NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS (Expressed in Canadian Dollars)

September 30, 2020

1. NATURE OF OPERATIONS AND GOING CONCERN

Lion One Metals Limited ("Lion One" or the "Company") was incorporated on November 12, 1996 under the laws of the Province of British Columbia, Canada. The Company is in the business of mineral exploration and evaluation and is currently focused on the acquisition, exploration and evaluation of mineral resources in Fiji. The Company is listed for trading on the TSX Venture Exchange ("TSX-V") under the symbol LIO and on the Australian Securities Exchange ("ASX") under the symbol LLO. The Company's head office and principal address is 306 - 267 West Esplanade, North Vancouver, BC, Canada, V7M 1A5. The address of the Company's registered and records office is Suite 1700 – 1055 West Hastings Street, Vancouver, BC, V6E 2E9.

The Company's condensed consolidated interim financial statements are presented in Canadian dollars.

The Company is in the process of exploring and evaluating its resource properties and has not yet determined whether the properties contain mineral reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company has incurred losses from inception and does not currently have the financial resources to advance its projects to completion. As at September 30, 2020, the Company had not advanced its properties to commercial production. The Company estimates that it has adequate financial resources for the next twelve months. The Company's continuation as a going concern is dependent upon the successful results from its exploration activities and its ability to attain profitable operations and generate funds therefrom and/or raise equity capital or borrowings sufficient to meet current and future obligations.

In March 2020 the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. The Company continues to monitor the situation in Fiji, and whilst the health and safety of its employees remains the highest priority, work activities have continued with little disruption. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or results of operations at this time.

The condensed consolidated interim financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. Continued operations of the Company are dependent on the Company's ability to receive financial support, obtain necessary financings, and/or generate profitable operations in the future.

2. BASIS OF PREPARATION

Statement of Compliance

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with IFRS using accounting policies consistent with IFRS issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

Basis of Consolidation and Presentation

The condensed consolidated interim financial statements have been prepared on a historical cost basis except for certain financial assets measured at fair value. All dollar amounts presented are in Canadian dollars unless otherwise specified.

These condensed consolidated interim financial statements incorporate the financial statements of the Company and its wholly controlled subsidiaries. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The condensed consolidated interim financial statements include the accounts of the Company and its direct wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated.

2. BASIS OF PREPARATION (cont'd...)

Use of Estimates

The preparation of these condensed consolidated interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Judgments

The functional currency of each of the subsidiaries and the Company were assessed to determine the economic substance of the currency in which each entity performed its operations. The functional currency of the Company is the Canadian dollar. The functional currencies of the Company's subsidiaries have been assessed as follows:

	Country of Incorporation	Effective Interest	Functional currency
American Eagle Resources Inc.	Canada	100%	Canadian Dollar
9			
Laimes International Inc.	BVI	100%	Canadian Dollar
Auksas Inc.	BVI	100%	Canadian Dollar
Lion One Limited	Fiji	100%	Fijian Dollar
Lion One Australia Pty Ltd.	Australia	100%	Australian Dollar
Piche Resources Pty Ltd.	Australia	100%	Australian Dollar

Estimates

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carrying amounts of assets and liabilities in the event that actual results differ from assumptions made, are as follows:

The carrying value and recoverability of exploration and evaluation assets and property and equipment requires management to make certain estimates, judgments and assumptions about its project. Management considers the economics of the project, including the latest resource prices and the long-term forecasts, and the overall economic viability of the project.

The determination of income tax is inherently complex and requires making certain estimates and assumptions about future events. While income tax filings are subject to audits and reassessments, the Company has adequately provided for all income tax obligations. However, changes in facts and circumstances as a result of income tax audits, reassessments, jurisprudence and any new legislation may result in an increase or decrease in the Company's provision for income taxes.

Share-based payments are subject to estimation of the value of the award at the date of grant using pricing models such as the Black-Scholes option valuation model. The option valuation model requires the input of highly subjective assumptions including the expected share price volatility. Where such valuations are applied, such as the time of a stock option grant or issuance of shares from trust, management provides detailed valuation assumptions

The application of IFRS 16 requires the Company to make judgments that affect the valuation of the right-of-use assets and the valuation of lease liabilities. These include: determining agreements in scope of IFRS 16, determining the contract term and determining the interest rate used for discounting of future cash flows.

The lease term determined by the Company is comprised of the non-cancellable period of lease agreements, periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option.

The present value of the lease payment is determined using a discount rate representing the Company's incremental borrowing rate.

3. SHORT TERM INVESTMENTS AND RESTRICTED CASH

The short-term investments is comprised of guaranteed investment certificates issued by the Company's banking institutions. The restricted cash balance is comprised of a guaranteed investment certificate and security deposit held as collateral for the Company's corporate credit cards.

4. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Tuvatu Gold Project

The Company's primary asset is the Tuvatu Gold Project located near Nadi on the island of Viti Levu, Fiji.

In January 2015, the Mineral Resources Department ("MRD") of Fiji granted Special Mining Lease 62 ("SML 62") on the Tuvatu project to the Company. SML 62 is a designated area within the original boundaries of the Company's Special Prospecting Licenses ("SPL's") 1283 and 1296. SML 62 provides exclusive rights for the potential development, construction, and operation of mining, processing, and waste management infrastructure at Tuvatu. The terms of the mining lease provide for certain performance and reporting requirements. The SML has been granted for a term of ten years provided the Company complies with the terms of the lease. Extensions to the term can be applied subject to the terms of the lease and the Mining Act. A performance and environmental bond of FJD\$2,700,000 (2020 - \$1,682,300, 2019 - \$1,642,113) has been placed on deposit with the MRD. The SML is subject to annual lease payments of FJD\$73,697 (\$45,919).

In addition to a 5% net smelter royalty ("NSR") with the government of Fiji, the Fiji properties are subject to a perpetual production royalty of 0.5% to 1.5% of net smelter returns. This NSR is payable to a company controlled by a common director.

Surface Lease Agreement

The Company holds a 21-year Surface Lease agreement with the iTaueki Land Trust Board ("TLTB") which governs the native land ownership rights in Fiji. The TLTB manages the lease agreements between native land owners and tenants.

Under the terms of the Surface Lease, the Company must make a one-time payment of FJD\$1,000,000 of which FJD\$700,000 (\$419,790) was paid upon acceptance of the Surface Lease agreement. In March 2019, the Company paid FJD\$249,497 (\$155,455) to the TLTB with FJD\$50,503 (\$31,467) remaining is due upon the first gold production from mining operations in Tuvatu. 11. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments

Cash and cash equivalents, short term investments and restricted cash, are measured at fair value using a level 1 fair value measurement. Receivables, deposits, accounts payable and accrued liabilities and lease obligations are carried at amortized cost. The Company considers that the carrying amount of these financial assets and liabilities measured at amortized cost to approximate their fair value due to the short-term nature of the financial instruments. Long-term provisions, representing long-term service benefits, are carried at amortized cost and reflect the fair value of the instrument as the carrying value reflects the payout of the instrument as at the reporting date.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial risk factors

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and cash equivalents, short term investments and receivables. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions.

Receivables mainly consist of Goods and Services Tax ("GST") receivable from the Government of Canada, GST receivable from the Government of Australia and value added tax receivable from the Government of Fiji. The Company believes that the credit risk concentration with respect to receivables is minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities. The Company will raise funds for future use from equity financings and other methods as contemplated by management to satisfy its capital requirements and will continue to depend heavily upon these financing activities. All of the Company's current financial liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms. As at September 30, 2020, the Company had working capital of \$55,638,207.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. The Company does not have a practice of trading derivatives.

a) Interest rate risk

The Company's financial assets exposed to interest rate risk consist of cash and cash equivalents and short-term investments. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. Management believes the interest rate risk is low given the current low global interest rate environment.

among these currencies. Management believes the foreign currency risk is low given the low value of monetary assets (liabilities) denominated in foreign currencies.

b) Foreign currency risk

The Company's property exploration work occurs in Fiji and Australia and is conducted in Canadian dollars, Australian dollars and Fijian dollars. As such, the Company is exposed to foreign currency risk in fluctuations

11. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

As at September 30, 2020, the Company's net foreign denominated financial assets (liabilities) are as follows:

	Foreign currency	Canadian dollar equivalent
Australian Dollar Fijian Dollar	\$ 1,396,464 4,193,725	\$ 1,332,925 2,600,999

The sensitivity of the Company's comprehensive loss due to changes in the carrying values of monetary assets and liabilities denominated in foreign currencies is as follows.

Increase / decrease in foreign exchange rate	September 30, 2020			June 30, 2020		
+ 5% - 5%	\$	196,696 (196,696)	\$	197,751 (197,751)		

c) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. The Company closely monitors commodity prices to determine the appropriate strategic action to be taken by the Company.

12. CAPITAL MANAGEMENT

The Company's capital management policy has the objective of maintaining a strong, but flexible capital structure that optimizes the cost of capital, creditor and market confidence while sustaining the future development of the business.

The Company manages its capital structure and makes adjustments to it in the light of changes in economic conditions. The Company's capital structure includes shareholders' equity of \$126,070,461 (June 30, 2020 - \$82,068,334). In order to maintain or adjust the capital structure, the Company may from time to time issue shares, seek debt financing and adjust its capital spending to manage current and working capital requirements. The Company is not subject to externally imposed capital requirements.

There were no changes to the Company's approach to capital management during the period ended September 30, 2020.

13. SUBSEQUENT EVENTS

Other than disclosed elsewhere, the following occurred subsequent to September 30, 2020:
