

ASX RELEASE
19th January 2021
CODE : SOR

Nanocube Media Reference and Battery Development

Perth, Australia, 19th January 2021 – Strategic Elements Ltd (ASX:SOR). In an article released in today's West Australian the writer comments that 'the next goal in the memory tech space is to print one megabit of memory on to a piece of plastic, which Strategic expects will be completed by May'.

This goal was released by the Company on the 28/Oct/2020 where the Managing Director was quoted stating the "aim is to develop a 1 Megabit ultra-low power, flexible, transparent memory device within the next 6 months".

The technology is under development, however the Company is still aiming to achieve this by May 2021.

In addition, the Company has no further information to release at this stage on the self-charging battery pack containing multiple cells capable of producing 3.7volts.

Strategic Elements

The Australian Federal Government has registered Strategic Elements as a Pooled Development Fund which enables most shareholders to pay no tax on capital gains or dividends. Strategic Elements operates as a 'venture builder' where it generates ventures and projects from combining teams of leading scientists or innovators in the technology or resources sectors. The Company is listed on the ASX under the code "SOR".

More information on the Pooled Development Program should be read on the Company's website. For Company Information: Mr Charles Murphy, Managing Director Phone: +61 8 9278 2788 admin@strategicelements.com.au www.strategicelements.com.au
