## **ABOUT PREDICTIVE**

Over the past 2 years, Predictive has built a commanding land position in Guinea's Siguiri Basin (Figure 2), acquiring 861km² across ten permits with all ground identified utilising the Company's Predictore<sup>TM</sup> methodology.

In July 2019, Predictive was granted the Kaninko Permit (now known as the Bankan Project) near the town of Kouroussa in the Siguiri Basin. This tenement, located approximately 10km from Cassidy's Kouroussa gold deposit, laid the platform for the Company's growth with exploration activity and drilling delivering high-gold grades and broad gold mineralised widths at the NE Bankan and Bankan Creek gold discoveries.

"Gold is becoming an important commodity in Guinea as international exploration funding to the country is increasing significantly" – KPMG, Guinea Country Mining Guide.
