## 6. Key risk factors

The following contains a summary of some of the key risks associated with an investment in the Company. This summary of risks below should be considered in the context of previous disclosures made by the Company in accordance with its periodic and continuous disclosure obligations. The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

### Company Specific Risks

#### *Coronavirus (COVID-19)*

The outbreak of the coronavirus disease (COVID-19) is impacting global economic markets. The nature and extent of the effect of the outbreak on the performance of the Company remains unknown. The Company's Share price may be adversely affected in the short to medium term by the economic uncertainty caused by COVID-19. Further, while the Company intends to develop residential and/or apartment units in areas where post-pandemic market rebounds are most visible or expected, any governmental or industry measures taken in response to COVID-19 may adversely impact the Company's operations and are likely to be beyond the control of the Company.

#### *Risk of operating in foreign jurisdictions*

The Company has been constantly assessing potential new sites in multiple jurisdictions and has recently narrowed down a few opportunities for potential developments or joint ventures in Japan. There is no assurance that these projects will eventuate for the Company. The Company may be subject to the risks of conducting operations in a foreign jurisdiction and changes to or uncertainty in the Japanese legal and regulatory regime in relation to the property development and construction industry, supply of land for property development, project financing, taxation and foreign investment. The Company will also be exposed to such multi-jurisdictional risks in any new territories in which the Company maintains operations from time to time, as well as any other issues in foreign jurisdictions in which the Company may operate.

#### *Land prices*

The business and prospects of the Company are dependent on the performance of the Australian and Japanese property markets, particularly in the various cities the Company operates and intend to operate, and therefore any potential decline in property sales or prices or demand for properties in Australia and Japan generally, or in the cities where our projects are located, could have a material adverse effect on the Company's business, operations and financial performance.

#### *Acquisitions and development*

The Company may acquire property development projects directly or indirectly through acquisition of entities that own development projects and properties. Such acquisitions involve a number of risks inherent in assessing the values, strengths, weaknesses and profitability of the property assets. While the Company will undertake appropriate due diligence in order to assess these risks, unexpected and latent liabilities such as environmental liabilities may still emerge. The Company is also subject to risks involved in the development of properties including changes in construction costs and development timetables.

#### *Contractual risk*

The Company has contractual obligations and rights with respect to a number of agreements it is a party to. These agreements may include provisions which allow for termination (for convenience or otherwise). Additionally, no assurance can be given that all agreements will be fully performed by all contracting parties and that the Company will be successful in securing compliance with the terms of each agreement by the relevant third party. If a contracting party were to breach a material agreement or terminate a material agreement, this could have an adverse impact on the Company's business, operations and financial performance.

#### *Competition risk*

The Company faces competition in the markets in which it operates. The Company also operates with the threat of new competition entering the market. Competition may lead to an oversupply through overdevelopment, or to prices for existing properties or services being inflated via competing bids by prospective purchasers.

#### *Capital requirements*

The continued operations of the Company are dependent on its ability to obtain financing through debt and equity means or generating sufficient cash flows from future operations. There is a general risk that the Company may not be able to access capital from debt or equity markets for future projects or developments, which could have a material adverse impact on the Company's business and financial condition. The Company's ability to borrow money will be subject to the availability of debt at the time the Company wishes to borrow money and the cost of borrowing.

#### *Litigation risk*

The Company is subject to litigation risks. All industries are subject to legal claims, with and without merit. Defence and settlement costs of legal claims can be substantial, even with respect to claims that have no merit. Due to the inherent uncertainty of litigation processes, the resolution of any particular legal proceeding to which the Company is or may become subject could have a material effect on its financial position, results of operations or the Company's activities.

#### *Taxation risks*

Any change in laws and regulations applicable to the taxation of income, intercompany transactions, withholding taxes, levies and other transactional taxes affecting the Company in the countries it operates in or in which it is listed, or any change in the current interpretation of tax laws; any disputes with tax authorities; or any changes to the Company's income mix, may adversely affect its tax status and increase its tax payable, which could have a negative effect on financial results.

#### *Key person risk*

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management, each of whom has knowledge and experience of the Company's operations that cannot be replicated by others in the short term. Senior management may, subject to the relevant periods of notice specified in their employment agreements with the Company, terminate their employment relationship with the Company at any time and the loss of any member of the senior management team could harm the Company's business. It may be difficult to secure replacements with appropriate experience and expertise and it may be difficult to replace senior management in the short term. This may adversely affect the Company's business.

#### *Employment law risk*

The Company may receive claims from former employees for a variety of labour related matters which may or may not have merit. The Company's approach is to defend these claims as they arise. As with any litigation the outcome of any claim will not be known until heard by the court. Any claim which is not able to be successfully defended may result in a loss to the Company.

## General Risks

### *Securities investments*

Shareholders should be aware that there are risks associated with any securities investment. The prices at which the Shares trade may be above or below the issue price and may fluctuate in response to a number of factors. Further, the general stock market experiences price and volume fluctuations. There can be no guarantee trading prices will not be subject to fluctuation. These general stock market price and volume fluctuations may materially affect the market price of the Shares, regardless of the Company's operational performance.

### *Share market conditions*

The market price of the Shares may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

### *Economic risk*

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that general economic climate include the level of direct and indirect competition against the Company, the rate of growth of gross domestic product, interest rates and the rate of inflation.

### *Policies and legislation*

Any material adverse changes in government policies or legislation of Australia or any other country in which the Company has economic interests may affect the viability and profitability of the Company. The Board is not aware of any potential changes to government policy or legislation that would have an adverse impact on the Company.

Investors should consider that an investment in the Company and is speculative, and should consult their professional advisors before deciding whether to participate in the Offer. Any New Shares issued in connection with this Prospectus are speculative in nature and carry no guarantee with respect to the payment of dividends, return of capital, or market value.

## 7. Additional information

### 7.1 Continuous disclosure and inspection rights

The Company is a 'disclosing entity' under the Corporations Act. This means it is subject to regular reporting and disclosure obligations, which require it to disclose to ASX any information of which it is or becomes aware concerning the Company and which a reasonable person would expect to have a material effect on the price or value of securities of the Company.

Copies of Company documents lodged with ASIC may be obtained from, or inspected at, an office of ASIC. As required under the Corporations Act, the Company will provide you with a copy (upon request and free of charge during the Offer Period) of:

## **7.2 Potential Opportunities**

The Board continues to study the feasibility of pursuing residential development opportunities in Hokkaido Japan, by way of acquiring raw land which would be suitable for the construction of residential landed properties such as villas, bungalows or chalets. Any such projects would be in line with the Company's core competencies as a property developer but will also add to its international offering, by opening the doors to further and bigger projects in the Asia Pacific.

In the Company's investor update re-released on 2 October 2020, the Board noted the potential value of pursuing such opportunities in the region and have engaged in high level talks in relation to the same. However, the Board notes that no negotiations have reached finality and no corresponding agreements or letters have been signed.

It is expected that in the event any such negotiations progress and certainty is reached, the proposed details of such a transaction will be subject to ASX and shareholder approvals as required per the listing rules. The Board will also continually and actively consult with the ASX in relation to the same.

### **7.3 Rights attaching to New Shares**

New Shares issued pursuant to this Prospectus will be fully paid ordinary shares in the capital of the Company and will rank equally with the existing Shares including for any dividend issued after the date of this Prospectus.

The rights and liabilities attaching to Shares are set out in the Company's Constitution and are regulated by the Corporations Act, the general law, the ASX Listing Rules and ASX Settlement Operating Rules. The Constitution may only be varied by a special resolution passed by at least 75% of Shareholders present (and entitled to vote).

#### *Meetings and Notice*

Each Shareholder is entitled to receive notice of, and to attend, general meetings of the Company and to receive all notices, accounts and other documents required to be sent to Shareholders under the Constitution, the Corporations Act and the ASX Listing Rules. Shareholders must be given at least 28 days written notice of any general meeting unless otherwise permitted by the Corporations Act.

#### *Rights on Winding Up*

All Shares rank equally in the event of a winding up, subject to any amount remaining unpaid on any Shares. Once all the liabilities of the Company are met, the liquidator may, with the sanction of a special resolution of the members, divide amongst the
