September 2020 Quarterly Activities Report

Construction underway and exploration ramps up at Warrawoona Gold Project, WA

HIGHLIGHTS

- Feasibility study demonstrates Warrawoona Gold Project can produce ~90,000ozpa at an AISC of \$1,290/oz versus current gold price of +A\$2,600/oz
- Early construction works underway at Warrawoona
- Major Tenders Issued and Indicative debt term sheets received
- Ministerial approval secured
- Acquisition of high-grade Blue Spec gold mine near Warrawoona Gold Project provides immediate opportunity to expand production and free cash flow at Warrawoona. DFS and integration plan to be undertaken during CY2021 in parallel with Warrawoona construction
- Calidus identifies 22 high-priority regional targets as it ramps up strategy to grow the current 1.5Moz Resource
- Calidus raised \$25M for construction and exploration
- Calidus held \$26M cash and \$0.8M in listed investments at 30 September

Calidus Resources (ASX:CAI) is pleased to report on a highly successful quarter during which it started early construction works and ramped up exploration at its Warrawoona Gold Project in WA's Pilbara.

FEASIBILITY STUDY SHOWS WARRAWOONA WILL BE ECONOMICALLY AND TECHNICALLY ROBUST

During the quarter, Calidus announced that the Feasibility Study confirmed that Warrawoona is set to generate strong cashflow, outstanding financial returns and a rapid payback.

The Feasibility Study includes a 30% increase in the underground Reserves to 120,000oz (from June 2020), with total Project Reserves increasing to 547,000oz (Table 4). This underpins forecast production averaging 90,000 ounces a year in the first seven years, peaking at 105,000oz in year five, at an average AISC of A\$1,290/oz.

Based on a gold price of A\$2,500/oz, Warrawoona will generate a post-tax internal rate of return of 69% and have a payback period of just 13 months.

The key points were:

- The study showed Warrawoona will generate strong margins and cashflow
- Study uses cost inputs from Preferred Contractors for major scopes of work from competitive tender process – Mining, Processing Plant, Tails Storage Facility and Power Station
- Project Economics (Based on A\$2,500/oz):
 - Pre-Tax Project Cashflow of \$629M, average EBITDA of \$110M pa, NPV_{8%} \$408M, IRR 81% and payback of 13 months
 - Post-Tax Project Cashflow of \$447M, NPV_{8%} \$286M, IRR 69% and payback of 13 months
- Average production of 90,000oz a year over first 7 years, peaking at 105,000oz in year five
- Total gold production of 658,000oz over eight-year life of mine based on current minable inventory
- Life of Mine All-In Sustaining Costs (AISC) of \$1,290/oz
- Pre-production capital cost of \$120M including contingency and pre-production mining costs
- Underground Reserve increases 30% to 120,000oz with further growth potential from planned resource extensional and infill drilling

Table 1 - Key Project Statistics

Production Summary	Units	Feasibility Study
Initial Mine Life	Years	8.3

Payback Period	Years	2.3	1.4	1.1	0.9	0.8

¹ All-In Sustaining Cost includes mining, processing, site administration, royalty costs and sustaining capital. It does not include exploration, corporate costs and non-sustaining capital.

² Payback period is calculated from the month of first gold production.

³ Calidus is estimated to have carried forward tax losses of \$42M at 31 December 2020.

⁴ All figures are presented in nominal Australian Dollars unless otherwise specified. Rounding errors may occur.

Table 4 - Ore Reserves (only Underground Reserve updated from June 2020)

Deposit	Proven			Probable			Total		
	kt	Au (g/t)	koz	kt	Au (g/t)	koz	kt	Au (g/t)	koz

DEVELOPMENT TIMETABLE

During the quarter, Calidus advised that it had taken key steps to ensure it meets the accelerated timetable for development of Warrawoona.

The project timeline is shown the table below.

Table 6 – Development timeline

PERMITTING	TIMING	Q3 2020	Q4 2020	2021
EPA Recommendation	✓			
Ministerial Sign Off	Q3 2020

Commence Construction	Q1 2021			
First Gold - 10 months from construction				+ 10 months

COMMENCEMENT OF EARLY CONSTRUCTION WORK AT WARRAWOONA GOLD PROJECT

During the quarter, Calidus announced the commencement of early construction works for Warrawoona following grant of the necessary Environmental Permits.

This construction activity will provide the base infrastructure, including an Access Road, Accommodation Village, Communications and Water Supply in preparation for main Project construction activities to commence in Q1 2021.

Early works includes:

- The construction of a 7km long access road to the village and process plant;
- The installation of the 240 room village that has been previously purchased by Calidus;
- The installation and operation of communications by Telstra;
- The installation and equipping of water bores.

Figure 1: New access road construction commenced

TENDERS ISSUED AND AWARD OF PREFERRED CONTRACTORS

Calidus announced that tenders for the major contracts, comprising a schedule of rates mining contract, tailings dam construction, EPC for the processing plant construction and a build, own, operate (BOO) model for the power station, have been let to the market.

Calidus awarded preferred contractor status to the two largest value contracts being the open pit mining and EPC process plant contract to facilitate Front End Engineering and Design (FEED) and the placing of long lead items orders.

Macmahon Holdings Ltd (Macmahon) have been awarded preferred tenderer status for the open pit mining. Macmahon is an ASX listed company (ASX:MAH) with a market capitalisation of \$564m. Macmahon provides contract mining services Australia wide, employs over 6,000 people and is currently very active in Western Australian Gold with its nearest operation being at Telfer Gold Mine.

GR Engineering Services Ltd (GRES) have been awarded preferred tenderer status for the EPC contract for the process plant. GRES is an ASX listed company (ASX:GNG) and is the pre-eminent gold EPC contractor in Australia having completed the last two gold plants in WA.

Both preferred tenderers have a long and successful track record in Western Australia and gold mining and have the financial, technical and operating experience to deliver on the proposed scope of works.

MINISTERIAL APPROVAL SECURED

On 24 August 2020, Calidus was pleased to announce that the Western Australian Minister for the Environment has approved the Warrawoona Project. A copy of the EPA Approval can be downloaded from the EPA website.

INDICATIVE DEBT TERM SHEETS RECEIVED

Calidus advised that its debt funding process is progressing well, with a high level of interest expressed by several potential lenders. Calidus has received attractive indicative term sheets from select banks, debt and credit funds as well as royalty and streaming providers. Notwithstanding the receipt of such terms sheets, Calidus cautions investors that these indicative proposals remain subject to negotiation and there is no guarantee that debt funding can or will be secured on the terms sought by Calidus.

As part of the debt financing process, an independent technical expert has been appointed with an initial draft report close to completion.

CALIDUS TO ACQUIRE HIGH-GRADE BLUE SPEC GOLD MINE NEAR WARRAWOONA

Calidus advised that it has entered into a binding agreement with Novo Resources Corp. (**Novo**) (TSX.V:NVO) to acquire the high grade Blue Spec Project, located within trucking distance of Warrawoona.

Highlights included:

- Calidus has signed a binding agreement with Novo Resources Corp. (TSX.V:NVO) for the acquisition of the high-grade Blue Spec Gold/ Antimony Project in the Pilbara region of Western Australia for A\$19.5 million cash consideration
- Located within trucking distance (~70km) of the Warrawoona Gold Project

- Established JORC 2012-Compliant Mineral Resources currently undergoing review by Calidus of 415kt @ 16.3g/t Au and 1.3% Sb for 219koz Au and 5.2kt Sb
- Strong exploration potential down dip and along strike
- Blue Spec has historical production of ~60koz Au at more than 25g/t Au (*refer to Northwest Resources Prospectus dated 25 October 2004*)
- Strong potential operational and capital cost synergies between Blue Spec and Warrawoona, while maintaining exposure to ongoing exploration potential:
 - Focus on increasing production profile, extending mine life and maximising value of planned infrastructure at Warrawoona
 - Provides flexibility around timing and scheduling of mine operations at Warrawoona
 - Calidus can utilise in-house expertise and capacity to fast track development of Blue Spec
 - Planning to utilise existing infrastructure at Warrawoona, which already includes a sulphide plant for treatment of a high-grade open pit satellite deposit
- Demonstrates Calidus' commitment to establishing a new regional gold production hub in the East Pilbara district of the Pilbara Goldfield
- Plan to commence a strategic review/ integration study and further metallurgical testwork drilling on completion

The Blue Spec Project (**Blue Spec** or **the Project**) is located 20km south east of Nullagine and 70km from Calidus' 100% owned Warrawoona Gold Project. The Project is accessible by existing roads and a condition of the sale agreement is Novo granting a licence agreement permitting Calidus access to Novo owned roads and across tenements to facilitate potential future transport of material from Blue Spec to Warrawoona.

Given its close proximity, Blue Spec has significant potential to provide a strategic high-grade satellite feed to Warrawoona enhancing the production profile and extending mine life at a relatively low capital intensity. The Project also provides Calidus with potential for increased flexibility around mine scheduling at Warrawoona. In addition, some of the plant and infrastructure at Blue Spec may be suitable to include in the proposed 100 ktpa sulphide plant. The acquisition leases lie immediately adjacent to Calidus lease application P46/1972 which is immediately along strike of the main Blue Spec shear.

DRILLING COMMENCED AT THE OTWAYS GOLD-COPPER PROJECT

As announced on 27 May 2020, Calidus had entered into a Heads of Agreement with Rugby Mining to earn up to 70% interest in the Otways Project NE of Nullagine. In the late 1960s, shallow (<60m depth) percussion drilling of coincident soil and IP anomalies by Conwest identified copper mineralisation in metabasalts at or near surface (refer Figure 3). In addition, several holes contain Cu mineralisation that is open at depth. Historic drilling was never assayed for gold but nearby costean samples returned values of up to 13g/t Au.

Recent site visits identified the locations of previous drill holes and have confirmed visual occurrences of copper mineralisation at surface and in shallow workings.

Calidus announced on 27 July 2020, that drilling was about to commence at the Otways project. Highlights included:

- Five RC holes and 1 diamond hole to be drilled at the Otways (Doherty) prospect where substantial copper intercepts were obtained in historic percussion holes from surface

- These drill holes were never assayed for gold and are along strike from trenches assaying up to 13g/t Au
- Six reconnaissance RC holes to be drilled at the Malachite Flats prospect targeting anomalous and high-grade gold rock-chip samples of up to 15.8g/t Au over a 600m diameter anomaly

Figure 2: Tenements at the Otways Project with the GSWA 500k geology and prospect locations

Figure 3: Cross section at the Otways Project showing the results of shallow percussion drilling by Conwest in the 1960s

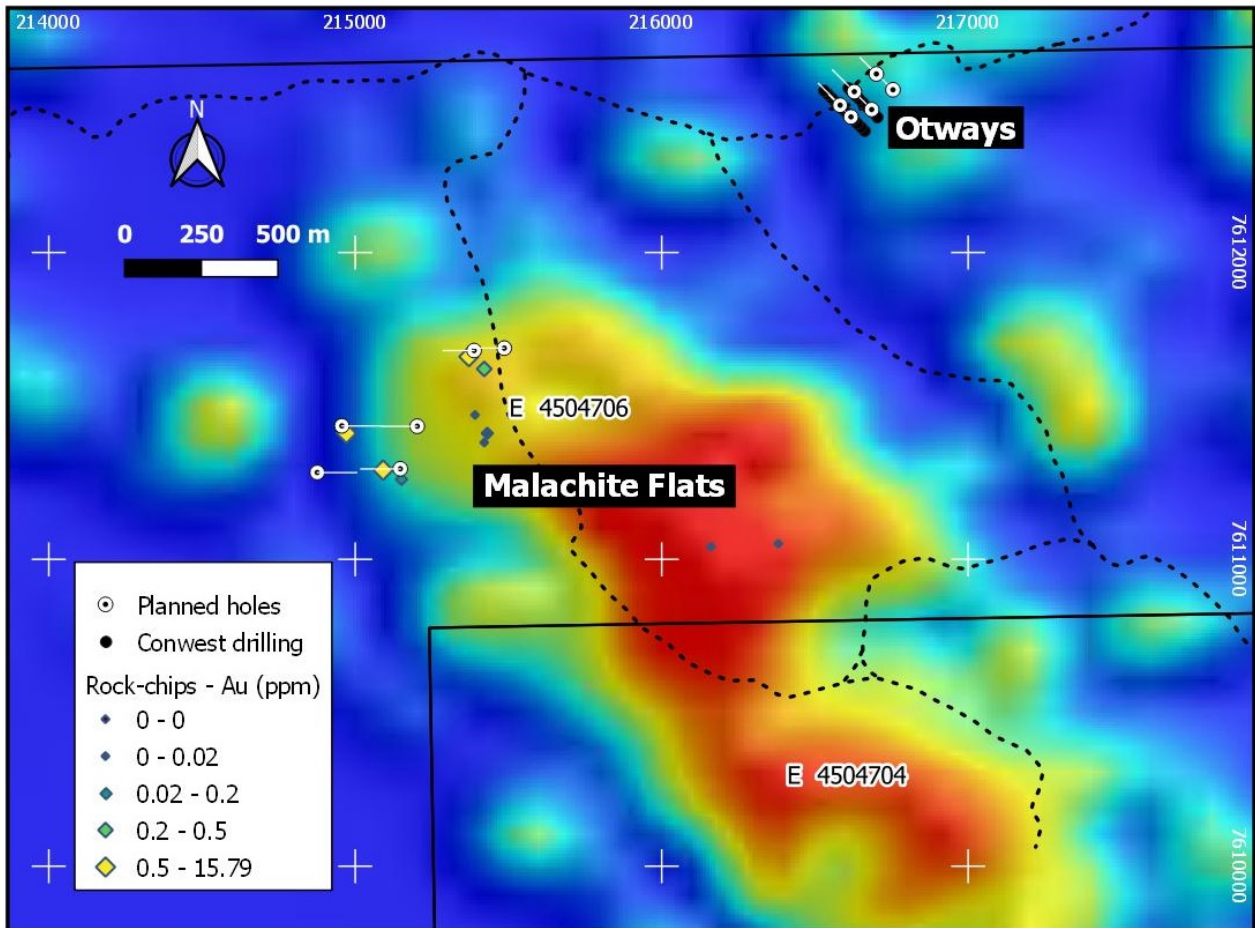

Figure 4: Map of the Otways–Malachite Flats area showing the locations of the planned drill holes on a horizontal conductivity slice at 100m depth from a HoistEM survey flown by Hazelwood Resources.

CALIDUS IDENTIFIES 22 HIGH-PRIORITY REGIONAL TARGETS AS IT RAMPS UP STRATEGY TO GROW 1.5MOZ RESOURCE

Post quarter, Calidus was pleased to announce that a review by Southern Geoscience Consultants of the Company’s regional aeromagnetic and radiometric survey across the Warrawoona gold project has identified a host of regional exploration targets.

Highlights included:

- Calidus’ strategy to accelerate exploration in parallel with project development work has led to the identification of 95 targets, including 22 high-priority targets
- The targets were identified from an aeromagnetic and radiometric survey in conjunction with Southern Geoscience Consultants
- Regional hydrothermal fluid pathways were identified using potassium signatures in the radiometric data
- Possible structural traps for gold-bearing fluid identified from structural complexity in the magnetic data along fluid pathways
- Fieldwork on the high-priority targets will begin in late October

Figure 5: Radiometric ternary images of north and south parts of the greenstone belt clipped to remove large count in the granites and felsic volcanic rocks.

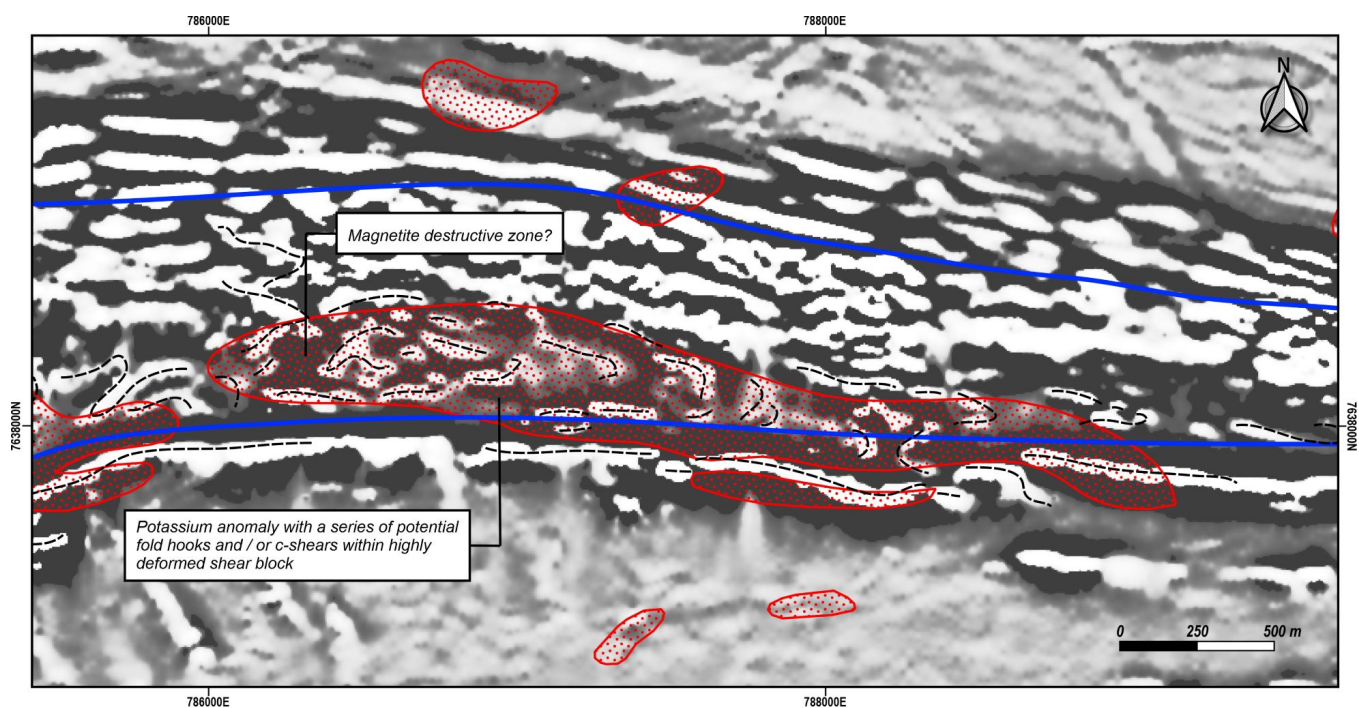

Figure 6: Potassium anomaly coincident with evidence for structural complexity and magnetite destruction

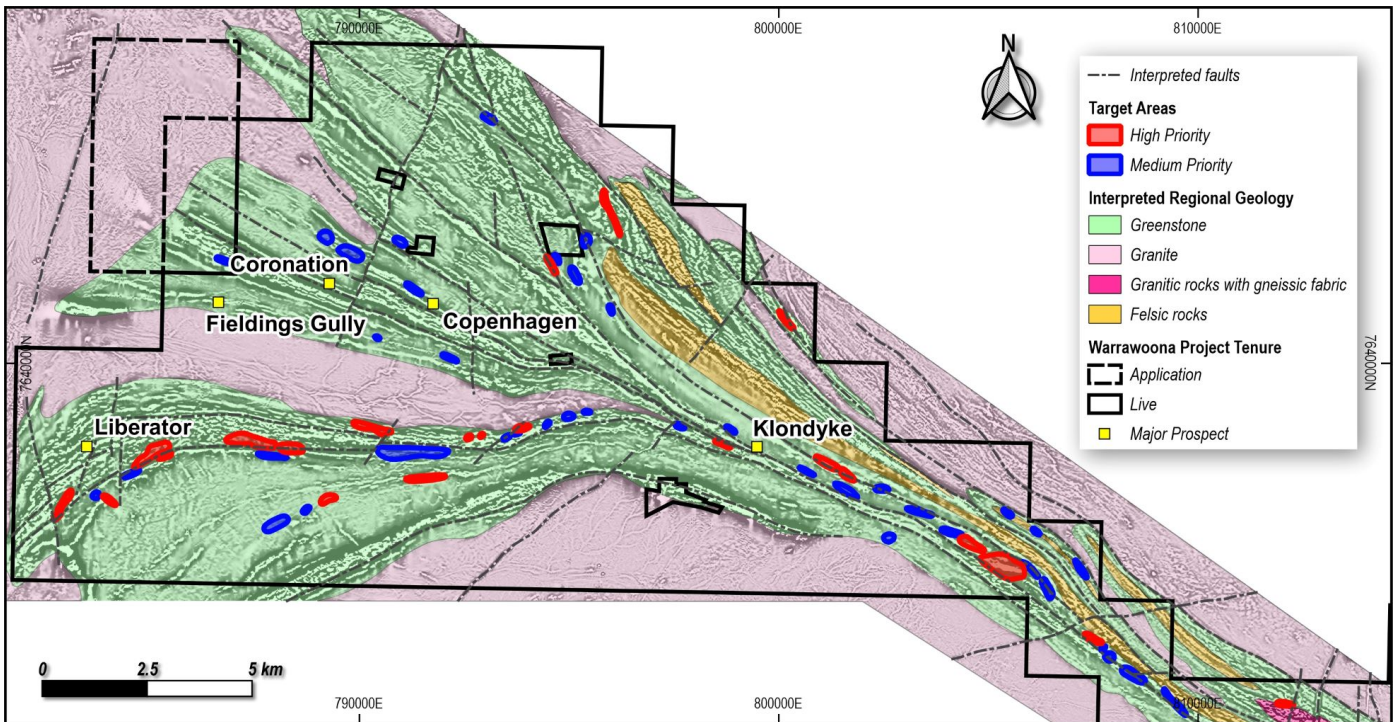

Figure 7: Regional lithologies and interpreted first order structures in the Warrawoona area with key deposits and project tenements, overlain on RTP 2VD greyscale magnetic image.

CORPORATE

Completion of \$25M Share Placement

On 24 July 2020, Calidus was pleased to announce that it had raised \$25 million via a share placement (“Placement”) to professional and sophisticated investors through the issue of 49,019,608 shares at a price of 51c. The placement attracted strong interest in excess of the shares available to allocate.

Proceeds of the Placement will be used to fund a dual strategy of commencement of early infrastructure works at the Warrawoona Gold Project including roads, accommodation village, water supply and communications as well as expanding the Company’s exploration programmes at Warrawoona and Otways,

Financial

At the end of the quarter, Calidus and its subsidiaries held \$25M cash and \$0.8M in listed investments.

Summary of Expenditure for Quarter

As outlined in the attached Appendix 5B, during the quarter the Company spent approximately:

- \$2.27M on exploration and evaluation activities;
- \$91k in payments were made to related parties and their associates for director salaries, consultancy fees, superannuation and other related costs; and
- \$0.7M on administration and corporate costs.

Appointment of General Manager

Don Russell was appointed as General Manager for the Warrawoona Project. Don has extensive operating experience at gold mines across Australia in his 30-year career and his skills will be invaluable as we move ahead with this project.

The Calidus site team is in place consisting of General Manager, Construction Manager, Geology Manager, Mining Manager, Mining/Construction Superintendent and Business Services Manager.

Director Resignation

The Company advised on 27 July 2020 that Mr Adam Miethke resigned as Non-Executive Director of the Company. The Board thanks Mr Miethke for his valuable contribution to the Company over the last 3 years where he has been intimately involved in the listing and success of the Company. The Company looks forward to continuing working with Adam and the team at Discovery Capital as our Corporate Advisors in the future.

Presentations

Managing Director, David Reeves, presented at the Diggers & Dealers Mining Forum on 14 October 2020, held in Kalgoorlie, Western Australia.

For the purpose of ASX Listing Rule 15.5, the Board has authorised for this announcement to be released.

- END -

Answer: N/A	
3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 26 October 2020

Authorised by: The Board
(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
