### **About icetana**

icetana Limited is a global software company providing video analytics solutions designed to automatically identify anomalous actions in real-time for large scale surveillance networks. Our software integrates with customers' existing video management systems and IP cameras.

Using artificial intelligence and machine learning techniques, the icetana solution learns and filters out routine motion, showing only anomalous or unusual behaviour allowing operators to focus on events that matter and respond in real-time to both precursor activities and incidents. icetana has a broad range of use cases across a growing number of industry verticals. It has been implemented at over 35 sites on four continents, helping clients harness the rich data streams from their existing security networks and turning that data into improved situational awareness and deeper operational insights.
