Oman Copper Acquisition

On 1 September 2020, the Company announced the acquisition of the Oman Copper Project from Savannah Resources Plc (*ASX Release: Force to Acquire High Grade Copper Projects in Oman*). The Company has entered into a Share and Sale Agreement (**SSA**) to acquire interests in the Block 4 and Block 5 copper projects (**the Projects**) in the Sultanate of Oman (Figure 1) from AIM listed Savannah Resources Plc (AIM:SAV) (**Savannah**). The Projects that contain part of one of the best preserved copper-rich Ophiolite belts in the world, and meet Force's growth strategy to build a multi-commodity (Cu-Au-Ag) exploration and development company.

The Company is acquiring 100% of Savannah's subsidiary, Savannah Resources B.V., which via its subsidiaries has a 51% interest in Block 4 (granted Exploration Licence), a 65% interest in Block 5 (granted Exploration Licence and 2 Mining Lease applications) and a 70% interest in two Exploration Licence applications near Block 10 to the west of Blocks 4 and 5.

The Projects cover 999 km² of the copper-rich Ophiolite belt, proven to host clusters of relatively high grade VHMS copper deposits. Ores within these deposits are metallurgically simple and contain gold and silver credits.

Measured, Indicated and Inferred Mineral Resources (2012 JORC) of 0.82Mt at 3.4% Cu (including a high-grade zone of approximately 0.5Mt at 4.5% Cu) are in two deposits within Block 5. Contained metal is reported at 28,000 tonnes of Copper, 5,900 ounces of Gold and 220,000 ounces of Silver (Table 1-3) (See JORC Statement page 9).

Exploration will initially target the current Mineral Resources with the view to resource expansion, pre-feasibility and development.

Oman has low sovereign risk and is an excellent low-cost operating region with well-developed road, power, port infrastructure, low fuel costs and a favourable fiscal regime.

Consideration is 50 million Force shares on acquisition completion, AUD\$3.5M deferred cash on the achievement of mine development and production milestones and a 1.0% royalty on metal sales.

EXPLORATION

1. TSHIMPALA PROJECT – MALAWI

During the Quarter, no field work was completed at the Tshimpala Project. The Company completed all the work required for a restart at the project, including discussing terms with vendors and creditors of the project.

One of the contractual obligations of the project acquisition was to make a cash payment to the vendor of US\$41,350 and €160,605 (together equivalent to approximately A\$320,880) by no later than 31 December 2019. As at 31 December 2019, the cash payment to Terra Care had not been made. Under the terms of the share sale and purchase agreement, failure to meet these cash payments allowed the vendor the possibility to buy-back the project in its entirety for US\$100. The Company is working through the issue with the Vendor.

2. HALLS PEAK-GIBSON PROJECT – AUSTRALIA

The Halls Peak-Gibson Project comprises granted Exploration Licenses EL 4474 and EL 7679, located in north-eastern NSW and covering an area of about 84km².

The Halls Peak-Gibson Project area contains several known occurrences of base metals rich in zinc and lead with varying associated levels of copper, silver and gold.

The Company completed some preliminary data review at the Halls Peak Project during the quarter with intention to develop plans for renewed field activity.

3. KITOTOLO-KATAMBA PROJECT – DEMOCRATIC REPUBLIC OF CONGO

The Kitotolo-Katamba Lithium Project comprises exploration license PR 12453 and mining lease PE 13247, and extends over an area of about 400 km², for which the Company owns a 70% interest in a joint venture company with DRC state-owned mining company La Congolaise d'Exploitation Minière.

No work was completed on the project during the quarter. The Company will continue discussions with its joint venture partner and determine how best to now advance the project.

4. KANUKA PROJECT – DEMOCRATIC REPUBLIC OF CONGO

The Kanuka Project area comprises two contiguous licenses granted mining lease PE13082 and exploration license PR4100. These licenses cover an area of about 194 km² and are located 20 km east of the Company's existing Kitotolo Lithium Project. The licenses are immediately south (about 4 km from the license boundaries) of AVZ's Manono Project.

No work was completed on the project during the quarter.

5. PROJECT GENERATION

Force is seeking high value advanced exploration projects capable of rapid value uplift to be realised with judicious exploration activity. Through the acquisition of such a project, Force aims to establish early cashflow through the establishment of a mining operation.

Project generation continues to advance, with several new project opportunities in copper, gold and base metals reviewed during the quarter. The Company remains confident of identifying a suitable project in the near term.

6. CORPORATE AND FINANCE

6.1 Cash at Bank

The Company's cash at bank as of 30 September was \$1,562,287.

6.2 Debt Funding – Working Capital

On 15 September 2020, the Company raised \$250,000 through the issue of convertible notes to shareholders of the Company. The terms of the convertible notes are:

- Face value: \$1.00 per note
- Conversion: The notes shall convert into shares at the sole election of the noteholder at the conversion price at any time on or before 21 November 2020.
- Conversion price: \$0.01 per note
- Interest: 10% per annum, paid monthly in arrears

6.3 Capital Raising

On 1 September, the Company announced a capital raising via a 2 tranche placement to raise \$3,000,000 before costs. Funds (\$1,500,000) from Tranche 1 were issued as a pre-payment, which Shares are to be issued following shareholder approval in accordance with ASX listing rule 7.1, obtained at the Company's AGM held on 28 October 2020. 62 Capital, a boutique corporate advisory, assisted with the placement.

6.4 Shares on Issue

As at 30 September 2020, the fully paid ordinary shares on issue totalled 557,654,757. No shares were issued by the Company during the quarter.

6.5 Options on Issue

During the quarter the following options expired:

- On 1 July 2020, 2,000,000 unlisted options, with an exercise price of \$0.06, expired.
- On 1 July 2020, 2,000,000 unlisted options, with an exercise price of \$0.08, expired.

As at 30 September 2020, options on issue comprised of:

- 34,444,445 exercisable at \$0.02; expiring 30 June 2021
- 43,000,000 exercisable at \$0.02; expiring 31 October 2021

6.6 Voluntary Suspension of Company's Securities and Reinstatement

The Company requested a voluntary suspension of trading in its securities on the 13 January 2020 (*Refer ASX Release of 13 January 2020*). On 28 January 2020 (*Refer ASX Release of 28 January 2020*)

the Company extended voluntary suspension for the purpose of raising new capital and reorganizing its management structure. The Company remains in suspension at the end of the quarter.

Following on from the Company's submission to the ASX for reinstatement of the Company's securities, the ASX provided the Company with a list of conditions precedent required to be met before trading can resume.

Competent Person Statement

The Information in this report that relates to Exploration Results and Mineral Resources is based on information compiled by Mr Paul Payne, a Competent Person who is a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Payne is a full-time employee of Payne Geological Services. Mr Payne has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Payne consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to Exploration Results in relation to the Halls Peak-Gibson Project is extracted from ASX Announcements dated 15 December 2016 and 29 December 2016 (see ASX Announcement – 15 December 2016 “102m Intercept from Surface – High Grade Zinc, Lead and Silver” and 29 December 2016, (see ASX Announcement – 29 December 2016 “Final Assay results Confirm Extensive High Grade Zinc and lead Mineralisation – Up to 46% Zinc and 27% Lead”, www.forcecommodities.com.au and www.asx.com.au).

JORC Code Compliant Reports

The information regarding the Mineral Resource is extracted from the report entitled “Force to Acquire High Grade Copper Projects in Oman” created 1 September 2020 and is available to view on <http://www.forcecommodities.com.au/news-research>. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcement.

Forward looking statements

Information included in this release constitutes forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company’s control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.
