

23 December 2020

## Resignation of CFO & Company Secretary

icetana Limited (ASX:ICE "icetana" or "the Company") advises that Chief Financial Officer and Company Secretary, Mr Shane Cranswick, has tendered his resignation with effect from 19 February 2021. Mr Cranswick has accepted a role with an aeronautical technology company and, having guided icetana through its IPO and first year of listing on the ASX, he believes it is an appropriate time to pursue the next step in his career.

CEO and Managing Director Matt Macfarlane said:

*"The Board, and I personally, wish to thank Shane for his three and a half years with icetana. Shane guided the company through the many crucial forward steps including the successful IPO in December 2019 and strong cash management through the challenges presented by COVID during 2020. All at icetana wish him well on his next challenge. The Board and executive at icetana remain optimistic about the year ahead and the prospects for the business."*

The Company is working to formalise arrangements for Mr Cranswick's departure over the next month and will provide an update on his replacement as appropriate.

– ENDS –

Authorised for release by the Board of icetana Limited.

### About icetana

icetana Limited is a global software company providing video analytics solutions designed to automatically identify anomalous actions in real-time for large scale surveillance networks. Our software integrates with customers' existing video management systems and IP cameras.

Using artificial intelligence and machine learning techniques, the icetana solution learns and filters out routine motion, showing only anomalous or unusual behaviour allowing operators to focus on events that matter and respond in real-time to both precursor activities and incidents. icetana has a broad range of use cases across a growing number of industry verticals. It has been implemented at over 35 sites on four continents, helping clients harness the rich data streams from their existing security networks and turning that data into improved situational awareness and deeper operational insights.
