HIGHLIGHTS:

- Extensive drilling program to start in January 2021 at Crossroads prospect
- 25 RC holes (2,500m) and 3 diamond holes (600m) to test lateral and vertical extensions of recently defined shallow bedrock gold and silver mineralisation
- Moho awarded co-funded drilling grant of \$147,526 under Exploration Incentive Scheme by WA Government to test for potential gold/silver Intrusive Mineral System

NEXT STEPS:

- Lodge Program of Works applications with DMIRS - Q4, 2020
- Locate diamond drill holes based on RC drill results - Q1, 2021

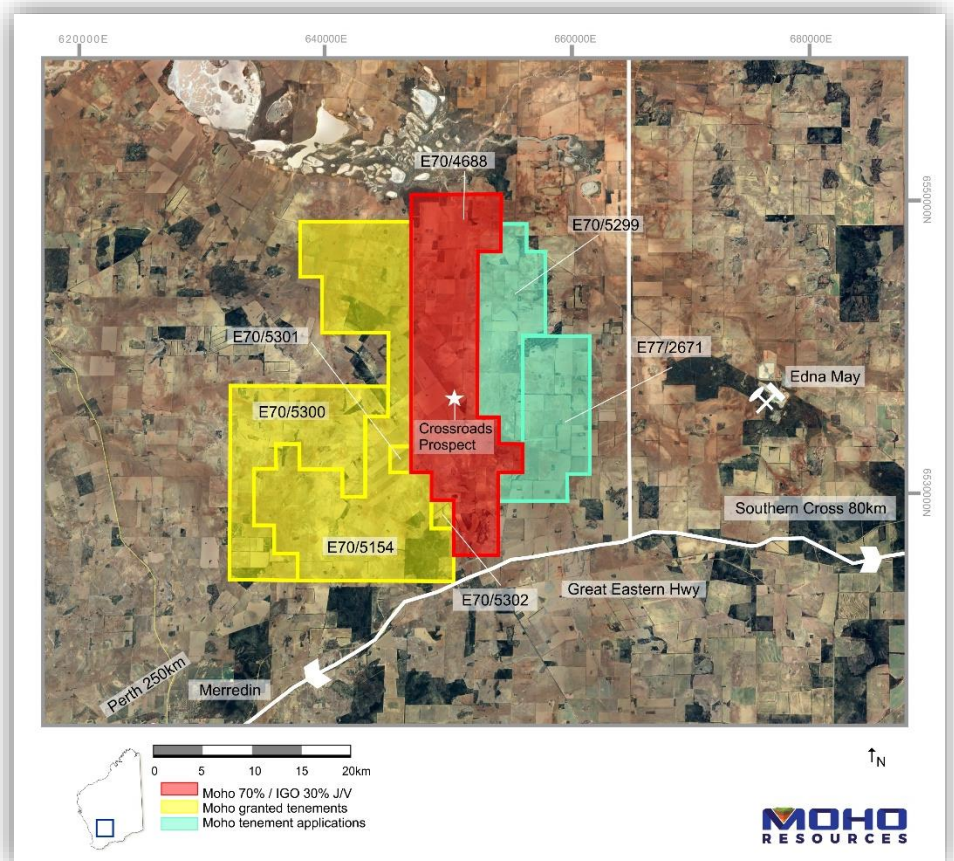

Figure 1: Location of Crossroads gold prospect, Burracoppin Gold Project

“Moho greatly appreciates the WA government’s financial assistance under the Exploration Incentive Scheme to test the Crossroads gold/silver prospect for a potential Intrusive Mineral System. We are looking forward to implementing our maiden RC and diamond drill programs early next year.”

- Mr Shane Sadleir, Moho Managing Director

Moho Resources Ltd (ASX:MOH) (Moho or Company) is pleased to announce that drilling will recommence in January 2021 at the Crossroads gold/silver prospect. The Crossroads prospect is part of Moho’s Burracoppin Gold Project and is located in the WA wheatbelt, about 22km west of the Edna May gold mine (Figure 1).

In June 2020, the Company reported assay results of individual 1.0 metre samples from the Company’s maiden aircore drill program at the Crossroads prospect¹. Gold/silver mineralisation was intersected in bedrock with up to 0.61 g/t Au and 5.53 g/t Ag in bottom of hole (BOH) samples. The gold mineralisation is associated with other pathfinder elements identified as silver, arsenic, antimony, tellurium and bismuth.

The gold/silver mineralisation identified to date at the Crossroads prospect is open to the south, east and at depth, and is located on the northern margin of a pronounced gravity low that may represent a felsic intrusion.

In September 2020 Moho submitted an application for co-funded drilling assistance to test a potential Intrusive Mineral System at the Crossroads prospect. In November 2020 Moho was notified that it had been awarded a co-funded drilling grant of up to \$147,526 from the WA Government as part of its Exploration Incentive Scheme.

Moho’s maiden reverse circulation (RC) drill program of 25 holes (2,500m) will commence in January 2021, targeting the extensions to the previously defined shallow bedrock gold and silver mineralisation at the Crossroads prospect (Figure 2). Three diamond holes (600m) will be drilled at locations to be determined following receipt of the RC assay results.

Moho’s Interest in the Burracoppin Project Tenements

Moho and IGO Limited (ASX:IGO) have now formed an unincorporated joint venture for the purposes of exploring and, if warranted, developing and mining on E70/4688. IGO’s 30% interest will be free carried until completion of a pre-feasibility study, at which time IGO may elect to contribute pro-rata to ongoing work or convert its 30% interest to a 10% free carried interest.

In addition to Moho’s 70% interest in E70/4688, the Company owns a 100% interest in granted exploration tenements E70/5154, E70/5300-5302 and applications ELA70/5299 and E77/2671.

About Moho Resources Ltd

Moho Resources Ltd is an Australian mining company which listed on the ASX in November 2018. The Company is focused on gold and nickel exploration at Empress Springs, Silver Swan North and Burracoppin.

Moho's Board is chaired by Mr Terry Streeter, a well-known and highly successful West Australian businessman with extensive experience in funding and overseeing exploration and mining companies, including Jubilee Mines NL, Western Areas NL and Midas Resources Ltd.

Moho has a strong and experienced Board lead by geoscientist Shane Sadleir as Managing Director, Commercial Director Ralph Winter and Adrian Larking, lawyer and geologist, as Non-Executive Director.

Highly experienced geologists Bob Affleck

(Exploration Manager) and Max Nind (Principal Geologist) are supported by leading industry consultant geophysicist Kim Frankcombe (ExploreGeo Pty Ltd) and experienced consultant geochemists Richard Carver (GCXplore Pty Ltd) and Dr Carl Brauhart (CSA Global Pty Ltd).

Moho's geophysical programs and processing and analysis of the results are supervised by Kim Frankcombe (ExploreGeo Pty Ltd) who is a geologist and geophysicist with 40 years' experience in mineral exploration. He has worked for major mining companies, service companies and for over 20 years as an independent geophysical consultant. He was a member of the discovery team for several significant deposits including one Tier 1 deposit. He manages the ExploreGeo consulting group which provides specialist geophysical advice to explorers.

Dr Jon Hronsky (OA) provides high level strategic and technical advice to Moho. Jon has more than thirty years of experience in the global mineral exploration industry, primarily focused on project generation, technical innovation and exploration strategy development. He has worked across a diverse range of commodities and geographies, and has particular expertise in targeting nickel sulphide and gold deposits.

ENDS

The Board of Directors of Moho Resources Ltd authorised this announcement to be given to ASX.
