

ASX RELEASE

25 November 2020

4DS GRANTED 28th USA PATENT

4DS Memory Limited (ASX:4DS) (**4DS**) (the **Company**), having been advised by the Company's USA patent attorney, is pleased to announce the granting of an additional USA patent bringing the Company's portfolio of granted USA patents to twenty eight (28).

Details of the USA patent grant are as follows:

Resistive Memory Device Having A Template Layer - Patent No. 10,847,717.

Importantly all granted patents and applications are 100% owned by 4DS having been developed in-house and are free from any royalty and or licensing obligations.

The Company has filed an additional four (4) USA patent applications to protect its stream of internal innovations and to strengthen its intellectual property portfolio in the area of Interface Switching ReRAM for Storage Class Memory near to DRAM.

Chief Executive Officer and Managing Director Dr Guido Arnout stated "4DS, with 28 granted patents, has ring fenced its Interface Switching ReRAM technology with an extremely broad and defendable intellectual property position. We continue to file new patents around internal innovations and the speed for which some patents are going to grant via a fast track approval process is testament to the uniqueness of 4DS' technology in the ReRAM field. A portfolio of granted patents is strategically significant as we move into 2021."

About 4DS

4DS Memory Limited (ASX: 4DS), with facilities located in Silicon Valley, is a semiconductor development company of non-volatile memory technology, pioneering Interface Switching ReRAM for next generation gigabyte storage in mobile and cloud. Established in 2007, 4DS owns a patented IP portfolio, comprising 28 USA patents granted and 4 patent applications pending and or filed, which has been developed in-house to create high-density Storage Class Memory. 4DS has a joint development agreement with Western Digital subsidiary HGST, a global storage leader, which accelerates the evolution of 4DS' technology. 4DS also collaborates with imec, a world-leading research and innovation hub in nanoelectronics and digital technologies. The combination of imec's widely acclaimed leadership in microchip technology and profound software and information and communication technology expertise makes them unique.
