has resulted in immediate demand for additional high-quality, secure camp accommodation in the vicinity of Mozambique's massive LNG project developments in the Palma/Afungi region of Cabo Delgado province**
- **The Wentworth Camp in the town of Palma, which RBR shares with other key LNG service providers and serves as its operations base, is perfectly located with ready access to the municipal airport and LNG construction site**
- **RBR and South African-based Canvas and Tent's subsidiary Cube Modular have signed an MoU to develop, via Joint Venture, an oil & gas industry-specification accommodation camp at Wentworth for a specific customer, with capacity for 500+ guests**
- **Development of the camp is scheduled to commence in November 2020 subject to tender award and contractual commitment from the customer**
- **This Alliance offers potential to expand the JV operations to service large scale resource developments in the broader African continent**

Labour and training specialist RBR Group Limited (ASX: RBR) is pleased to advise that it has established a Memorandum of Understanding (MoU) with South African-based Canvas and Tent Manufacturing (Pty) Ltd's subsidiary Cube Modular to develop, via Joint Venture, an oil & gas industry-specification accommodation camp at the Wentworth camp near the Mozambique LNG construction site, with capacity for 500+ guests. The Wentworth camp is where RBR's Mozambique operations are located, together with other LNG service providers.

Under the terms of the MoU, Cube Modular and its related group entities will produce the redeployable camp infrastructure (including accommodation units, kitchens, water and sewage plants) and manage the future operations of the camp. RBR will, via its Mozambican Futuro Group subsidiaries, provide trained local workers to assist with the installation and maintenance of the camp.

Subject to tender award and contractual commitment, it is the intent of the Parties to move to immediate development. The Parties will invest in the project and manage it via an unincorporated Joint Venture. RBR's share in the joint venture will be 35% with Cube Modular holding the balance 65%.
